About Institution

B.S. Abdur Rahman Crescent Institute of Science and Technology is a renowned Quality Leadership Institution located at the greenest spot of Chennai near Tambaram. Through our long history of 37 years of excellence, the Institution has offered access to a wide range of academic opportunities. With 49 programmes, grouped under 12 different Schools, 29 Undergraduate programmes, 20 Postgraduate programmes, and Ph.D. (in all the departments), this institution is a rising stalwart in higher education with promising Quality, Security and Placement. We welcome students from all countries and our educational programmes are designed to equip the learners with virtual knowledge that helps them to achieve what they want to be and go where they want to go in the ladder of success.

This institution is an intellectual destination that challenges conventional thinking and stimulates passion to redefine learning. The distinctive teaching at this institution makes the students and scholars to compete with themselves and each other. Apart from providing top-notch education, our green campus and well-planned student life are solely dedicated to making students utilize the ambiance to the fullest. Through our wide array of educational programmes and unique clubs to foster student development activities, we provide opportunities and experiences that build community, help you grow personally and professionally, and create a place that you can call home now and throughout your life.

About STTP

Leaders help themselves and others to do the right things. They set direction, build anrousing vision, and establish something new. Leadership is about plotting out where you need to go to "win" as a team or an organization; and it is vigorous, exciting, and stimulating. Yet, while leaders set the path, they must also use management skills to shepherd their people to the right target, in a smooth and effective way.

We covered many topics on soft skills, teaching methodology and research in our previous slots of this STTP, learning is an ongoing process, learning is many times denoted as teaching in higher education but learning is much deeper than memorization and material recall deep and long lasting learning involves understanding, relating ideas and making connection between erstwhile and new knowledge, independent and critical thinking and ability to transfer knowledge to new and different framework.

Whether you are an academician / industrialist, all good leaders require a number of soft skills to help them positively intermingle with employees or team members. Effective leaders have the ability to communicate well, motivate their team, handle and delegate responsibilities, listen to feedback, and have the suppleness to solve problems in an ever-changing workplace.

This STTP is about the transformation in teaching learning process at the same time transformation in the people. Leadership is one such quality.

"Anyone who stops learning is old, whether at twenty or eighty. Anyone who keeps learning stays young."
