

B.S. Abdur Rahman™  
**Crescent**  
Institute of Science & Technology  
Deemed to be University u/s 3 of the UGC Act, 1956

*Regulations 2021  
Curriculum and Syllabi  
(Updated upto April 2023, as per  
20<sup>th</sup> Academic Council)*

---

**B.Tech.  
(Civil Engineering)**

**REGULATIONS 2021**

**CURRICULUM AND SYLLABI**

**(Updated upto April 2023, as per 20<sup>th</sup> Academic Council)**

**B.TECH. CIVIL ENGINEERING**

## **VISION AND MISSION OF THE INSTITUTION**

### **VISION**

B.S.Abdur Rahman Crescent Institute of Science and Technology aspires to be a leader in Education, Training and Research in multidisciplinary areas of importance and to play a vital role in the Socio-Economic progress of the Country in a sustainable manner.

### **MISSION**

- To blossom into an internationally renowned Institute.
- To empower the youth through quality and value-based education.
- To promote professional leadership and entrepreneurship.
- To achieve excellence in all its endeavors to face global challenges.
- To provide excellent teaching and research ambience.
- To network with global Institutions of Excellence, Business, Industry and Research Organizations.
- To contribute to the knowledge base through Scientific enquiry, Applied Research and Innovation.

## DEPARTMENT OF CIVIL ENGINEERING

### VISION AND MISSION

#### **Vision**

- To be a leading department for Education, Training and Research in Civil Engineering for a better future and over-all Socio-Economic progress of the Country in a sustainable manner.

#### **Mission**

- To offer world class undergraduate, postgraduate and research programs of industrial and societal relevance in civil engineering.
- To nurture ethically strong civil engineers to address global challenges through quality education and application oriented research.
- To educate our students on design, construction, maintenance and advancements in civil engineering for providing solutions to the betterment of the society.
- To prepare competitive and responsible citizens with good communication, leadership and managerial skills.
- To enrich and enhance the knowledge base for the best practices in various areas of Civil & allied Engineering through collaborations with Global Institutions of Excellence, Industries and Research Organizations.
- To provide a healthy ambience for teaching, research, consultancy and extension activities.

**PROGRAMME EDUCATIONAL OBJECTIVES**

- Exhibit expertise in Planning, Design, Execution and Maintenance of Civil Engineering works as per relevant codal provisions with care for Environment in the global context.
- Design and construct Civil Engineering Infrastructure with emphasis on Durability and Sustainability.
- Develop and execute Civil Engineering projects with social relevance aiming for rural and urban development.
- Pursue Research in complex Civil Engineering problems involving multidisciplinary aspects, and provide sustainable solutions.
- Exercise leadership with an ethical approach, perform in a team work with good communications skills, and excel in cost and time management.

**PROGRAMME OUTCOMES**

On successful completion of the programme, the graduates will be able to

- Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
- Identify, formulate, research literature, and analyses complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
- Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
- Use research –based knowledge and research methods including design of experiments, analysis and interpretation of

data and synthesis of the information to provide valid conclusions.

- Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
- Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
- Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
- Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
- Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
- Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
- Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
- Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change

### **PROGRAMME SPECIFIC OUTCOMES**

- Identify suitable construction materials, techniques and practices for Civil Engineering construction.
- Plan, analyze, design and estimate civil engineering structures using relevant software and appropriate codal provisions.
- Characterize water & wastewater and design sustainable water supply & sanitation schemes.

**REGULATIONS - 2021**  
**B.TECH. DEGREE PROGRAMMES**  
**(Under Choice Based Credit System)**

(Amendments Approved by the 19th Academic Council – September 2022)

**1.0 PRELIMINARY DEFINITIONS & NOMENCLATURE**

In these Regulations, unless the context otherwise requires:

- i) **"Programme"** means B.Tech. Degree Programme.
- ii) **"Branch"** means specialization or discipline of B.Tech. Degree Programme like Civil Engineering, Mechanical Engineering, etc.,
- iii) **"Course"** means theory / practical / laboratory integrated theory / seminar / internship / project and any other subject that is normally studied in a semester like English, Mathematics, Environmental Science, Engineering Graphics, Electronic Devices etc.,
- iv) **"Institution"** means B.S. Abdur Rahman Crescent Institute of Science and Technology.
- v) **"Academic Council"** means the Academic Council, which is the apex body on all academic matters of this Institute.
- vi) **"Dean (Academic Affairs)"** means the Dean (Academic Affairs) of the Institution who is responsible for the implementation of relevant rules and regulations for all the academic activities.
- vii) **"Dean (Student Affairs)"** means the Dean (Students Affairs) of the Institution who is responsible for activities related to student welfare and discipline in the campus.
- viii) **"Controller of Examinations"** means the Controller of Examinations of the Institution who is responsible for the conduct of examinations and declaration of results.
- ix) **"Dean of the School"** means the Dean of the School of the department concerned.
- x) **"Head of the Department"** means the Head of the Department concerned.

**2.0 ADMISSION**

**2.1a)** Candidates for admission to the first semester of the eight semester B. Tech. degree programme shall be required to have passed the Higher Secondary Examination of the 10+2 curriculum

(Academic stream) prescribed by the appropriate authority or any other examination of any University or authority accepted by the Institution as equivalent thereto.

- 2.1b)** The student shall have studied at least any three of the following courses: Physics, Mathematics, Chemistry, Computer Science, Electronics, Information Technology, Biology, Informatics Practices, Biotechnology, Technical Vocational Subjects, Agriculture, Engineering Graphics, Business Studies, Entrepreneurship at 10+2 level. In case if the student has not studied any or all the courses viz., mathematics, physics and chemistry, he / she shall undergo bridge course(s) in the concerned course(s) at 10+2 level knowledge.
- 2.2** Notwithstanding the qualifying examination, the candidate might have passed at 10+2, the candidate shall also write an entrance examination prescribed by the Institution for admission. The entrance examination shall test the proficiency of the candidate in the courses considered eligible for admission on the standards prescribed for 10+2 academic stream.
- 2.3** Candidates for admission to the third semester of the eight semester B.Tech. programme under lateral entry category shall be required to have passed minimum Three years / Two years (Lateral Entry) Diploma examination in any branch of Engineering / Technology or passed B.Sc. Degree from a recognized University as defined by UGC and passed 10+2 examination with Mathematics as a subject or Passed three year Diploma of Vocation Stream (D.Voc) in the same or allied sector or any other examination of any other authority accepted by the Institution as equivalent thereto.
- 2.4** The Institution shall offer suitable bridge courses in Mathematics, Physics, Engineering drawing, etc., for the students of diverse backgrounds.
- 2.5** The eligibility criteria such as marks, number of attempts and physical fitness shall be as prescribed by the Institution in adherence to the guidelines of regulatory authorities from time to time.
- 3.0 BRANCHES OF STUDY**
- 3.1** Regulations are applicable to the following B.Tech. Degree programmes in various branches of Engineering and Technology,

each distributed over eight semesters, with two semesters per academic year.

1. Aeronautical Engineering
2. Artificial Intelligence and Data Science
3. Automobile Engineering
4. Biotechnology
5. Civil Engineering
6. Computer Science and Engineering
7. Computer Science and Engineering (Cyber Security)
8. Computer Science and Engineering (Internet of Things)
9. Electrical and Electronics Engineering
10. Electronics and Communication Engineering
11. Electronics and Instrumentation Engineering
12. Information Technology
13. Mechanical Engineering
14. Polymer Engineering

#### **4.0 STRUCTURE OF THE PROGRAMME**

**4.1** Every programme has a curriculum with syllabi consisting of theory and practical courses such as,

- i) Basic Science Courses - BSC
- ii) Humanities and Social Sciences including Management Courses - HSC
- iii) Engineering Science Courses - ESC
- iv) Professional Core Courses - PCC
- v) Professional Elective Courses - PEC
- vi) Open Elective Courses - OEC
- vii) Laboratory Courses – LC
- viii) Laboratory Integrated Theory Courses – LITC
- ix) Mandatory Courses- MC
- x) Project - PROJ (Project work, seminar and internship in industry or at appropriate workplace)

##### **4.1.1 Mandatory Induction Programme for First year Students**

The first year students upon admission shall undergo a mandatory three week induction programme consisting of physical activity, creative arts, universal human values, literary, proficiency modules, lectures by eminent people, visits to local

areas, familiarization with departments / schools and centres, etc.,

#### **4.1.2 Personality and Character Development**

All students shall enroll, on admission, in any of the following personality and character development programmes:

- National Cadet Corps (NCC)
- National Service Scheme (NSS)
- National Sports Organization (NSO)
- Youth Red Cross (YRC)
- Rotaract
- Crescent Indian Society Training Development (ISTD–C)
- Crescent Creative Strokes
- Crescent Technocrats club

The training activities / events / camp shall normally be organized during the weekends / vacation period.

#### **4.1.3 Online Courses for Credit Transfer**

Students are permitted to undergo department approved online courses under SWAYAM up to 40% of credits of courses in a semester excluding project semester with the recommendation of the Head of the Department / Dean of School and with the prior approval of Dean (Academic Affairs) during his / her period of study. The credits earned through online courses ratified by the respective Board of Studies shall be transferred following the due approval procedures. The online courses can be considered in lieu of core courses and elective courses.

#### **4.1.4 Value Added Courses**

The students are permitted to pursue department approved online courses (excluding courses registered for credit transfer) or courses offered / approved by the department as value added courses.

The details of the value added course viz., syllabus, schedule of classes and the course faculty shall be sent to the Dean (Academic Affairs) for approval. The students may also undergo the valued added courses offered by other departments with the consent of the Head of the Department offering the course.

These value added courses shall be specified in the consolidated

mark sheet as additional courses pursued by the student over and above the curriculum during the period of study.

#### **4.1.5 Industry Internship**

The students shall undergo training for a period as specified in the curriculum during the summer vacation in any industry relevant to the field study.

The students are also permitted to undergo internship at research organizations / eminent academic institutions for the period prescribed in the curriculum during the summer vacation, in lieu of Industrial training.

In any case, the student shall obtain necessary approval from the Head of the Department / Dean of School and the training has to be taken up at a stretch.

#### **4.1.6 Industrial Visit**

The student shall undergo at least one industrial visit every year from the second year of the programme. The Heads of Departments / Deans of Schools shall ensure the same.

#### **4.2 Each course is normally assigned certain number of credits:**

- one credit per lecture period per week
- one credit per tutorial period per week
- one credit for two to three periods and two credits for four periods of laboratory or practical sessions per week
- one credit for two periods of seminar / project work per week
- one credit for two weeks of industrial training or 80 hours per semester.

#### **4.3 Each semester curriculum shall normally have a blend of lecture courses, laboratory courses, laboratory integrated theory courses, etc.**

#### **4.5 The medium of instruction, examinations and project report shall be in English, except for courses in languages other than English.**

### **5.0 DURATION OF THE PROGRAMME**

#### **5.1 A student is expected to complete the B.Tech. programme in eight semesters (six semesters in the case of lateral entry scheme), but in any case not more than 14 continuous semesters reckoned from the date of first admission (12 semesters in the case of lateral entry students).**

**5.2** Each semester shall consist of a minimum of 90 working days including the days of examinations.

**5.3** The maximum duration for completion of the programme as mentioned in clause 5.1 shall also include period of break of study vide clause 7.1 so that the student may be eligible for the award of the degree.

## **6.0 REGISTRATION AND ENROLLMENT**

**6.1** The students of first semester shall register and enroll for courses at the time of admission by paying the prescribed fees. For the subsequent semesters registration for the courses shall be done by the student one week before the last working day of the previous semester.

### **6.2 Change of a Course**

A student can change an enrolled course within 10 working days from the commencement of the course, with the approval of the Dean (Academic Affairs), on the recommendation of the Head of the Department of the student.

### **6.3 Withdrawal from a Course**

A student can withdraw from an enrolled course at any time before the first continuous assessment test for genuine reasons, with the approval of the Dean (Academic Affairs), on the recommendation of the Head of the Department of the student.

## **7.0 BREAK OF STUDY FROM PROGRAMME**

**7.1** A student may be allowed / enforced to take a break of study for two semesters from the programme with the approval of Dean (Academic Affairs) for the following reasons:

7.1.1 Medical or other valid grounds

7.1.2 Award of 'I' grade in all the courses in a semester due to lack of attendance

7.1.3 Debarred due to any act of indiscipline

**7.2** The total duration for completion of the programme shall not exceed the prescribed maximum number of semesters (vide clause 5.1).

**7.3** A student who has availed a break of study in the current semester (odd/even) can rejoin only in the subsequent corresponding (odd/even) semester in the next academic year on approval from the Dean (Academic affairs).

**7.4** During the break of study, the student shall not be allowed to attend

any regular classes or participate in any activities of the Institution. However, he / she shall be permitted to enroll for the '1' grade courses and appear for the arrear examinations.

## **8.0 CLASS ADVISOR AND FACULTY ADVISOR**

### **8.1 Class Advisor**

A faculty member shall be nominated by the Head of the Department as class advisor for the class throughout the period of study except first year.

The class advisor shall be responsible for maintaining the academic, curricular and co-curricular records of students of the class throughout their period of study.

However, for the first and second semester, the class advisors (first year class advisors) are nominated by the first year coordinator.

### **8.2 Faculty Advisor**

To help the students in planning their courses of study and for general counseling, the Head of the Department of the students shall attach a maximum of 20 students to a faculty member of the department who shall function as faculty advisor for the students throughout their period of study. Such faculty advisor shall guide the students in taking up the elective courses for registration and enrolment in every semester and also offer advice to the students on academic and related personal matters.

## **9.0 COURSE COMMITTEE**

**9.1** Each common theory course offered to more than one group of students shall have a "Course Committee" comprising all the course faculty teaching the common course with one of them nominated as a course coordinator. The nomination of the course coordinator shall be made by the Head of the Department / Dean (Academic Affairs) depending on whether all the course faculty teaching the common course belong to a single department or from several departments. The course committee shall ensure preparation of a common question paper and scheme of evaluation for the tests and semester end examination.

## **10.0 CLASS COMMITTEE**

A class committee is constituted branch wise and semester wise by the Head of the Department / Dean of the School shall normally comprise of faculty members handling the classes, student

representatives and a senior faculty member not handling the courses as chairman.

**10.1** The composition of class committees for first and second semester is as follows:

- i) The first year coordinator shall be the chairman of the class committee
- ii) Faculty members of all individual courses of first / second semester
- iii) Six student representatives (male and female) of each class nominated by the first year coordinator
- iv) The class advisor and faculty advisors of the class

**10.2** The composition of the class committee for each branch from 3<sup>rd</sup> to 8<sup>th</sup> semester is as follows:

- i) One senior faculty member preferably not handling courses for the concerned semester appointed as chairman by the Head of the Department
- ii) All the faculty members handling courses of the semester
- iii) Six student representatives (male and female) of each class nominated by the Head of the Department in consultation with the relevant faculty advisors
- iv) All faculty advisors and the class advisors
- v) Head of the Department

**10.3** The class committee shall meet at least three times during the semester. The first meeting shall be held within two weeks from the date of commencement of classes, in which the components of continuous assessment for various courses and the weightages for each component of assessment shall be decided for the first and second assessment. The second meeting shall be held within a week after the date of first assessment report, to review the students' performance and for follow up action.

