

## Profile building for Career Choices

A seminar on "Exclusive Technical Profile Building & Psychometric test for 6th semester (3rd year) Engineering students. The event was jointly organized with Byju's which was represented by one of its founding member Mr. Hemant Kumar.

Profile building, at its very basic, is a process of developing projects and skills which can be showcased on your CV. The aim of developing the profile is to create a database or a portfolio that can give a picture of your interests.

Psychometric tests are an objective way to measure the potential ability of candidates to perform well in a job role. This is due to psychometric tests measuring a range of skills from cognitive abilities, knowledge to assessing your personality.
