Name of the Event : Workshop on "Analytics and Design Thinking"

Date : 22 March 2022

Venue : Common Computing Lab II

Total number of participants attended the workshop: 55

The Crescent Data Science Club, Department of Computer Science and Engineering, B S Abdur Rahman Crescent Institute of Science and Technology has organized a workshop on "Analytics and Design Thinking" on 22nd March 2022.

Around 55 Students of III Year B.Tech CSE, II Year B.Tech CSE, B.Tech CSE (IoT) and B.Tech (Artificial Intelligence and Data Sciences) have actively participated in the workshop handled by Rohith Mahadevan, student of IV Year CSE A & President of Crescent Data Science Club. The workshop was coordinated by Ms C Vijayalakshmi, AP(SG)/CSE.

Objective:

- To learn the latest concepts, new tool and create interactive reports
- To engage the students with Analytics and Design thinking.

Activities during the workshop:

The first half of the session focused on analytics part, where the students actively involved in the session. In the beginning, they were taught what is analytics, how analytics is useful in current trend. Then a particular case study was solved. A

dataset which contains information on Sales was used for learning purpose. Students used python for data manipulation and power bi for data visualization

The afternoon session was all about design thinking and it's approach. The resource person, Rohith Mahadevan walked them through various principles and stages of design thinking. Students actively participated in group activities like empathy map creation and journey map and understood the reality of how to approach problems. The high light of the session was a group discussion on analytics insights which had a slight taste of design thinking in the end

Outcome:

- The students were able to work on Python, power BI and Design thinking activities by solving real time problems

The session was really good... We had an opportunity to learn new concepts, learned about new tool. I just wish the workshop was held for couple more days, so that we could have dived much deeper into the topic and explore further more concepts. Other than that the complete agenda was covered well and good. I am looking forward to future workshops.

Everything was good. Hoping to attend more sessions like this in future. Thank you

The workshop was very useful. Thank you.

The concepts taught were so satisfactory and interesting

It was a great session. expecting more productive sessions from the club

Every thing is perfect.

Very Informative. Maybe the analytics concept could be taken on one day. And design thinking on the other day..

Overall the students were satisfied with the approach of how the workshop was conducted and everyone was happy about the learning.