**10.4** During these two meetings, the student members shall meaningfully interact and express opinions and suggestions to improve the effectiveness of the teaching-learning process, curriculum and syllabi, etc.

**10.5** The third meeting of the class committee, excluding the student members, shall meet after the semester end examinations to analyse the performance of the students in all the components of

assessments and decide their grades in each course. The grades for a common course shall be decided by the concerned course committee and shall be presented to the class committee(s) by the course faculty concerned.

### **11.0 CREDIT LIMIT FOR ENROLLMENT & MOVEMENT TO HIGHER SEMESTER**

**11.1** A student can enroll for a maximum of 32 credits during a semester including Redo / Predo courses.

**11.2** The minimum credits earned by the student to move to 7<sup>th</sup> semester shall not be less than 60 credits (40 credits for lateral entry students).

### **12.0 ASSESSMENT PROCEDURE AND PERCENTAGE WEIGHTAGE OF MARKS**

**12.1** Every theory course shall have a total of three assessments during a semester as given below:

<b>Assessments</b>	<b>Course Coverage in Weeks</b>	<b>Duration</b>	<b>Weightage of Marks</b>
<b>Assessment 1</b>	1 to 6	1.5 hours	25%
<b>Assessment 2</b>	7 to 12	1.5 hours	25%
<b>Semester End Examination</b>	Full course	3 hours	50%

### **12.2 Theory Course**

Appearing for semester end theory examination for each course is mandatory and a student shall secure a minimum of 40% marks in each course in semester end examination for the successful completion of the course.

### **12.3 Laboratory Course**

Every practical course shall have 60% weightage for continuous assessments and 40% for semester end examination. However, a student shall have secured a minimum of 50% marks in the semester end practical examination for the award of pass grade.

### **12.4 Laboratory Integrated Theory Courses**

For laboratory integrated theory courses, the theory and practical components shall be assessed separately for 100 marks each and

consolidated by assigning a weightage of 75% for theory component and 25% for practical component. Grading shall be done for this consolidated mark. Assessment of theory components shall have a total of three assessments with two continuous assessments carrying 25% weightage each and semester end examination carrying 50% weightage. The student shall secure a separate minimum of 40% in the semester end theory examination. The evaluation of practical components shall be through continuous assessment.

**12.5** The components of continuous assessment for theory / practical / laboratory integrated theory courses shall be finalized in the first class committee meeting.

### **12.6 Industry Internship**

In the case of industry internship, the student shall submit a report, which shall be evaluated along with an oral examination by a committee of faculty members constituted by the Head of the Department. The student shall also submit an internship completion certificate issued by the industry / research / academic organisation. The weightage of marks for industry internship report and viva voce examination shall be 60% and 40% respectively.

### **12.7 Project Work**

In the case of project work, a committee of faculty members constituted by the Head of the Department / Dean of the School will carry out three periodic reviews. Based on the project report submitted by the students, an oral examination (viva voce) shall be conducted as semester end examination by an external examiner approved by the Controller of Examinations. The weightage for periodic reviews shall be 50%. Of the remaining 50%, 20% shall be for the project report and 30% for the viva voce examination.

**12.8** Assessment of seminars and comprehension shall be carried out by a committee of faculty members constituted by the Head of the Department.

**12.9** For the first attempt of the arrear theory examination, the internal assessment marks scored for a course during first appearance shall be used for grading along with the marks scored in the arrear examination. From the subsequent appearance onwards, full weightage shall be assigned to the marks scored in the semester

end examination and the internal assessment marks secured during the course of study shall become invalid.

In case of laboratory integrated theory courses, after one regular and one arrear appearance, the internal mark of theory component is invalid and full weightage shall be assigned to the marks scored in the semester end examination for theory component. There shall be no arrear or improvement examination for lab components.

### **13.0 SUBSTITUTE EXAMINATIONS**

**13.1** A student who is absent, for genuine reasons, may be permitted to write a substitute examination for any one of the two continuous assessment tests of a course by paying the prescribed substitute examination fee. However, permission to take up a substitute examination will be given under exceptional circumstances, such as accidents, admission to a hospital due to illness, etc. by a committee constituted by the Head of the Department / Dean of the School for that purpose. There is no substitute examination for semester end examinations.

**13.2** A student shall apply for a substitute exam in the prescribed form to the Head of the Department / Dean of the School within a week from the date of assessment test. However, the substitute examination will be conducted only after the last instructional day of the semester.

### **14.0 ATTENDANCE REQUIREMENT AND SEMESTER / COURSE REPETITION**

**14.1** A student shall earn 100% attendance in the contact periods of every course, subject to a maximum relaxation of 25% to become eligible to appear for the semester end examination in that course, failing which the student shall be awarded "I" grade in that course.

**14.2** The faculty member of each course shall cumulate the attendance details for the semester and furnish the names of the students who have not earned the required attendance in the concerned course to the class advisor. The class advisor shall consolidate and furnish the list of students who have earned less than 75% attendance, in various courses, to the Dean (Academic Affairs) through the Head of the Department / Dean of the School. Thereupon, the Dean (Academic Affairs) shall officially notify the names of such students prevented from writing the semester end examination in each

course.

- 14.3** If a student secures attendance between 65% and less than 75% in any course in a semester, due to medical reasons (hospitalization / accident / specific illness) or due to participation in the institution approved events, the student shall be given exemption from the prescribed attendance requirement and the student shall be permitted to appear for the semester end examination of that course. In all such cases, the students shall submit the required documents immediately after joining the classes to the class advisor, which shall be approved by the Head of the Department / Dean of the School. The Vice Chancellor, based on the recommendation of the Dean (Academic Affairs) may approve the condonation of attendance.
- 14.4** A student who has obtained an “I” grade in all the courses in a semester is not permitted to move to the next higher semester. Such students shall repeat all the courses of the semester in the subsequent academic year.
- 14.5** The student awarded “I” grade, shall enroll and repeat the course when it is offered next. In case of “I” grade in an elective course either the same elective course may be repeated or a new elective course may be taken with the approval of the Head of the Department / Dean of the School.
- 14.6** A student who is awarded “U” grade in a course shall have the option to either write the semester end arrear examination at the end of the subsequent semesters, or to redo the course when the course is offered by the department. Marks scored in the continuous assessment in the redo course shall be considered for grading along with the marks scored in the semester end (redo) examination. If any student obtains “U” grade in the redo course, the marks scored in the continuous assessment test (redo) for that course shall be considered as internal mark for further appearance of arrear examination.
- 14.7** If a student with “U” grade, who prefers to redo any particular course, fails to earn the minimum 75% attendance while doing that course, then he / she is not permitted to write the semester end examination and his / her earlier “U” grade and continuous assessment marks shall continue.

**15.0 REDO COURSES**

**15.1** A student can register for a maximum of three redo courses per semester without affecting the regular semester classes, whenever such courses are offered by the concerned department, based on the availability of faculty members and subject to a specified minimum number of students registering for each of such courses.

**15.2** The number of contact hours and the assessment procedure for any redo course shall be the same as regular courses, except there is no provision for any substitute examination and withdrawal from a redo course.

**16.0 PASSING AND DECLARATION OF RESULTS AND GRADE SHEET**

**16.1** All assessments of a course shall be made on absolute marks basis. The class committee without the student members shall meet to analyse the performance of students in all assessments of a course and award letter grades following the relative grading system. The letter grades and the corresponding grade points are as follows:

Letter Grade	Grade Points
S	10
A	9
B	8
C	7
D	6
E	5
U	0
W	-
I	-

**"W"** - denotes withdrawal from the course

**"I"** - denotes inadequate attendance in the course and prevention from appearance of semester end examination

**"U"** - denotes unsuccessful performance in the course.

**16.2** A student who earns a minimum of five grade points ('E' grade) in a course is declared to have successfully completed the course. Such a course cannot be repeated by the student for improvement

of grade.

- 16.3** Upon awarding grades, the results shall be endorsed by the chairman of the class committee and Head of the Department / Dean of the School. The Controller of Examinations shall further approve and declare the results.
- 16.4** Within one week from the date of declaration of result, a student can apply for revaluation of his / her semester end theory examination answer scripts of one or more courses, on payment of prescribed fee, through proper application to the Controller of Examinations. Subsequently, the Head of the Department / Dean of the School offered the course shall constitute a revaluation committee consisting of chairman of the class committee as convener, the faculty member of the course and a senior faculty member having expertise in that course as members. The committee shall meet within a week to revalue the answer scripts and submit its report to the Controller of Examinations for consideration and decision.
- 16.5** After results are declared, grade sheets shall be issued to each student, which contains the following details: a) list of courses enrolled during the semester including redo courses / arrear courses, if any; b) grades scored; c) Grade Point Average (GPA) for the semester and d) Cumulative Grade Point Average (CGPA) of all courses enrolled from the first semester onwards.

GPA is the ratio of the sum of the products of the number of credits of courses registered and the grade points corresponding to the grades scored in those courses, taken for all the courses, to the sum of the number of credits of all the courses in the semester.

If  $C_i$  is the number of credits assigned for the  $i^{\text{th}}$  course and  $GP_i$  is the Grade Point in the  $i^{\text{th}}$  course,

$$GPA = \frac{\sum_{i=1}^n (C_i)(GP_i)}{\sum_{i=1}^n C_i}$$

Where  $n$  = number of courses

The Cumulative Grade Point Average (CGPA) is calculated in a similar manner, considering all the courses enrolled from first semester.

**"I" and "W"** grades are excluded for calculating GPA.

"U", "I" and "W" grades are excluded for calculating CGPA.

The formula for the conversion of CGPA to equivalent percentage of marks shall be as follows:

Percentage equivalent of marks = CGPA X 10

**16.6** After successful completion of the programme, the degree shall be awarded to the students with the following classifications based on CGPA.

Classification	CGPA
First Class with Distinction	8.50 and above and passing all the courses in first appearance and completing the programme within the prescribed period of 8 semesters for all students (except lateral entry students) and 6 semesters for lateral entry students
First Class	6.50 and above and completing the programme within a maximum of 10 semesters for all students (except lateral entry students) and 8 semesters for lateral entry students
Second Class	Others

#### **16.6.1 Eligibility for First Class with Distinction**

- A student should not have obtained 'U' or 'I' grade in any course during his/her study
- A student should have completed the UG programme within the minimum prescribed period of study (except clause 7.1.1)

#### **16.6.2 Eligibility for First Class**

- A student should have passed the examination in all the courses not more than two semesters beyond the minimum prescribed period of study (except clause 7.1.1)

**16.6.3** The students who do not satisfy clause 16.6.1 and clause 16.6.2 shall be classified as second class.

**16.6.4** The CGPA shall be rounded to two decimal places for the purpose of classification. The CGPA shall be considered up to three decimal places for the purpose of comparison of performance of students and ranking.

### **17.0 SUPPLEMENTARY EXAMINATION**

Final year students and passed out students can apply for supplementary examination for a maximum of three courses thus providing an opportunity to complete their degree programme. Likewise, students with less credits in VI semester can also apply for supplementary examination for a maximum of three courses to enable them to earn minimum credits to move to higher semester. The students can apply for supplementary examination within three weeks of the declaration of results in the even semester.

### **18.0 DISCIPLINE**

- 18.1** Every student is expected to observe discipline and decorum both inside and outside the campus and not to indulge in any activity which tends to affect the reputation of the Institution.
- 18.2** Any act of indiscipline of a student, reported to the Dean (Student Affairs), through the Head of the Department / Dean of the School concerned shall be referred to a Discipline and Welfare Committee constituted by the Registrar for taking appropriate action. This committee shall also address the grievances related to the conduct of online classes.

### **19.0 ELIGIBILITY FOR THE AWARD OF DEGREE**

- 19.1** A student shall be declared to be eligible for the award of B.Tech. degree provided the student has:
- i) Successfully earned the required number of total credits as specified in the curriculum of the programme of study within a maximum period of 14 semesters (12 semesters for lateral entry) from the date of admission, including break of study.
  - ii) Successfully completed the requirements of the enrolled professional development activity.
  - iii) No dues to the Institution, Library, Hostel, etc.
  - iv) No disciplinary action pending against him/her.
- 19.2** The award of the degree must have been approved by the Institution.

### **20.0 MINOR DEGREE PROGRAMMES OFFERED FOR STUDENTS**

- 20.1** The students admitted in the following B.Tech. programmes can graduate with a minor degree, which is optional, along with a major degree:

- |                     |                          |
|---------------------|--------------------------|
| • Civil Engineering | • Mechanical Engineering |
|---------------------|--------------------------|

• Electronics and Communication Engineering	• Electrical and Electronics Engineering
• Automobile Engineering	• Aeronautical Engineering
• Polymer Engineering	• Biotechnology Engineering
• Electronics and Instrumentation Engineering	• Computer Science and Engineering
• Information Technology	• Artificial Intelligence and Data Science
• Computer Science and Engineering (IoT)	• Computer Science and Engineering(Cyber Security)

**20.2** The eligibility for choosing the minor degree is given as below:

<b>Sl. No.</b>	<b>Minor Degree</b>	<b>Eligible Major Degree Programmes (from other Departments)</b>
1.	Artificial Intelligence and Machine Learning	Mechanical Engineering Aeronautical Engineering
2.	Block Chain	Polymer Engineering
3.	Cyber Security	Automobile Engineering
4.	Data Science	Civil Engineering
5.	Internet of Things (IoT)	Biotechnology Electrical and Electronics Engineering Electronics and Instrumentation Engineering
6.	Virtual and Augmented Reality	Mechanical Engineering Aeronautical Engineering Polymer Engineering Automobile Engineering Civil Engineering Biotechnology Electrical and Electronics Engineering Electronics and Instrumentation Engineering Electronics and Communication Engineering
7.	Sensor Technology	Mechanical Engineering Aeronautical Engineering

		Polymer Engineering Automobile Engineering Civil Engineering Biotechnology Electrical and Electronics Engineering
8.	Robotics	Artificial Intelligence and Data Science Computer Science and Engineering (Cyber Security) Computer Science and Engineering (IoT) Computer Science and Engineering Information and Technology Civil Engineering Biotechnology Electrical and Electronics Engineering Electronics and Instrumentation Engineering
9.	3D Printing	Artificial Intelligence and Data Science Computer Science and Engineering (Cyber Security) Computer Science and Engineering (IoT) Computer Science and Engineering Information and Technology Biotechnology Electrical and Electronics Engineering Electronics and Instrumentation Engineering Electronics and Communication Engineering
10.	Electric Vehicles	Artificial Intelligence and Data Science Computer Science and Engineering (Cyber Security) Computer Science and Engineering (IoT) Computer Science and Engineering Information and Technology Civil Engineering Biotechnology

		Electronics and Communication Engineering
11.	Industrial Automation	Artificial Intelligence and Data Science Computer Science and Engineering (Cyber Security) Computer Science and Engineering (IoT) Computer Science and Engineering Information and Technology Mechanical Engineering Aeronautical Engineering Polymer Engineering Automobile Engineering Civil Engineering Biotechnology Electronics and Communication Engineering
12.	GIS and Remote Sensing	Artificial Intelligence and Data Science Computer Science and Engineering (Cyber Security) Computer Science and Engineering (IoT) Computer Science and Engineering Information and Technology Mechanical Engineering Aeronautical Engineering Polymer Engineering Automobile Engineering Biotechnology Electrical and Electronics Engineering Electronics and Instrumentation Engineering Electronics and Communication Engineering
13.	Computational Biology	Artificial Intelligence and Data Science Computer Science and Engineering (Cyber Security) Computer Science and Engineering (IoT)

		Computer Science and Engineering Information and Technology Mechanical Engineering Aeronautical Engineering Polymer Engineering Automobile Engineering Civil Engineering Electrical and Electronics Engineering Electronics and Instrumentation Engineering Electronics and Communication Engineering
--	--	--

**20.3** A student shall earn an additional 18 to 20 credits for the award of a minor degree.

**20.4** A student shall be awarded a minor degree only when he / she completes the requirements for the award of major degree stipulated in the respective programme.

**21.0 POWER TO MODIFY**

Notwithstanding all that has been stated above, the Academic Council has the right to modify the above regulations from time to time.

**Overall Total Credits – 167**

\* Laboratory Integrated Theory course

\*\* Laboratory Course

# Three Week Orientation Programme – Mandatory Non-Credit Course

## 15 days of Industrial training during the summer vacation of second year.  
The credit will be awarded in the 5<sup>th</sup> Semester.### 15 days of Industrial training during the summer vacation of third year.  
The credit will be awarded in the 7<sup>th</sup> Semester.

\$ Not a Mandatory Course - The student will take up this course during the Summer Holidays of III year as a comprehension of Soft Skills courses offered from semester III to VI. Upon successful completion, the course will be mentioned in grade sheet of VII semester.

**LIST OF PROFESSIONAL ELECTIVE COURSES****SPECIALIZATION I: STRUCTURAL ENGINEERING**

<b>Sl. No.</b>	<b>Course Group</b>	<b>Course Code</b>	<b>Course Title</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
1.	PE	CEDX 01	Advanced Design of RC and Masonry Structures	3	0	0	3
2.	PE	CEDX 02	Advanced Design of Steel Structures	3	0	0	3
3.	PE	CEDX 03	Design of Bridge Structures	3	0	0	3
4.	PE	CEDX 04	Earthquake Resistant Design of Structures	3	0	0	3
5.	PE	CEDX 05	Introduction to Finite Element Analysis of Structures	2	0	2	3
6.	PE	CEDX 06	Structural Dynamics	3	0	0	3
7.	PE	CEDX 07	Prestressed Concrete Structures	3	0	0	3
8.	PE	CEDX 08	Prefabricated Structures	3	0	0	3
9.	PE	CEDX 09	Introduction to Steel-Concrete Composite Structures	3	0	0	3

**SPECIALIZATION II: CONSTRUCTION TECHNOLOGY & MANAGEMENT**

<b>Sl. No.</b>	<b>Course Group</b>	<b>Course Code</b>	<b>Course Title</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
1.	PE	CEDX 16	Advanced Concrete Technology	3	0	0	3
2.	PE	CEDX 17	Waterproofing of Concrete and Masonry Structures	3	0	0	3
3.	PE	CEDX 18	Corrosion Prevention and Control in RC Structures	3	0	0	3
4.	PE	CEDX 19	Lean Construction	3	0	0	3

B.Tech.	Civil Engineering			Regulations 2021			
5.	PE	CEDX 20	Intelligent Building Management System	3	0	0	3
6.	PE	CEDX 21	Automation in Construction and Management	3	0	0	3
7.	PE	CEDX 22	Building Information Modelling	1	0	4	3
8.	PE	CEDX 23	Housing Planning and byelaws	3	0	0	3

### SPECIALIZATION III: GEOTECHNICAL ENGINEERING

Sl. No.	Course Group	Course Code	Course Title	L	T	P	C
1.	PE	CEDX 31	Engineering Geology	3	0	0	3
2.	PE	CEDX 32	Ground Improvement Techniques	3	0	0	3
3.	PE	CEDX 33	Subsurface Investigation and Report Writing	3	0	0	3
4.	PE	CEDX 34	Applications of software in Geotechnical Engineering	3	0	0	3
5.	PE	CEDX 35	Geo-Environmental Engineering	3	0	0	3
6.	PE	CEDX 36	Pavement Engineering	3	0	0	3
7.	PE	CEDX 37	Geo Synthetics	3	0	0	3
8.	PE	CEDX 38	Design Principles of Special foundation	3	0	0	3

### SPECIALIZATION IV: ENVIRONMENTAL ENGINEERING

Sl. No.	Course Group	Course Code	Course Title	L	T	P	C
1.	PE	CEDX 41	Air and Noise Pollution Control	3	0	0	3

B.Tech.	Civil Engineering			Regulations 2021			
2.	PE	CEDX 42	Solid Waste Management	3	0	0	3
3.	PE	CEDX 43	Industrial Waste Water Treatment	3	0	0	3
4.	PE	CEDX 44	Hazardous Waste Management	3	0	0	3
5.	PE	CEDX 45	Environmental Risk Assessment	3	0	0	3
6.	PE	CEDX 46	Environmental Impact Assessment	3	0	0	3
7.	PE	CEDX 47	Sustainable Water and Sanitation for Smart cities	3	0	0	3

#### **SPECIALIZATION V: HYDROLOGY AND WATER RESOURCES ENGINEERING**

Sl.No.	Course Group	Course Code	Course Title	L	T	P	C
1.	PE	CEDX 51	Hydrology	3	0	0	3
2.	PE	CEDX 52	Ground Water Engineering	3	0	0	3
3.	PE	CEDX 53	Storm Water and Flood Management	3	0	0	3
4.	PE	CEDX 54	Design of Hydraulic Structures	2	0	2	3
5.	PE	CEDX 55	Water Power Engineering	3	0	0	3
6.	PE	CEDX 56	Water Distribution Systems	3	0	0	3

#### **SPECIALIZATION VI: TRANSPORTATION ENGINEERING**

Sl. No.	Course Group	Course Code	Course Title	L	T	P	C
1.	PE	CEDX 61	Traffic Engineering	3	0	0	3
2.	PE	CEDX 62	Urban Planning and Design	3	0	0	3

B.Tech.	Civil Engineering			Regulations 2021			
3.	PE	CEDX 63	Intelligent Transportation Systems	3	0	0	3
4.	PE	CEDX 64	Pavement Design	3	0	0	3
5.	PE	CEDX 65	Railway Engineering	2	0	0	2
6.	PE	CEDX 66	Airport planning and Engineering	2	0	0	2
7.	PE	CEDX 67	Docks and Harbour Engineering	1	0	0	1

### SPECIALIZATION VII: SURVEYING & ARCHITECTURE

Sl. No.	Course Group	Course Code	Course Title	L	T	P	C
1.	PE	CEDX 71	GPS and Drone Surveying	3	0	0	3
2.	PE	CEDX 72	Remote Sensing	3	0	0	3
3.	PE	CEDX 73	Spatial Data Modelling and Analysis	3	0	0	3
4.	PE	CEDX 74	Principles of Architecture	3	0	0	3
5.	PE	CEDX 75	Islamic Architecture	3	0	0	3
6.	PE	CEDX 76	Vastu Sastra and Architectural Design	3	0	0	3

### HUMANITIES ELECTIVES – III Semester

Sl. No.	Course Code	Course Title	L	T	P	C
1	SSDX 01	Engineering Economics and Management	3	0	0	3
2	SSDX 02	Sociology of Science and Technology	3	0	0	3
3	SSDX 03	Industrial Economics and Management	3	0	0	3
4	SSDX 04	Dynamics of Indian Social Structure	3	0	0	3

**HUMANITIES ELECTIVES – VI Semester**

Sl. No.	Course Code	Course Title	L	T	P	C
1	SSDX 11	Economics of Sustainable Development	2	0	0	2
2	SSDX 12	Sociology of Industrial Relations.	2	0	0	2
3	SSDX 13	Professional Ethics and Human Values	2	0	0	2
4	SSDX 14	Gender, Technology and Development	2	0	0	2

**PHYSICS ELECTIVES – VI Semester**

Sl. No.	Course Code	Course Title	L	T	P	C
1	PHDX 01	Non Destructive Testing of Materials	2	0	0	2
2	PHDX 02	Materials Science for Engineering	2	0	0	2
3	PHDX 03	Biomaterials	2	0	0	2
4	PHDX 04	Optical Fibre Communication	2	0	0	2
5	PHDX 05	Semiconductor Physics for Information Technology	2	0	0	2
6	PHDX 06	Sensors and Actuators	2	0	0	2
7	PHDX 07	Fundamentals of Nanotechnology and its Applications	2	0	0	2

**CHEMISTRY ELECTIVES – VI Semester**

Sl. No.	Course Code	Course Title	L	T	P	C
1	CHDX 01	Chemistry of Construction Materials	2	0	0	2
2	CHDX 02	Chemistry of Materials and Electrochemical Devices	2	0	0	2
3	CHDX 03	Chemistry and Instrumentation for Electrical And Electronic Applications	2	0	0	2
4	CHDX 04	Functional Materials and Applications	2	0	0	2

B.Tech.	Civil Engineering		Regulations 2021			
5	CHDX 05	Chemistry of Fuels, Combustion and Lubricants	2	0	0	2
6	CHDX 06	Instrumental Methods of Polymer Analysis	2	0	0	2
7	CHDX 07	Medicinal Chemistry	2	0	0	2

**SEMESTER I**

<b>PHD 1183</b>	<b>MECHANICS OF SOLIDS</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 4</b>	(For Civil Engineering)	<b>3</b>	<b>0</b>	<b>2</b>	<b>4</b>

**COURSE OBJECTIVES:**

The objectives of the course are to impart knowledge on

**COB1:** the basic concepts of stresses, strains and deformation due to internal forces

**COB2:** the principal stresses, strains and theories of failure

**COB3:** theory of torsion and stresses and deformation in circular and hollow shafts.

**COB4:** concept of stresses in thin cylinders and spheres with its application.

**COB5:** concept of stresses and strains in thick cylinders

**MODULE I                      PROPERTIES OF MATERIALS                      9**

Introduction – stress - Types of stress – strain – Types of strain – Poisson's ratio –Hooke's Law - Elastic constants and their relationship - Volumetric Strain - Plastic deformation of metals; Tensile test – standards for different material (brittle, quasi-brittle, elastic and ductile) - True stress – strain interpretation of tensile test; and hardness of materials;

**MODULE II                      SIMPLE & COMPOUND STRESSES AND STRAINS                      9**

Deformation of simple and compound bars - Bar with uniform and varying section - Thermal Stresses - Principal Stresses, strain and maximum shear stresses - Mohr's Circle for Plane stress - Principal theories of failure for a member subjected to biaxial stress.

**MODULE III                      TORSION                      9**

Theory of simple torsion – Stresses and deformation in circular and hollow shafts – Stepped shafts – Shafts fixed at both ends – Stresses and deflection of Leaf springs and helical springs.

**MODULE IV                      THIN CYLINDERS AND SPHERES                      9**

Thin Cylinders and Spheres- Derivation of formulae and calculations of hoop stress, longitudinal stress in a cylinder, and sphere subjected to internal pressures.

**MODULE V THICK CYLINDERS****9**

Stresses in Thick cylinders subjected to internal and external pressure and compound cylinders - Stresses and strains in thick spherical shell.

**PRACTICALS**

1. Properties of steel rebar by tension test
2. Determination of hardness of metal by Rockwell and Brinell hardness test.
3. Determination of impact strength of metal by Izod and Charpy method.
4. Investigation of Hooke's Law using timber and steel.
5. Determination of Stiffness and Modulus of rigidity of steel specimen by torsion test.
6. Determination of Stiffness and Modulus of rigidity of open coil spring

**L – 45; P – 30; Total Hours – 75****TEXT BOOKS:**

1. Popov, E.P and Balan, T.A., "Engineering Mechanics of Solids", Pearson India Education Services, 2nd Edition, India, 2018.
2. Stephen Timoshenko, "Strength of Materials: Elementary Theory and Problems", CBS Publishers & Distributors, 3rd Edition, New Delhi, 2004.

**REFERENCES:**

1. Jindal, U.C., "Strength of Materials", Pearson Education, India, 2012
2. Ramamrutham, S and Narayan, S., "Strength of Materials", Dhanpat Rai Publishing Company Pvt. Ltd., New Delhi, 2008.

**COURSE OUTCOMES:**

At the end of the course, the student will be able to

**CO1:** describe stress, strain, elastic constants and their relationship.

**CO2:** determine the principal stresses and strains based on various methods.

**CO3:** develop the torsion equation and solve the problems based on torsion.

**CO4:** determine the stress in thin cylinders and spheres

**CO5:** determine the stress in thick cylinders and spheres

**Board of Studies (BoS) :**

BOS of Physics was held on 21.6.21

SDG 4: Ensuring inclusive and equitable quality education for all persons and promote lifelong learning opportunities.

Statement: The modules and topics mentioned in this course are designed to ensure all inclusive and thorough education with equity to all persons and promote learning opportunities at all times.

<b>CHD 1181</b>	<b>ENGINEERING MATERIALS AND</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>	<b>APPLICATIONS</b>	<b>3</b>	<b>0</b>	<b>2</b>	<b>4</b>

**COURSE OBJECTIVES:**

To make the students conversant with

**COB1:** preparation, properties and applications of various polymers and composites

**COB2:** synthesis, properties and applications of nanomaterials

**COB3:** the basic concepts and different types of catalysts involved in catalytic processes.

**COB4:** basic principles and its applications of certain spectroscopic techniques towards characterization of chemical compounds and concepts of photochemical processes involved in photochemical reactions.

**COB5:** different types of sensors and its applications.

**MODULE I POLYMER AND COMPOSITES 9**

Introduction – classification: source, heat, composition and structure- glass transition temperature – synthesis, properties and applications of polycarbonate, polyurethane, teflon, ABS, kevlar, bakelite, epoxy resin, acrylic polymers (PAN) - biopolymers : importance and applications of biodegradable polymers (PLA, PHBV).

Composites- Introduction - properties and applications: fibre-reinforced plastics (glass, carbon and aramid), ceramic matrix composites (CMC) – bio-composites.

**MODULE II NANOCHEMISTRY 9**

Introduction – classification based on dimension with examples – properties of nanomaterials (surface to volume ratio and size quantisation effect) - synthesis of nanomaterials (Top-down and Bottom-up)– role of capping & reducing agents - CVD (CNT), laser ablation (Ag, Ag<sub>2</sub>O), electrodeposition (semiconductor materials), precipitation (Ag, Au), thermolysis: solvothermal (CuO, CeO<sub>2</sub>) and hydrothermal (TiO<sub>2</sub>, ZnO, carbon dots), microwave method (metal oxide), bio-nanomaterials - biogenic method (synthesis of Ag, Au by plants extracts, bacteria, fungi)

**MODULE III CATALYSIS 9**

Types of catalysis – Criteria for catalysts - catalysis by transition metal ions and their complexes- solid catalyst - metal oxides and zeolites - shape selective

catalysts- mechanism of catalytic action- CO oxidation, NO<sub>x</sub> and SO<sub>x</sub> reduction – Enzyme catalysis-Mechanism of enzyme action- electrocatalysis -green catalyst.

#### **MODULE IV PHOTOCHEMISTRY AND SPECTROSCOPY 9**

Laws of photochemistry – Quantum yield – Jablonski diagram - photophysical processes - photosensitisation – Quenching– chemiluminescence – bioluminescence

Atomic and molecular spectrum – absorption and emission spectrum - Beer Lambert's law – problems and applications – principles and applications: colorimetry, UV -vis spectroscopy (Chromophore- auxochrome, red and blue shift), atomic absorption spectroscopy, IR spectroscopy (finger print region, functional group interpretation)

#### **MODULE V SENSORS 9**

Sensors – types: bio and toxic chemicals sensors- principle, working and applications of Electrochemical sensors: MEMS and NEMS, - Biosensors- construction, working and classification, Advantages - Biochips - touch sensor (oxi and gluco meter) - Advanced sensors:Smoke and gas sensors, humidity sensors, temperature sensor and alcohol sensor.

#### **PRACTICALS**

List of Experiments

1. Preparation of polymers – phenol-HCHO, urea-HCHO, polylactic acid, epoxy resin
2. Determination of molecular weight and degree of polymerization using Oswald's viscometer.
3. Synthesis of nano-ZnO and CuO by precipitation
4. Demonstration of Laser ablation techniques for nanomaterials.
5. Electrochemical synthesis of graphene oxide
6. One-pot synthesis using green catalyst.
7. Green synthesis: Photocatalytic reactions, solvent - free organic reaction - Aldol; green oxidation, green reduction.
8. Diels - Alder reaction in eucalyptus oil (green process).
9. Spectrophotometer iron estimation.(Beer Lambert's law) determination of Fe<sup>3+</sup>
10. FT-IR spectral characterisation (functional group interpretation)

**L – 45; P – 30; Total Hours– 75**

**TEXT BOOKS:**

1. Jain P.C and Renuka Jain, Physical Chemistry for Engineers, Dhanpat Rai and Sons, New Delhi. 2016.
2. G.A. Ozin and A.C. Arsenault, "Nanochemistry: A Chemical Approach to Nanomaterials", RSC Publishing, Thomas Graham House, Cambridge, 2012.
3. B. Viswanathan, S. Sivasanker and A.V. Ramaswamy (Editors), Catalysis: Principles and Applications, Narosa Publishing House, 2002.
4. Gadi Rothenberg, Catalysis: Concepts and Green Applications, WILEY-VCH
5. Nicholas J. Turro, V.Ramamurthy and Juan C. Scaiano, Principles of molecular photochemistry: An introduction, University Science Books, Sausalito, CA, 2009.
6. John Vetelino, Aravind Reghu, Introduction to Sensors By - 2017.

**REFERENCES:**

1. John S. Wilson, Sensor Technology Handbook, Elsevier 2005.

**COURSE OUTCOMES:**

The students will be able to

**CO1:** enumerate and compare the preparation, properties and applications of various types of polymers and composites.

**CO2:** synthesize different type of nanomaterials on a commercial scale based on its size and applications.

**CO3:** apply the concepts of spectroscopic techniques towards spectral interpretation for identification of compounds and explain various photochemical processes in photochemical reactions.

**CO4:** Impart types, characteristics and applications of different types of catalyst.

**CO5:** categorize the sensors and its applications to real time situation.

**Board of Studies (BoS) :**

11<sup>th</sup>BoS of Chemistry held on 17.06.2021

**Academic Council:**

SDG 9 : Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation

The holistic understanding of materials and technology leads to sustainable industrialization

Linear equations of second order with constant and variable coefficients –  
Simultaneous first order linear equations with constant coefficients –  
homogeneous equations of Euler's type – method of undetermined  
coefficients- method of variation of parameters

**L – 45; T – 15; Total Hours– 60**

5. James Stewart , " Calculus" 7th edition, Brooks/Cole Cengagelearning, UK

**COURSE OUTCOMES:**

At the end of the course students will be able to

**CO1:** use the matrix algebra methods for finding eigenvalues, eigenvectors and diagonalization

**CO2:** solve equations using the relations between roots and coefficients

**CO3:** apply differential calculus in various engineering problems

**CO4:** able to use differential calculus on several variable functions

**CO5:** solve various types of differential equations that arise in many applications

**Board of Studies (BoS) :**

12<sup>th</sup> BOS of Mathematics & AS held on

**Note:** L - Low Correlation    M - Medium Correlation    H - High Correlation

SDG 4: Ensure inclusive and equitable quality education and promote lifelong opportunities for all

Learning of various mathematical techniques like matrices and calculus will lead to knowledge of applications in Engineering problems

<b>GED 1101</b>	<b>ENGINEERING GRAPHICS</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>		<b>2</b>	<b>0</b>	<b>2</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To introduce the basic concepts of engineering drawing, and familiarize with conic sections, special curves and orthographic projection of points and straight lines

**COB2:** To get practical exposure on projection of planes and solids

**COB3:** To be familiar with sectioning of solids, and development of surfaces

**COB4:** To conversant with 3D isometric projection, and perspective projection of simple solids

**COB5:** To introduce computerized drafting using CADD for drawing the orthographic views of simple solids

<b>MODULE I</b>	<b>BASICS, ENGINEERING CURVES AND ORTHOGRAPHIC PROJECTION OF POINTS AND STRAIGHT LINES</b>	<b>L: 7</b>
		<b>P: 7</b>

Drawing instruments, dimensioning, BIS conventions, types of lines, simple geometric constructions.

Conic sections: ellipse, parabola, hyperbola. Special curves: cycloid, epicycloid, hypocycloid and involutes.

Orthographic projection – first angle, second angle, third angle and fourth angle projections. Orthographic projection of points in all quadrants. Projection of straight lines in first quadrant – true length and true inclinations –traces of straight line.

<b>MODULE II</b>	<b>PROJECTION OF PLANES AND SOLIDS</b>	<b>L: 7</b>
		<b>P: 7</b>

Projection of plane lamina in first quadrant and its traces

Projection of solids in first quadrant: Axis inclined to one reference plane only- prism, pyramid, cone, and cylinder – change of position method

<b>MODULE III</b>	<b>SECTION OF SOLIDS AND DEVELOPMENT OF SURFACES</b>	<b>L:5</b>
		<b>P:5</b>

Section of solids: prism, pyramid, cone and cylinder– sectional view – true shape of section- cutting simple position solids - plane inclined to one reference plane only.

Development of surface of truncated solids: prism, pyramid, cone and cylinder – frustum of cone, pyramid and simple sheet metal parts.

**MODULE IV THREE DIMENSIONAL PROJECTIONS L:4  
P: 4**

Isometric projection: Isometric scale – isometric axes- Isometric projection and view of prism, pyramid, cylinder, cone and frustums.

Perspective projection: station point – vanishing point – Perspective projection and views of prism, pyramid by Visual ray method.

**MODULE V ORTHOGRAPHIC PROJECTION USING CADD L:7  
P:7**

Introduction to CADD - Basic commands for sketching - Editing sketches - creating texts and tables - Basic dimensioning and editing dimensions - Sketching orthographic views of simple solids and machine parts as per first angle projection - Plotting drawings.

**L – 30; P – 30; Total Hours– 60**

**TEXT BOOKS:**

1. N.D. Bhatt, “Engineering Drawing”, Charotar Publishing house, 53<sup>rd</sup> Edition, 2014.
2. Venugopal. K, and V. Prabhu Raja, “Engineering Graphics”, New Age International (P) Ltd., Publication, Chennai, Edition 15, 2017.

4. AutoCAD Software Theory and User Manuals
5. Engineering graphics You tube Lecture videos link:  
<https://www.youtube.com/user/BSAUNIV/videos>

**COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:** identify the specifications and standards of technical drawing and draw conic sections, special curves and orthographic projection of points and straight lines

**CO2:** apply the concept of orthographic projection to draw the orthographic views of plane figures and simple solids

**CO3:** draw the sections of solids and development of solid surfaces

**CO4:** apply the concept of isometric and perspective projection to draw the 3-D views of simple solids

**CO5:** draw the orthographic views of simple objects using drafting software

**Board of Studies (BoS):**

18<sup>th</sup>BoS of MECH held on 21.06.2021

**Academic Council:**

17<sup>th</sup> AC held on 15.07.2021

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO 10	PO 11	PO 12	PSO 1	PSO 2

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The various industrial standards of technical drawing and the application of orthographic projections to draw simple solids helps to innovate a new design for sustainable industrialization

<b>GED 1102</b>	<b>ENGINEERING DESIGN</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG:9</b>		<b>2</b>	<b>0</b>	<b>0</b>	<b>2</b>

**COURSE OBJECTIVES:**

**COB1:** To learn the basic concepts of design in engineering

**COB2:** To study the basic design thinking principles in problem solving

**COB3:** To encourage the students to develop a prototype using design concepts

**COB4:** To introduce the role of innovation in engineering

**MODULE I INTRODUCTION TO DESIGN 08**

Introduction to Engineering design – Design thinking – Problem identification - Design of Product, Process, System and Software – Case studies on Product, Process, Systems and Software design.

**MODULE II DESIGN THINKING PROCESS 08**

Empathy – Ideate - Need analysis - Voice of customers - product specification - concept generation - Bench marking - Quality function deployment - Concept evaluation - Case studies

**MODULE III PROTOTYPE DESIGN 07**

Product form and function – High level design – Design detailing - Sketch models – Prototypes - 3D printing - Case studies.

**MODULE IV INNOVATION 07**

Creativity and innovation – Role of innovation in Engineering – incremental changes and systemic changes; scientific approach to driving innovation – Intellectual property rights - case studies on innovative products.

**L – 30; Total Hours– 30**

**TEXT BOOKS:**

4. Cliff Matthews, "Case Studies in Engineering Design", John Wiley & Sons Pvt. Ltd, New York, 1998.

**COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:** explain the basic concepts of design in engineering products / process / service

**CO2:** analyse the problems and perform design thinking process

**CO3:** correlate the basic principles of design thinking to solve engineering problems and develop prototypes

**CO4:** apply innovative approaches to engineering problems and provide design solutions

**Board of Studies (BoS):**

18<sup>th</sup>BoS of MECH held on 21.06.2021

**Academic Council:**

17<sup>th</sup> AC held on 15.07.2021

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The holistic understanding of basic knowledge in Engineering design and its process in the development of prototypes results in satisfying industrial challenges.

<b>GED 1103</b>	<b>MANUFACTURING PRACTICES</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>	<b>LABORATORY</b>	<b>0</b>	<b>0</b>	<b>2</b>	<b>1</b>

### **COURSE OBJECTIVES:**

**COB1:** To learn the basics of pipe connections used in household and industrial systems

**COB2:** To educate the usage of welding equipment's and machining methods

**COB3:** To impart knowledge on sand mould preparation for simple components

**COB4:** To explore various tools, instruments and methods used in electrical wiring

**COB5:** To impart knowledge on Design, assembly and testing of electronic circuits

### **PRACTICALS**

List of Experiments:

#### **CIVIL ENGINEERING PRACTICE:**

1. Study of plumbing in general household and industrial systems: Basic pipe connections – Mixed pipe material connection – Pipe connections with different joining components.
2. Making a small window frame with Lap and Mortise & Tenon Joints by sawing planing and cutting.
3. Introduction to power tools

#### **MECHANICAL ENGINEERING PRACTICE:**

1. Fabrication of a small Table frame with Butt, Lap and Fillet Joints using Arc Welding - Gas cutting (Demo)
2. Machining of a component using simple turning and drilling practices.
3. Foundry operations such as sand mold preparation for simple component.
4. Plastic Component Manufacturing (Demo on Injection / Blow moulding)

#### **ELECTRICAL ENGINEERING PRACTICE:**

1. Comparison of incandescent, fluorescent, CFL and LED lamps.
2. Domestic, staircase and go down wiring.
3. Measurement of earth resistance.
4. Study of protection devices (small relay, fuse, MCB, HRC, MCCB, ECCB).

5. Familiarization of household electrical gadgets (Iron Box, Wet Grinder).
6. Study of inverter fed UPS/Emergency lamp

#### **ELECTRONICS ENGINEERING PRACTICE:**

1. Identifications and symbolic representation of active and passive electronic components
2. Soldering and tracing of electronic circuits and checking its continuity
3. Design and testing of electronic circuits using active and passive electronic components

**P – 30; TOTAL HOURS– 30**

#### **TEXT BOOK:**

1. S.Gowri and T.Jeyapooan, "Engineering Practices Lab Manual – Civil, Mechanical, Electrical, Electronics included", Vikas Publishing, 5<sup>th</sup> Edition, 2019.

2. Raghbir Singh Khandpur, "Printed Circuit Boards: Design, Fabrication, and Assembly", Tata McGraw-Hill Education, 2005.

#### **COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:** demonstrate Plumbing requirements of domestic buildings.

**CO2:** use welding equipment's to join the structures and to carry out machining operations

**CO3:** perform the task of making sand mould for simple components

**CO4:** execute simple electrical wiring and comprehend the construction and working of household appliances.

**CO5:** assemble and test simple electronic circuits used in day-to-day life

#### **Board of Studies (BoS):**

18<sup>th</sup>BoS of MECH held on 21.06.2021

#### **Academic Council:**

17<sup>th</sup> AC held on 15.07.2021

**Note:** L - Low Correlation    M - Medium Correlation    H - High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The holistic understanding of welding, moulding, machining, wiring and electronic circuit increases the access of small-scale industrial and other enterprises in developing countries.

<b>GED 1104</b>	<b>PROGRAMMING FOR</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 8</b>	<b>PROBLEM SOLVING</b>	<b>1</b>	<b>0</b>	<b>2</b>	<b>2</b>

**COURSE OBJECTIVES:**

**COB1:** To explore the hardware and software components of the computer

**COB2:** To learn the structured and procedural programming concepts using C.

**COB3:** To study the constructs of decision making in branching and iteration statements

**COB4:** To learn Functions for effective reusability and readability of the code.

**COB5:** To understand pointer and file operation concepts.

**MODULE I INTRODUCTION TO C PROGRAMMING 05**

Introduction to components of a computer system: disks, primary and secondary memory, processor, operating system, system software, compilers, creating, compiling and executing a program, Introduction to Algorithms: steps to solve logical and numerical problems. Representation of Algorithm, Flowchart/Pseudo code with examples, Program design and structured programming - Structure of C - C Tokens – Data Types – Declaration of Variables and Storage class – Operators – Expressions - Type Conversion.

**MODULE II DECISION MAKING AND ARRAY 05**

Decision Making and Branching: Simple if Statements, The if..else statements, Nesting of if..else statements, else...if Ladder, switch Statements, goto Statements, Looping: while, do...while, for Statements, Array: One-Dimensional, Two-Dimensional and Multi-Dimensional operations.

**MODULE III USER-DEFINED FUNCTIONS AND FILE OPERATIONS 05**

Definition of Functions - Function Types – Nesting of Functions – Recursion – Structures and Unions – Pointers - File handing operations.

**PRACTICALS****LIST OF PROGRAMS IN C:**

1. Computer organization –Hardware in a typical computer  
Identification – Booting error messages and what it means
2. Structure of a basic program - Hello world program
3. Data types and Type conversions
4. Input / Output: Formatted functions – Unformatted functions – Library functions
5. Properties of operators – Priority of operators – Arithmetic relational logical and bitwise operators
6. Conditional Statements: If – if else- nested if else- goto- switch case – nested switch case
7. Iteration Statements: for loops – nested for loops – while loop – do-while loop – break and continue statement
8. I/O operations of one- and two-dimensional arrays
9. Bubble Sort and Linear Search using arrays.
10. Functions and its types, Recursion Function
11. Pointers
12. File Operations

**L – 15; P – 30; Total Hours– 45**

**TEXT BOOKS:**

1. Richard L. Stegman, "Focus on Fundamentals of Programming with C", Ninth Edition, ISBN -170077395X, 9781700773951, 2019.

4. Paul J. Deitel, Deitel & Associates, "C How to Program", Pearson Education, 7th Edition, ISBN-13: 978-0132990448, 2012.

**COURSE OUTCOMES:**

Students who complete this course will be able to

**CO1:** identify the hardware components and describe the software components of computer.

**CO2:** bring out the importance of structural and procedural programming

**CO3:** write C coding using conditional and iteration statements

**CO4:** develop programs using Functions, Pointers and Files

**CO5:** implement program to build a real time application.

**Board of Studies (BoS) :**

**Note:** L - Low Correlation    M - Medium Correlation    H - High Correlation

SDG 8: Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all

Statement: The students can have productive employment and decent work by learning this computer fundamentals and programming course.

**SEMESTER II**

<b>END 1181</b>	<b>ENGLISH FOR ENGINEERS</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 4</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To train students to use appropriate vocabulary in academic and technical contexts

**COB2:** To facilitate students to speak effectively while exchanging ideas and making presentations

**COB3:** To develop students' listening skill for comprehending and analysing information

**COB4:** To develop their reading skill through sub skills like skimming, scanning and critical reading of a text

**COB5:** To sharpen their academic writing skills

**COB6:** To expose them to the correct usage of language and help them to apply that knowledge appropriately

**MODULE I HUMAN RESOURCES 10**

L: Listening to short texts – short formal & informal conversations.

S: Introducing one self – exchanging personal info.

R: Process of reading purposes, Reading comprehension, improving comprehension skills, Reading activities – short comprehension passages, practice in skimming & scanning.

W: Scientific & Technical Writing, Editing skills, Activities – completing sentences, developing hints - Paragraph Writing

Voc. development: Prefixes, Suffixes

Lang. development: Articles, Countable and Uncountable nouns, Present tense, Wh – Questions, Yes or No questions.

**MODULE II TRANSPORT 10**

L: Listening to long scientific talks

S: Sharing personal information – greeting, leave taking.

R: Comprehension passages with multiple choice questions / Wh-questions/ openended questions - Reading longer technical texts & completing exercises based on them.

W: Use of reference words & discourse markers on a text, jumbled sentences, describing a process – flow chart, use of sequence words.

Voc. development: Guessing meanings of words in context, vocabulary used in formal letters, e-mails & reports.

Lang. development: Preposition of Time, Place & Date, Past tense, Conjunctions, Impersonal passive voice, Question tags, Numerical Adjectives.

### **MODULE III ENERGY 9**

L: Listening to talk on the topic & completing tasks.

S: Asking about routine actions & expressing opinions.

R: Locating Specific Information

W: Letter seeking permission for Industrial Visit / symposium – Letter of invitation

Voc. development: Sequence words, misspelt words.

Lang. development: Adverbs, Degrees of comparison, Future tense, Homophones

### **MODULE IV OUR LIVING ENVIRONMENT 8**

L: Listening to scientific texts & making notes – Effective ways of making notes.

S: Speaking about one's friend.

R: Reading texts & magazines for detailed comprehension. (Students can be asked to read any book of their choice to encourage reading habit)

W: Argumentative writing.

Voc. Development: Synonyms, antonyms, phrasal verbs.

Lang. development: If clauses, Subject - Verb Agreement

### **MODULE V TECHNOLOGY 8**

L: Listening to talks (General & Scientific).

S: Short group conversations.

R: Reading and understanding technical articles, Short narratives & articles from Newspaper including conversations.

W: Short essays, Dialogue writing.

Voc. Development: Idioms & Phrases.

Lang. development: Modal verbs.

**L – 45; TOTAL HOURS– 45**

#### **TEXT BOOKS:**

1. Board of Editors. Using English A Coursebook for Undergraduate Engineers and Technologists. Orient BlackSwan Limited, Hyderabad: 2015

2. Richards, C. Jack. Interchange Students' Book-2 New Delhi: CUP, 2015.

### COURSE OUTCOMES:

**CO1:**Read articles of a general kind in magazines and newspapers

**CO2:**Participate effectively in conversations, introduce themselves and their friends and express opinions in English

**CO3:**Comprehend conversations and short talks delivered in English

**CO4:**Write short essays of a general kind and letters and emails in English

**CO5:** Express through speaking and writing using appropriate vocabulary and grammar

### Board of Studies (BoS) :

13<sup>th</sup>BoS of Department of English  
held on 17.6.2021

### Academic Council:

17<sup>th</sup> AC held on 15.07.2021

SDG No. 4: Give Quality Education to all the Engineers

Statement: In future, substantially increase the number of youth and adults who have relevant skills, including technical and vocational skills, for employment, decent jobs and entrepreneurship.

<b>MAD 1281</b>	<b>ADVANCED</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 4</b>	<b>CALCULUS</b>	<b>3</b>	<b>1</b>	<b>0</b>	<b>4</b>

**COURSE OBJECTIVES:**

**COB1:** To acquaint in the students in solving problems using multiple integrals

**COB2:** To acquire knowledge in vector calculus which is significantly used in engineering problems

**COB3:** To learn about the analytic functions and their mapping properties

**COB4:** To know complex integration using Cauchy's theorems.

**COB5:** To introduce techniques and engineering applications of Laplace Transforms

**MODULE I                      MULTIPLE INTEGRATION                      9+3**

Multiple integrals– Cartesian and Polar coordinates – Change of order of integration – Beta and Gamma functions – Properties and applications- Multiple integrals to compute area and volume

**MODULE II                      VECTOR CALCULUS                      9+3**

Gradient and directional derivative – Divergence and Curl – Irrotational and Solenoidal vector fields–Line, surface and volume integrals – Green's Theorem, Gauss Divergence Theorem and Stokes Theorem (statement only) – verification and evaluation of integrals

**MODULE III                      COMPLEX DIFFERENTIATION                      9+3**

Analytic function - Necessary and Sufficient condition for analyticity – Cauchy-Riemann equations in polar coordinates - properties of analytic function – determination of analytic function – conformal mapping ( $w = z+a$ ,  $az$  and  $1/z$ ) and bilinear transformation

**MODULE IV                      COMPLEX INTEGRATION                      9+3**

Cauchy's integral theorem – Cauchy's integral formula – Taylor's series and Laurent's series expansion – singularities - classification – residues - Cauchy's residue theorem – contour integration – Unit circle and semi circular contours (excluding poles on the real axis)

**MODULE V                      LAPLACE TRANSFORMS                      9+3**

Introduction to Laplace transform - Existence of Laplace Transform - Properties of Laplace Transforms - Initial & Final Value Theorems - Inverse Laplace Transform - Convolution Theorem – Circuits to signal square wave: Integral equations with unrepeated complex factors – Damped forced vibrations: repeated complex factors – Resonance - Solution of differential equations

**L – 45; T - 15; Total Hours– 60**

**TEXT BOOKS:**

1. Ramana, B.V, “Higher Engineering Mathematics” Tata McGraw Hill Publishing Co. New Delhi, 2010.
2. Grewal B.S., “Higher Engineering Mathematics” 44th edition, Khanna Publishers, New Delhi, 2017.
3. Kreyszig, E., “Advanced Engineering Mathematics”, 10th edition, John Wiley and Sons (Asia) Pvt Ltd., Singapore, 2011

**REFERENCES:**

1. Jain, R.K. & Iyengar, S. R. K., “Advanced Engineering Mathematics”, Narosa Publishers, 5<sup>th</sup> edition, 2016.
2. Peter V. O’Neil, “Advanced Engineering Mathematics”, 7th edition, Cengage Learning, 2011.
3. Venkataraman, M.K., “Engineering Mathematics”, Volume I, 2nd edition, National Publishing Co., Chennai, 2003.
4. James Stewart ,“ Calculus” 7th edition, Brooks/Cole Cengagelearning, UK

**COURSE OUTCOMES:**

At the end of the course students will be able to

**CO1:** compute the area and volume using multiple integrals

**CO2:** calculate vector identities and apply Gauss, Stokes and Greens theorems to simplify calculations of integrals

**CO3:** verify analyticity, conformity and bilinearity of complex functions

**CO4:** evaluate integrals using the Cauchy’s integral and formula and residue theorem

**CO5:** solve ordinary differential equations using Laplace transforms

**Board of Studies (BoS) :**

12<sup>th</sup> BOS of Mathematics & AS held on  
23.06.2021

**Academic Council:**

17<sup>th</sup> AC held on  
15.07.2021

SDG 4: Ensure inclusive and equitable quality education and promote lifelong opportunities for all

Learning of various mathematical techniques like Integration and Vector Calculus will lead to knowledge of applications in Civil Engineering

<b>GED 1202</b>	<b>BASIC ELECTRICAL AND</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 3, 5, 8, 12</b>	<b>ELECTRONICS</b>	<b>3</b>	<b>0</b>	<b>2</b>	<b>4</b>
	<b>ENGINEERING</b>				

**COURSE OBJECTIVES:**

**COB1:** To make the students understand the basic calculations and measurements in DC circuits.

**COB2:** To provide the basic knowledge on AC circuit calculations and measurements.

**COB3:** To familiarize with working and characteristics of different DC and AC machines.

**COB4:** To impart knowledge on basic semiconductor devices and their applications.

**COB5:** To introduce the students to fundamentals of digital electronics.

**MODULE I DC CIRCUITS & MEASUREMENTS 12**

The concept of voltage and current-Electric circuit elements: R, L, C – Independent and dependent sources - Ohm's law- Kirchoff's law- series and parallel resistive circuits – Voltage and current division – Star-delta transformation - Mesh and nodal analysis of resistive circuits – simple problems - Measurement of voltage, current and power in DC circuits.

**MODULE II AC CIRCUITS & MEASUREMENTS 17**

Sinusoidal voltage - RMS, average, peak value, peak factor and form factor - single phase RL, RC and RLC circuits – phasor representation - complex power – power factor - simple problems - Resonance in RLC circuits – 3 phase balanced circuit calculations– star and delta connections - Principles of measurement of AC voltage, current, power and energy - Measurement of three phase power.

**MODULE III ELECTRICAL MACHINES 18**

Construction, principle of operation, basic equations, characteristics and applications of DC generators, DC motors, single phase transformers and three phase induction motors. Working principle of BLDC Motor and its applications in home appliances. (Qualitative treatment only).

**MODULE IV SEMICONDUCTOR DEVICES AND APPLICATIONS 14**

Introduction to semiconductors - Characteristics of PN Junction Diode – Zener Diode and its characteristics – SCR and its characteristics — Bipolar Junction Transistor and its characteristics – JFET & MOSFET – their characteristics. Applications: Half wave and full wave rectifiers - Voltage Regulation – Regulator ICs.

## **MODULE V INTRODUCTION TO DIGITAL CIRCUITS 14**

Logic gates- Boolean algebra theorems– K Map-Introduction to combinational circuits– Flip-Flops – Registers– A/D and D/A Conversion–Data acquisition systems

### **PRACTICALS**

List of Experiments

1. Verification of KCL and KVL (ii) Measurement of voltage, current and power in DC circuits.
2. (i) Resonance of RLC series circuit  
(ii) Measurement of voltage, current, power and power factor in single phase & three phase AC circuits.
3. (i) Magnetization characteristics of DC generator  
(ii) Characteristics of DC shunt motor, single phase transformer and three phase induction motor.
4. Fabrication of a low voltage regulated power supply.
5. Implementation of half and full adders.

**L – 45; P – 30; Total Hours– 75**

### **REFERENCES:**

8. Thomas L. Floyd, "Digital Fundamentals", 10th Edition Pearson Education Inc., New Delhi, 2008.

**COURSE OUTCOMES:**

At the end of this course, the student will be able to:

**CO1:** perform the basic calculations in DC circuits and measure the various quantities associated with DC circuits.

**CO2:** measure and compute the rms current and voltage, power, power factor and energy in AC circuits.

**CO3:** choose appropriate motor for specific applications based on the motor characteristics.

**CO4:** fabricate a regulated power supply for low voltage applications and build static switches using BJT and SCR.

**CO5:** build simple digital circuits like half adder and full adder.

**Board of Studies (BoS) :**

15th meeting of BoS of EEE held on  
25.06.2021

**Academic Council:**

17<sup>th</sup> AC held on

SDG 3: Good health and well being.

Statement: Understanding of the fundamentals of electrical and electronics systems can help in designing systems to promote good health and well being.

SDG 5: Gender equality

Statement: Acquiring the interdisciplinary knowledge help overcome the gender barriers in work place.

SDG 8: Decent work and economic

Statement: The learners of this course can get decent work and earn financial benefits and they can work in interdisciplinary areas.

SDG 12: Responsible consumption and production.

Statement: Use of right and energy efficient electric and electronic components and devices results in reasonable consumption and production.

<b>GED 1201</b>	<b>ENGINEERING MECHANICS</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>		<b>3</b>	<b>1</b>	<b>0</b>	<b>4</b>

**COURSE OBJECTIVES:**

**COB1:**To impart knowledge about the basic laws of mechanics, resolution of forces, equilibrium of particles in 2D and 3D force systems.

**COB2:** To learn about supports, reactions and equilibrium of rigid bodies

**COB3:**To educate surface properties such as centroid and moment of inertia

**COB4:**To impart knowledge on friction and its applications

**COB5:**To study the laws of motion, impulse, momentum and elastic bodies

**MODULE I VECTOR APPROACH AND EQUILIBRIUM OF PARTICLE L: 11 T: 3**

Introduction - Vectors – Vectorial representation of forces and moments – Vector Algebra and its Physical relevance in Mechanics – Laws of Mechanics – Parallelogram and triangular Law of forces- Coplanar Forces Principle of transmissibility, Resolution and Composition of forces- Forces in plane and space - Lamé's theorem - Equilibrium of a particle in 2D plane - Equilibrium of a particle in 3D space - Equivalent systems of forces – Single equivalent force

**MODULE II EQUILIBRIUM OF RIGID BODY L: 7 T: 3**

Free body diagram – Types of supports and their reactions – requirements of stable equilibrium – Moments and Couples – Moment of a force about a point and about an axis –Vectorial representation of moments and couples – Scalar components of a moment –Varignon's theorem - Equilibrium of Rigid bodies in two dimensions –Examples

**MODULE III PROPERTIES OF SURFACES L:10 T:3**

Determination of Areas – First moment of area and the Centroid of sections – Rectangle, circle, triangle from integration – T section, I section, Angle section, Hollow section using standard formula – second and product moments of plane area – Physical relevance - Standard sections: Rectangle, triangle, circle-composite sections, Hollow section using standard formula – Parallel axis theorem and perpendicular axis theorem – Polar moment of inertia

**MODULE IV FRICTION L:9**

**T:3**

Introduction to friction- types of friction- Laws of Coloumb friction- Frictional force – simple contact friction –Block friction– Rolling resistance –ladder friction and wedge friction

**MODULE V LAWS OF MOTION****L:8****T:3**

Review of laws of motion – Newton’s second law – D’Alembert’s principle and its applications in plane motion; Work Energy Equation of particles– Impulse and Momentum – Impact of elastic bodies.

**L – 45; T – 15; Total Hours– 60****TEXT BOOKS:**

1. Beer, F.P and Johnston Jr. E.R, “Vector Mechanics for Engineers”, McGraw Hill Education, 10<sup>th</sup> Edition, 2017.
2. R.K. Bansal., “A Text Book of Engineering Mechanics”, Laxmi Publications, 6<sup>th</sup> Edition, 2015.

**REFERENCES:**

3. R.S. Khurmi., “A Text Book of Engineering Mechanics”, S. Chand Publishing, 22<sup>nd</sup> Edition, 2018.

**COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:** resolve composite forces, apply concept of equilibrium to particles and solve problems

**CO2:** apply the concept of equilibrium to rigid bodies and solve problems

**CO3:** determine the properties of surfaces

**CO4:** analyse and evaluate the frictional forces between the bodies

**CO5:** apply the laws of motion in solving dynamics problems

**Board of Studies (BoS):**

18<sup>th</sup> BOS held on 21.06.2021

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The understanding of force systems and its components leads to construction of robust engineering systems.

<b>CED 1201</b>	<b>BUILDING CONSTRUCTION</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>	<b>AND PRACTICES</b>	<b>2</b>	<b>0</b>	<b>2</b>	<b>3</b>

**COURSE OBJECTIVES:**

The main objective of this course is to impart knowledge on

**COB1:** various construction materials such as stone, brick, cement, steel etc with respect to type, mechanical properties and applications in industry.

**COB2:** allied construction materials used in construction and their properties & application areas.

**COB3:** requirements of various components of buildings and types of structures

**COB4:** various basic construction practices such as mixing, joints in masonry and plastering and pointing

**MODULE I BASIC CONSTRUCTION MATERIALS 7**

Physical and mechanical properties of construction materials – Bricks, Stones and cement : Manufacturing process, properties and testing methods. Sand, coarse aggregate and steel – Properties and testing methods.

**MODULE II ALLIED CONSTRUCTION MATERIALS 8**

Tiles, refractory lining materials, Bitumen and asphaltic materials, Timber, Glass and Plastics, Metals for cladding, Paints and varnishes, Acoustic material, geo-textiles, rubber and asbestos, laminates and adhesives, Graphene, Fibre reinforced plastics, carbon composites and other engineering materials : Salient properties and application areas.

**MODULE III OVERVIEW OF BUILDING PROCESS AND 7 COMPONENTS**

Overview of building process - elements of a building - basic requirements of a building - planning for orientation and energy efficiency.

Types of structures: Load Bearing, framed, steel and composite structures.

Foundation: Safe bearing capacity of soil, Functions and requirements of good foundation, types of foundation. Walls: Types of walls - load bearing, partition walls and cavity walls.

Doors, Windows and Ventilators - Materials and types. Floors: Category, types of flooring materials and application. Roof: Types, materials and application areas. Lintels and arches, Staircase - types.

**MODULE IV BASIC CONSTRUCTION PRACTICE 8**

Masonry - Definition and terms used in masonry - Mortar – Ingredients – Mixing – Grades. Brick masonry - characteristics and requirements of good brick masonry - Types of Bonds in brick work - Stone masonry - Joints in masonry.

Plastering and Pointing - purpose, materials and methods of plastering and pointing - defects in plastering- types - Painting - Purpose, types, ingredients and defects

**PRACTICALS**

1. Tests on cement: Fineness test, initial and final setting time, standard consistency, specific gravity.
2. Tests on fine aggregate: Particle size distribution using sieves, Specific gravity, bulking and water absorption of Fine aggregate.
3. Tests on coarse aggregate: Particle size distribution using sieves, Specific gravity, water absorption of coarse aggregate.
4. Test on Glass Material
5. Test on Tile
6. Test on Bricks – Water absorption, Efflorescence, Compressive Strength
7. Demonstrate the bonds used in brick Masonary
8. Plastering Process – Demo – Site Visit
9. Making model for Building Components
10. Painting – Exercise - Demo – Site Visit

**L – 30; P – 30; Total Hours– 60**

**TEXT BOOKS:**

3. S.S. Bhavikatti., "Basic Civil Engineering', New Age International (P) Limited, New Delhi, 2010

**COURSE OUTCOMES:**

On completion of the course the student will be able to

**CO1:** select the type of cement, and stones to be used based on the properties and application.

**CO2:** explain the properties and types of timber, bitumen, steel, aluminum, polymers and composites.

**CO3:** identify the different components in a building and its functions

**CO4:** apply the construction practices to be followed in the site

**Board of Studies (BoS) :**

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation

The Holistic understanding of building materials and components leads to construction of resilient infrastructure and sustainable development

<b>CED 1202</b>	<b>SURVEYING</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 11</b>		<b>3</b>	<b>0</b>	<b>2</b>	<b>4</b>

**COURSE OBJECTIVES:**

The objectives of the course are to impart knowledge on

**COB1:** basic concepts of surveying and to differentiate map and plan

**COB2:** the concept of linear measurement and angular measurement using compass and theodolite.

**COB3:** the concept of leveling using dumpy level and properties of contours.

**COB4:** the methods of plane tabling and solving triangulation and trilateration problems.

**COB5:** the usage of total station for the measurement of angles and distances and the concepts of engineering surveys and set out works.

**MODULE I INTRODUCTION TO SURVEYING 7**

Basic definitions, objectives, divisions and Importance of surveying to Engineers; Plane and geodetic surveys; principles of Surveying; Output of survey, Maps, Plans, Scales.

**MODULE II LINEAR AND ANGULAR MEASUREMENTS 10**

Direct and indirect methods of linear measurement; Obstacles in chaining and ranging, errors and corrections, Angular Measurements – Types of compass, basic definitions - meridians, local attraction, Theodolite - different types and their salient parts, Temporary and permanent adjustments, Methods of repetition and reiteration.

**MODULE III LEVELING AND CONTOURING 10**

Basic Definitions, Curvature & Refraction, Level, Types and salient parts, working principle, Temporary and Permanent Adjustments, Leveling Staff, Methods of leveling - Differential leveling and field book note, Reciprocal Leveling; Profile leveling; Trigonometric leveling, Errors & Mistakes in leveling, Contouring - definition, characteristics, methods and applications.

**MODULE IV TRAVERSING, TRIANGULATION AND TRILATERATION 10**

Plane Tabling - Merits and demerits, accessories; methods of plane tabling; Traversing – open traverse, closed traverse, closing error, Triangulation and Trilateration – Purpose and classification of each; Horizontal and vertical control methods, Triangulation network, fieldwork, selection of stations, measurements

and computations. Heights and distances - Tacheometry- Introduction, Basic definitions, Methods, fundamental principles; Stadia system and Tangential system, methods.

## **MODULE V TOTAL STATION AND ENGINEERING SURVEYS 8**

Total Station - Working Principle, sources of errors in total station and types of total station instruments, advantages of total station, Engineering Surveys - General requirements and specifications for engineering project surveys; Reconnaissance, preliminary, location survey and surveys for highway, railway - Setting out works for buildings and simple circular curves – Applications of LIDAR.

### **PRACTICALS**

#### **List of Experiments:**

1. Demonstration of various surveying instruments
2. Leveling - Longitudinal sectioning and Cross sectioning
3. Theodolite surveying - Measurement of horizontal angle and vertical angle by direct method.
4. Theodolite surveying - Measurement of horizontal angle by repetition and reiteration method.
5. Tacheometric surveying – Stadia method and Tangential method
6. Total station surveying - Measurement of distances - Single plane Method
7. Total station surveying - Measurement of distances - Double plane Method
8. Total station surveying - Determination of area of the field by triangulation method.
9. Setting out works - Foundation Marking
10. Setting out curves – Simple circular curve.
11. Determination of location of a point using GPS.

**L – 45; P – 30; Total Hours– 75**

#### **TEXT BOOKS:**

3. James M. Anderson and Edward M. Mikhail, "Introduction to Surveying", 7<sup>th</sup> Edition, McGraw Hill, 2015.
4. <https://civilingineeringnotes.com/surveying/>

**COURSE OUTCOMES:**

After completion of the course, the students will be able to

**CO1:** differentiate between map and plan, to know the different principles of surveying.

**CO2:** categorize the linear and angular measurements with the help of compass and theodolite.

**CO3:** determine the elevation of points and generate the surfaces of a given terrain.

**CO4:** apply the triangulation, traversing concepts in tacheometric surveying to compute heights and distances.

**CO5:** explore the total station surveying and set out curves to prepare preliminary and location survey for engineering projects.

**Board of Studies (BoS) :**

SDG 11: Make cities inclusive, safe, resilient and sustainable.

Statement:

The gained knowledge leads to create, manage and geo-enable all the city assets and to digitally map the city to plan for safety, security, equality and inclusiveness.

<b>CED 1203</b>	<b>CIVIL ENGINEERING DRAWING</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>		<b>0</b>	<b>0</b>	<b>2</b>	<b>1</b>

**COURSE OBJECTIVES:**

The objectives of this course are to impart knowledge on

**COB1:** the fundamentals of building drawing.

**COB2:** the basic principles of building drawing

**COB3:** the different views of a residential building

**COB4:** various structural drawing related to RCC and steel structure.

**PRACTICALS**

List of Experiments:

1. To learn the various building component – substructure, super structure – site plan, plinth area
2. To learn the various conventional sign and symbols
3. To learn the various commands in Auto CAD drawing
4. To draw the plan of a residential building
5. To draw the elevation of a residential building
6. To draw the section of a residential building
7. To draw the beam column position
8. To draw the various types of foundation
9. To draw the various types of a inclined roof trusses
10. To draw the service plan for plumbing lines
11. To draw the service plan for electrical lines
12. To draw the 3D view of a building

**P – 30; Total Hours– 30**

**TEXT BOOKS:**

1. Venugopal, K., “Engineering Drawing And Graphics”, 5<sup>th</sup> Edition, New Age International (P) Ltd., New Delhi, 2011.
2. Gurcharan Singh, “Civil Engineering Drawing”, Standard Publishers and Distributors, 2009.

3. Shah, M.G., Kale, C.M., Patki, S.Y., “Building Drawing: With an Integrated Approach to Built Environment”, Tata McGraw-Hill Publishing Company (P) Ltd., New Delhi, 2002.

### COURSE OUTCOMES:

After completion of the course students will be able to

**CO1:** identify the sign and symbols as per B.I.S. and develop a simple House plan and their sectional views.

**CO2:** prepare a plan, elevation and sectional view for a residential building.

**CO3:** develop structural drawings of RCC Buildings using CADD software.

**CO4:** locate and plan various service lines for a residential building as per codal recommendations.

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation

Statement :

The holistic understanding of building Drawings leads to construction of resilient infrastructure and sustainable industrialization

<b>GED 1206</b>	<b>ENVIRONMENTAL SCIENCES</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: All</b>	<b>(for Undergraduate B.Tech. Courses)</b>	<b>2</b>	<b>0</b>	<b>0</b>	<b>2</b>

**COURSE OBJECTIVES:**

To make the student conversant with the

**COB1:** various natural resources, availability, utilisation and its current scenario.

**COB2:** diverse ecosystems and its function, importance of biodiversity, its values, threats and conservation.

**COB3:** types of pollutants and its impacts on the environment and the effects of natural disasters.

**COB4:** impacts of human population, human health, diseases and immunisation for a sustainable lifestyle.

**MODULE I NATURAL RESOURCES 8**

Natural Resources: Renewable and non-renewable resources: Natural resources and associated problems - (a) Land resources: Land degradation soil erosion and desertification - (b) Forest resources: Use and over-exploitation, deforestation (c) Water resources: Use and over-utilisation of surface and ground water, conflicts over water, dams: benefits and problems, effects on forest and tribal people - (d) Mineral resources: Use and exploitation, environmental effects of extracting and using mineral resources, mining (e) Food resources: World food problems, changes caused by agriculture and overgrazing, effects of modern agriculture (f) Energy resources: Growing energy needs, renewable and nonrenewable energy sources, use of alternate energy sources.

**MODULE II ECOSYSTEMS AND BIODIVERSITY 8**

Concept of an ecosystem - Food chains, food webs, Energy flow in the ecosystem - ecological pyramids - Ecological succession - Characteristic features, structure and function of (a) Terrestrial Ecosystems: Forest ecosystem, Grassland ecosystem, Desert ecosystem (b) Aquatic fresh water ecosystems: Ponds and lakes, rivers and streams (c) Aquatic salt water ecosystems: oceans and estuaries

Biodiversity and its conservation - Types: genetic, species and ecosystem diversity - Values of biodiversity - India as a mega-diversity nation - Invasive, endangered, endemic and extinct species - Hot spots of biodiversity and Red Data book - Threats to biodiversity - Conservation of biodiversity: In-situ and Ex-situ conservation of biodiversity.

**MODULE III ENVIRONMENTAL POLLUTION AND DISASTER MANAGEMENT 8**

Sources, cause, effects and control measures of: (a) Air pollution (b) Water pollution (c) Soil pollution (d) Marine pollution (e) Noise pollution (f) Thermal pollution (g) Nuclear pollution (h) ill-effects of fireworks and upkeep of clean environment, types of fire and fire extinguishers- Solid waste Management: types, collection, processing and disposal of urban waste, industrial waste, e-waste and biomedical wastes - Disaster management: flood, drought, cyclone, landslide, avalanche, volcanic eruptions, earthquake and tsunami.

**MODULE IV HUMAN POPULATION, HEALTH AND SOCIAL ISSUES 6**

Human Population - Population growth, Population explosion, population pyramid among nations - Family Welfare Programme - Human Rights - Value Education - Environment and human health: air-borne, water borne, infectious diseases, contagious diseases and immunisation (all types of vaccines from birth), risks due to chemicals in food and water, endocrine disrupting chemicals, cancer and environment - Sustainable development - Resettlement and rehabilitation of people - Environment Legislative laws- Women and Child Welfare, Public awareness.

**Case studies related to current situation.**

**L – 30; Total Hours– 30**

**COURSE OUTCOMES:**

The student will be able to

**CO1:** analyse the current scenario of various natural resources and their depletion and suggest remedies to curb the exploitation.

**CO2:** identify food chains and web and its function in the environment, assess the impacts on the biodiversity and propose solutions to conserve it.

**CO3:** analyse the types and impacts of pollutants in the environment and propose suitable methods to alleviate the pollutants and the natural disasters.

**CO4:** assess on the impact of human population and the health related issues and immunisation practices and sustainable developments for a healthy life.

**Board of Studies (BoS) :**

11<sup>th</sup> BoS of Chem held on  
17.06.2021

**Academic Council:**

SDG All: No Poverty, Zero Hunger, Good Health and Well-Being, Quality Education, Gender Equality, Clean Water and Sanitation, Affordable & Clean Energy, Decent Work and Economic Growth, Industry, Innovation & Infrastructure, Reduced Inequalities, Sustainable Cities and Communities, Responsible Consumption and Production, Climate Action, Life Below Water, Life on Land, Peace, Justice and Strong Institutions, Partnerships for the Goals.

Statement: This course discuss about the environment, all the natural resources available, sharing of resources, effective utilisation, effects of over utilisation, health and environmental issues pertained to that, global warming and related issues, climates, disasters, impact assessments, population, human rights, societal welfare, laws to conserve the environment and sustainability.

**SEMESTER III**

<b>MAD 2183</b>	<b>NUMERICAL METHODS FOR</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 4</b>	<b>INTEGRATION AND DIFFERENTIAL</b>	<b>2</b>	<b>0</b>	<b>0</b>	<b>2</b>
	<b>EQUATIONS</b>				

**COURSE OBJECTIVES:**

This course aims to solve Integrations and Differential equations numerically.

**MODULE I NUMERICAL INTEGRATION 8**

Numerical Integration by Trapezoidal and Simpson's 1/3 and 3/8 Rule – Romberg's Method – Two Point and Three point Gaussian Quadrature Formulae

**MODULE II NUMERICAL DOUBLE INTEGRATION 7**

Double Integrals using Trapezoidal and Simpson's 1/3 Rules.

**MODULE III NUMERICAL SOLUTIONS OF FIRST ORDER ORDINARY DIFFERENTIAL EQUATIONS 8**

Single step methods: Euler method – Modified Euler method – Runge-Kutta method – Multi step methods: Milne's Predictor and Corrector Method – Adam's Predictor and Corrector Method.

**MODULE IV BOUNDARY VALUE PROBLEMS FOR PARTIAL DIFFERENTIAL EQUATIONS 7**

Finite Difference Solution of One Dimensional Heat Equation by Explicit and Implicit Methods – One Dimensional Wave Equation and Two Dimensional Laplace Equations.

**TOTAL HOURS – 30**

**TEXT BOOKS:**

1. M.K.Jain, S.R.K.Iyengar, R.K.Jain, "Numerical methods for Scientific and Engineering Computation", New Age International Publishers, New Delhi, 2003.
2. Grewal, B.S., "Numerical methods in Engineering and Science" 7 th edition, Khanna Publishers, 2007.
3. Dr. P. Mariappan "Numerical Methods for Scientific Solutions", New Century Book House(P) Ltd., 2022.

2. P.Dechaumphai, N. Wansophark, "Numerical Methods in Engineering", Narosa Publications, 2012.

**COURSE OUTCOMES:** At the end of the course students will be able to

**CO1:** solve the single integration by numerical methods.

**CO2:** solve the double integration by numerical methods.

**CO3:** find numerical solution of first order ordinary differential equations in engineering problems.

**CO4:** find numerical solution of partial differential equations in engineering problems.

**Board of Studies (BoS):**

14<sup>th</sup> BOS of Mathematics & AS held on  
30.06.2022.

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO 10	PO 11	PO 12	PSO 1	PSO 2	PSO 3
CO1	H	H	M								L				
CO2	H	H	M								L				
CO3	H	H	M								L				
CO4	H	H	M								L				

**Note:** L - Low Correlation      M - Medium Correlation      H - High Correlation

**SDG 4 :** Ensure inclusive and equitable quality education and promote lifelong opportunities for all

Learning of various numerical methods will lead to knowledge of applications in Civil Engineering.

<b>CED 2101</b>	<b>MECHANICS OF STRUCTURES</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9 , 11</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To provide in-depth knowledge with the computation of shear force, bending moment and draw the stress distribution under bending and shear.

**COB2:** To understand the concepts of slope and deflection of various determinate beams.

**COB3:** To understand the concepts of slope and deflection curves for various types of indeterminate beams.

**COB4:** To be familiar with the principles of energy methods and compute the structural deflections.

**COB5:** To enable the students to understand the fundamentals of axially loaded member and their behaviour under various loading conditions.

**MODULE I      TRANSVERSE LOADING ON BEAMS &      9**  
**STRESSES IN BEAMS**

Types of beams – Types of loading acting on beams – Shear force and bending moment for cantilever beams, simply supported beams and overhanging beams – Theory of simple bending – Bending stress distribution - Shear stress distribution.

**MODULE II      SLOPE      AND      DEFLECTION      OF      9**  
**DETERMINATE BEAMS**

Determinate and Indeterminate structure - Slope and deflection analysis of statically determinate beams - Macaulay's method – Moment area method – Conjugate Beam Method - Graphical method.

**MODULE III      SLOPE      AND      DEFLECTION      OF      9**  
**INDETERMINATE BEAMS**

Statically indeterminate Structures - Propped cantilever, fixed and continuous beams - Theorem of three moments – Effect of the sinking of supports.

**MODULE IV      STRUCTURAL DEFLECTIONS – ENERGY      9**  
**METHODS**

Strain Energy - Strain Energy stored due to axial force, bending, shear and torsion - Virtual work method (Unit – load method) - Castigliano's Theorems – Maxwell's theorem of Reciprocal - Analysis of Plane Trusses and Plane Frames with the application of energy theorems for computing deflections.

**CO5:** Elucidate the concepts for the behaviour of axially loaded members and solve for buckling under different boundary conditions.

**Board of Studies (BoS) :**

16<sup>th</sup> BoS of CE held on 5.01.2022

**Academic Council:**

18<sup>th</sup> Academic Council held  
on 24.02.2022

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO 10	PO 11	PO 12	PSO1	PSO2	PSO3

CO5	H		M										M	M	

**Note:** L - Low Correlation    M - Medium Correlation    H - High Correlation

SDG – 9 : Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation

SDG - 11 : Make cities and human settlements inclusive, safe, resilient and sustainable

Statement: Analysis of structures is more essential to ensure safe and sustainable building.

<b>CED 2102</b>	<b>MECHANICS OF FLUIDS</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 6</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To impart understanding of key concepts and fundamental principles pertaining to fluid behavior.

**COB2:** To provide sufficient knowledge to understand the basic concepts of fluid flow.

**COB3:** To impart the basic knowledge on the dynamics of fluids and flow through pipes.

**COB4:** To expose to the significance of boundary layer theory and its applications.

**COB5:** To develop the basic knowledge on the dimensional analysis and model study.

**MODULE I      FLUID      PROPERTIES      AND      PRESSURE      10**  
**MEASUREMENTS**

Dimensions and units - Properties of Fluids - Ideal and Real fluid - Definition of pressure - Pressure at a point- Pascal's law- Absolute and Gauge pressure - Measurement of pressure - Simple and Differential Manometer theory and problems - Pressure gauges.

**MODULE II      FLUID STATICS AND FLUID KINEMATICS      10**

Fluid Statics - Hydrostatic law - Definition of total pressure, Center of pressure, Metacentric height, Buoyant force –Problems on hydrostatic force and depth of center of pressure on plane surfaces and submerged surfaces (Vertical, Inclined and curved).

Fluid Kinematics – Velocity and Acceleration- Stream, Streak and Path lines – Classification of flows – Continuity equation (one-, two- and three-dimensional forms) – Stream and Potential functions – Flow nets.

**MODULE III      FLUID DYNAMICS      9**

Euler and Bernoulli's equations – Application of Bernoulli's equation – Venturimeter–Orifice meter- Laminar flow through pipes– Hagen Poiseuille equation – Turbulent flow – Darcy-Weisbach formula – Major and minor losses of flow in pipes – Pipes in series and in parallel – Moody diagram.

**MODULE IV      BOUNDARY LAYER      8**

Definition of boundary layer – Thickness and classification – Displacement and momentum thickness – Separation of boundary layer – Development of laminar and turbulent flows in circular pipes.

## **MODULE V SIMILITUDE AND MODEL STUDY**

**8**

Dimensional Analysis – Rayleigh’s method, Buckingham’s Pi- theorem – Similitude and Models- Dimensionless numbers – Scale effect and Distorted models

**L –45; Total Hours– 45**

### **TEXT BOOKS:**

4. Ramamrutham.S. “Hydraulics Fluid Mechanics and Fluid Machines,” 9th Edition, Dhanpat Rai Publication, 2014.

### **COURSE OUTCOMES:**

At the end of the course the students will be able to

**CO1:** describe fluid properties, forces causing flow and will be able to solve problems involving fluid properties and fluid pressure measurements.

**CO2:** assess the knowledge related to hydrostatic forces acting on the floating bodies and analyze the flow using principles of fluid kinematics.

**CO3:** solve fluid problems using principle of fluid dynamics, estimate losses in pipelines and analysis of pipes connected in series and parallel.

**CO4:** demonstrate the concept of boundary layer and its application to find the drag force exerted by the fluid on the flat solid surface.

**CO5:** formulate the relationship among the parameters involved in the given fluid phenomenon and to predict the performances of prototype by model studies.

**Board of Studies (BoS) :**

16<sup>th</sup> BOS of Civil held on 5.1.2022

**Academic Council:**

18<sup>th</sup> Academic Council held on  
24.02.2022

SDG 6: Clean, accessible water for all is an essential part of the world we want to live in.

Understanding the development of sustainable water supplies by means of design and construction of efficient water supply and distribution system.

<b>CED 2103</b>	<b>CONCRETE TECHNOLOGY</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 11</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:** The main objective of this course is to impart adequate knowledge on

**COB1:**significance of concrete constituent materials

**COB2:**workability of concrete and concrete mix design

**COB3:**hardened concrete properties and its significance

**COB4:** durability properties of concrete

**COB5:** different types of concrete currently used in the construction projects

### **MODULE I CONCRETE CONSTITUENT MATERIALS AND WORKABILITY 9**

Overview and significance of concrete constituent materials – Cement : chemical composition and compounds, hydration process, microstructure of concrete–Workability : water-cement ratio, influencing factors, site and laboratory methods to determine workability – Mineral and chemical admixtures : overview

### **MODULE II CONCRETE MIX DESIGN 9**

Manufacture of concrete: Construction practices to be followed in site – Concrete Mix Design: significance, salient parameters, mix design as per Indian Standards and American Concrete Institute method, validation of mix design, fresh concrete properties.

### **MODULE III HARDENED CONCRETE PROPERTIES 9**

Hardened concrete properties: overview and significance - compressive strength, flexural strength, splitting tensile strength, modulus of elasticity, bond strength, creep and shrinkage: test methods as per Indian standards, estimation of strength properties – NDT techniques for hardened concrete strength assessment : overview.

### **MODULE IV DURABILITY PROPERTIES OF CONCRETE 9**

Sustainable construction – Durable concrete – life cycle cost benefits – Mechanisms affecting durability of concrete: physical mechanisms and chemical mechanisms : overview – Significance of proper selection of construction materials, mix design and good construction practices – Tests to assess durability of concrete : water absorption, water permeability,

water sorptivity, rapid chloride penetration test, accelerated corrosion test – test procedures and estimation methods.

**MODULE V CONCRETE FOR SPECIAL APPLICATIONS 9**

High performance concrete – fibre reinforced concrete – polymer modified concrete – shotcrete – self compacting concrete

**L – 45 ; TOTAL HOURS – 60**

**TEXT BOOKS:**

1. Shetty.M.S., and A.K. Jain “Concrete Technology (Theory and Practice)”, S. Chand and Company Ltd.,2010.

10. ASTM C1585-20, “Standard Test Method for Measurement of Rate of Absorption of Water by Hydraulic-cement Composites”, American Society for Testing and Materials, Pennsylvania, USA.
11. IS 3085 (1965) R 2002, “Method of Test for Permeability of Cement Mortar and Concrete”, Bureau of Indian Standards, New Delhi.

12. ASTM C 1202-12, “Standard Test Method for Electrical Indication of Concrete’s Ability to Resist Chloride Ion Penetration”, American Society for Testing and Materials, Pennsylvania, USA.

**COURSE OUTCOMES:** On completion of the course the student will be able to

**CO1:** describe the composition and compounds of cement, hydration process and workability of concrete.

**CO2:** perform mix design of concrete as per Indian Standards and ACI method

**CO3:** describe the hardened concrete properties including its test method as per Indian Standard

**CO4:** describe the durability properties of concrete including its test method as per Indian Standard / ASTM

**CO5:** specify and describe the type of concrete for special applications.

**Board of Studies (BoS) :**

16<sup>th</sup>BoS of Civil held on 05.01.2022

**Academic Council:**

18<sup>th</sup> AC held on 24.02.2022

SDG 11: Make cities and human settlements inclusive, safe, resilient and sustainable

Designing of durable concrete by properly understanding the properties of concrete constituent materials, expected strength, exposure conditions and application; make the human settlements safe and resilient and leads to sustainable development.

<b>CED 2104</b>	<b>WATER AND WASTEWATER</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 6</b>	<b>ENGINEERING</b>	<b>3</b>	<b>0</b>	<b>2</b>	<b>4</b>

**COURSE OBJECTIVES:**

The objectives of the course are to impart knowledge on

**COB1:** The population forecasting, water sources, intake structures, water quality and its treatment

**COB2:** The advanced water treatment methods, water storage facilities and distribution network

**COB3:** The sewerage systems, estimation of wastewater flows & storm runoff, wastewater characterization and its primary treatment

**COB4:** The secondary treatment of wastewater

**COB5:** The methods for wastewater disposal & sludge handling.

**MODULE I WATER TREATMENT 9**

Design Period - Population forecasting - Types of water demand -Sources of water - Intakes - Characteristics of water - Standards for drinking water - Principle, function and design of water treatment units - sedimentation, coagulation & flocculation, Filtration – theory & principle of disinfection methods.

**MODULE II ADVANCED WATER TREATMENT, STORAGE & DISTRIBUTION 9**

Water softening – Iron, Manganese and Phosphorus removal, Defluoridation – Desalination - Membrane filtration - Water storage facilities – Distribution networks & analysis.

**MODULE III PRIMARY TREATMENT OF WASTEWATER 9**

Sewerage systems - Sewage flow estimation - Storm runoff estimation - Sewer materials - Hydraulics of flow in sewer - Sewer appurtenances – Characteristics of sewage - Unit operations and processes - Primary treatment – Principles, functions and design of sewage treatment units – Screens – Grit chamber.

**MODULE IV SECONDARY TREATMENT OF WASTEWATER 9**

Introduction to Aerobic and Anaerobic treatment process - Functions and design of Activated sludge process and trickling filter – Principles and functions of Membrane Bioreactor, Sequential batch reactor, Waste stabilisation pond, UASB reactor - Onsite sanitation - septic tanks

## **MODULE V            WASTEWATER    DISPOSAL    &    SLUDGE            9** **TREATMENT**

Standards for disposal into water bodies – Self-purification of river - Oxygen sag curve – Sewage farming and methods - Sludge thickening & Digestion – Biogas recovery – Sludge conditioning and Dewatering – Sludge drying bed.

### **PRACTICALS**

List of experiments

1. Determination of pH and Turbidity
2. Determination of Dissolved oxygen
3. Determination of Solids (Total, Suspended and Dissolved solids)
4. Determination of Conductivity
5. Determination of Sodium, Potassium and Calcium
6. Determination of Biochemical Oxygen Demand (BOD)
7. Determination of Chemical Oxygen Demand (COD)
8. Determination of Hardness
9. Determination of Chlorides and Residual Chlorine
10. Determination of Optimum Coagulant Dosage by Jar Test
11. Determination of Alkalinity
12. Determination of Nitrate
13. Determination of Phosphate
14. Heavy metals determination using AAS (Demo)

**L – 45; P – 30; Total Hours – 75**

3. Water and Wastewater analysis – Manual, Central Pollution Control Board, New Delhi, 2011.

**COURSE OUTCOMES:**

At the end of the course the student will be able to

**CO1:** forecast population, estimate quantity of water demand, characterize water quality and design treatment units

**CO2:** describe advanced treatments for water, water storage facilities and analyze distribution network

**CO3:** explain the sewerage systems, estimate wastewater flows & storm runoff, characterize quality of wastewater and design the primary wastewater treatment units

**CO4:** describe the secondary treatment of wastewater

**CO5:** describe the methods for wastewater disposal & sludge handling.

SDG No.6 : Clean Water and Sanitation

The understanding of water and wastewater treatment leads to the development of sustainable technologies for treatment and management of water and wastewater.

<b>CED 2105</b>	<b>TRANSPORTATION</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 8</b>	<b>ENGINEERING</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

The Objectives of the course are

**COB1:**To impart knowledge on urban transportation planning

**COB2:**To understand the highway engineering principles

**COB3:**To impart knowledge on the concepts of geometric design of highways

**COB4:**To gain knowledge on various types of intersections and its geometric design

**COB5:** To explain the modern techniques used in urban transportation planning

**MODULE I INTRODUCTION 8**

Role of Transportation Engineering; Modes of transportation- Their importance and limitations- Urban Transportation Planning Process, Urban Travel and Transportation Systems Characteristics, Function and form of urban structures, services, classification of urban centers, growth patterns, urban transport problems, Transport Behavior of Individuals and Households, Land use/ Transportation systems, land value and congestion, access and business migration.

**MODULE II HIGHWAY ENGINEERING 8**

Importance of Highway Transportation; Highway Planning- Principle of Highway Planning - Highway Alignment Requirements, Engineering Surveys for Highway locations. Road developments -Jayakar Committee and Recommendations, Twenty year Road Development Plan, IRC, Institutions - HRB, NHAI, MORTH and CRR) - Financing, Privatization of Highways, Highway Alignment Requirements, Engineering Surveys for Highway locations.

**MODULE III GEOMETRIC DESIGN OF HIGHWAYS ENGINEERING 12**

Classification and Cross section of Urban and Rural Roads (IRC),Highway Cross sectional Elements – Right of way, Carriage way, Road Width, Camber, Kerbs, Shoulders and Footpaths ( IRC Standards), Sight distances – Factors affecting sight distances – PIEV theory, Stopping Sight Distance (SSD), Overtaking Sight Distance (OSD), Sight Distance at Intersections, Intermediate

Sight Distance and Illumination Sight Distance (Derivations and Problems in SSD

and OSD), Design of Horizontal Alignments – Super elevation, Widening of pavements – Gradient – Horizontal Curves and Transition Curves ( Derivation of Formulae and Problems) - Design of Vertical Alignments, Geometry design of hill roads – hairpin bends

#### **MODULE IV INTERSECTIONS 8**

Intersections – Type of intersections- Basic considerations – simplicity – uniformity – Maneouvre Elements – Separation of conflict points – Design Elements – Design Speed – Intersection Curves – Super elevation for curves at Intersection – Intersection Sight Distance. Rotary and Signalized Intersections grade separated interchanges such as flyovers, underpasses, overpasses, concept of Integrated Inter Model transit system.

#### **MODULE V MODERN URBAN TRANSPORTATION 9**

Introduction to Urban Freight Transportation and Urban Mass Transportation Systems. Characteristics of buses, bicycles, Para transit, rapid transit, Traffic Restraint Techniques and methods. Classification, mass and rapid transit system, Introduction to Intelligent Transportation System (ITS), Public Transport policy, intermediate.

**L- 45; Total Hours – 45**

#### **TEXT BOOKS:**

1. Johnson victor, S.Ponnuswamy, Urban Transportation, Planning, Operation and Management, McGraw-Hill Pvt. Ltd, 2012.
2. Kadiyali.L.R., Principles and practice of highway engineering Khanna Technical Publications, Delhi, 2005.
3. Khanna.K and Justo CEG., Highway engineering, 10<sup>th</sup> edition Khanna Publishers, 2010.

1. Johnson Victor and S. Ponnuswamy., “Urban Transportation: Planning, Operation and Management” McGraw-Hill Education Private Limited 2012.
2. Sigurd Grava, “Urban Transportation Systems”, McGraw Hill Professional, 2013.

#### **COURSE OUTCOMES:**

At the end of the course, students will be able to

**CO1:** describe the urban transport planning process and various Characteristics of urban forms

**CO2:** ascertain knowledge on highway alignment requirements and engineering surveys for highway locations

**CO3:** explain geometric design of various cross sectional elements and factors affecting the sight distances

**CO4:** demonstrate the constructions of intersection design and to know the concept of integrated inter modal transit system.

**CO5:** compile the modern urban transportation such as Para transit, rapid transit and intelligent transportation system.

**Board of Studies (BoS) :**

16<sup>th</sup>BoS of Civil held on 05.01.2022

**Academic Council:**

18<sup>th</sup> Academic Council held on 24.02.2022

SDG 8 : Decent Work and Economic Growth

The transportation engineering Promote sustained, inclusive and sustainable economic growth.

<b>CED 2106</b>	<b>CONCRETE AND HIGHWAY</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 11</b>	<b>LABORATORY</b>	<b>0</b>	<b>0</b>	<b>2</b>	<b>1</b>

**COURSE OBJECTIVES:**

The objective of the course is to impart hands on training on

**COB1:** methods of measuring workability of fresh concrete

**COB2:** concrete mix design as per Indian and ACI method

**COB3:** testing hardened concrete samples

**COB4:** testing of aggregates used for Highway Engineering

**COB5:** testing and quality assurance of bitumen used for Highway Engineering

**MODULE I FRESH CONCRETE PROPERTIES 6**

Concrete constituent materials and performance tests as per Indian Standards: Overview – Workability of concrete : Slump test, compaction factor test, flow table test and Vee Bee consistometer test – Influence of water-cement ratio on workability.

**MODULE II CONCRETE MIX DESIGN 6**

Concrete mix design as per Indian Standards and ACI committee method for the given materials and set variables – validation of mix design.

**MODULE III HARDENED CONCRETE PROPERTIES 6**

Compressive strength test on cubes and cylinder specimen, flexural strength test on concrete prism, splitting tensile strength test on concrete cylinder, Young's modulus of concrete : Testing as per relevant Indian Standards and interpretation of results.

**MODULE IV AGGREGATES FOR HIGHWAY APPLICATION 6**

Materials used in Highway Engineering and performance tests as per Indian Standards : Overview – Testing on aggregates : Impact strength - crushing strength - abrasion resistance - water absorption

**MODULE V PROPERTIES OF BITUMEN 6**

Grades of Bitumen: Overview. Tests on Bitumen - Penetration, Softening point, Ductility, Specific gravity, Binder content in bituminous mixture and Marshal stability test.

**P – 30 ; TOTAL HOURS – 30**

**TEXT BOOKS:**

**COURSE OUTCOMES:**

At the end of the course, students will be able to

**CO1:** Find workability of concrete for the give set of materials and conditions

**CO2:** Perform concrete mix design as per Indian Standards and ACI method for the given materials and validation

**CO3:** Assess hardened concrete properties by conducting tests as per Indian standards.

**CO4:** Determine the properties of materials used in highway engineering as per Indian Standards

**CO5:** Perform the tests to determine the properties of Bitumen as per Indian Standards

**Board of Studies (BoS) :**16<sup>th</sup>BoS of Civil held on 05.01.2022**Academic Council:**18<sup>th</sup> AC held on 24.02.2022

SDG 17: Strengthen the means of implementation and revitalize the global partnership for sustainable development.

Statement: This course ensures capacity building and skills development requisite for implementing global partnership.

**SEMESTER IV**

<b>CED 2201</b>	<b>MECHANICS OF SOILS</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 11</b>		<b>3</b>	<b>0</b>	<b>2</b>	<b>4</b>

**COURSE OBJECTIVES:**

The objectives of the course are

**COB1:** To familiarize the students with geotechnical terminology and impart knowledge on index properties and hydraulic properties of soil.

**COB2:** To provide knowledge on the effective stress behavior and stress distribution for different loading condition.

**COB3:** To understand the concepts in compaction and consolidation of soil.

**COB4:** To enable the students to determine the shear strength of the soil.

**COB5:** To provide an understanding on slope stability in soil.

**MODULE I      INDEX      PROPERTIES      AND      HYDRAULIC      12**  
**PROPERTIES OF SOILS**

Introduction: Nature of Soil - Problems with soil - Index properties: Phase relation - Sieve analysis - Sedimentation analysis- Atterberg limits – Field Density – Classification of soils for engineering purpose - Hydraulic properties: Soil water - Various forms- Influence of clay minerals - Capillary rise - Permeability - Darcy's Law- Permeability measurement in the laboratory – Introduction to Flow nets – Simple problems.

**MODULE II      EFFECTIVE      STRESS      AND      STRESS      8**  
**DISTRIBUTION IN SOIL**

Effective stress concepts in soil – Total, neutral and effective stress distribution in soil - Stress distribution in soil media - Boussinesque formula- stress due to line load, circular and rectangular loaded area - approximate methods - Use of influence charts - Westergaard equation for point load.

**MODULE III      COMPACTION AND CONSOLIDATION      8**

Soil compaction - factors affecting compaction - field compaction methods and monitoring – Consolidation - Terzaghi's one dimensional consolidation theory – Consolidation Settlement - Problems - Laboratory consolidation test - Field consolidation curve.

**MODULE IV                    SHEAR STRENGTH                    8**

Shear strength of cohesive and cohesion less soils - Mohr - Coulomb failure theory - Saturated soil and unsaturated soil (basics only)-Strength parameters - Measurement of shear strength, direct shear, triaxial compression, UCC and Vane shear tests-types of shear tests based on drainage and their applicability.

**MODULE V                    SLOPE STABILITY                    9**

Slope failure mechanisms - Modes of failure- Infinite slopes - Finite slopes - Total and effective stress analysis - Stability analysis for purely cohesive and c-φ soils - Friction circle method - Stability number - Slope protection measures.

**PRACTICALS****List of Experiments**

1. Specific gravity of soil grains
2. Grain size distribution by Sieve analysis and Hydrometer analysis,
3. Relative density of sands
4. Atterberg limits test.
5. Field density test (Core cutter and sand replacement methods).
6. Permeability determination (constant head and falling head methods)
7. Determination of moisture - density relationship using Standard Proctor Compaction test.
8. One dimensional consolidation test (Determination of co-efficient of consolidation only).
9. Determination of shear strength parameters - Direct shear test on cohesion less soil, Unconfined Compression test on cohesive soil, Triaxial compression test and Vane shear test.

**L – 45 ; P – 30 ; Total Hours– 75**

**TEXT BOOKS:**

4. Muni Budhu., Soil Mechanics and Foundations., 3<sup>rd</sup> edition, John Willey & Sons, Inc., New York, 2010.

### COURSE OUTCOMES:

At the end of the course, students will be able to

**CO1:** determine the index properties and hydraulic properties of soil and classify soil for engineering purpose.

**CO2:** analyze effective stress and stress behaviour of soil under various loading condition in soil.

**CO3:** assess consolidation settlement and incorporate various compaction methods.

**CO4:** ascertain the behaviour of soil based on shear strength parameters.

**CO5:** analyze the stability of soil and suggest suitable protection measures

### Board of Studies (BoS) :

16<sup>th</sup> BoS of CIVIL held on 05.01.2022

SDG 11 : Make cities and human settlements inclusive, safe, resilient and sustainable.

Statement : The impart of knowledge on basic soil properties and their behavior under different stress conditions helps in designing an economical and safe foundation leading to construction of resilient infrastructure.

<b>CED 2202</b>	<b>STRUCTURAL ANALYSIS – I</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9 &amp; 11</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To provide in-depth knowledge of the analysis of structures by the slope - deflection method.

**COB2:** To impart knowledge on the analysis of beams and frames by moment distribution method.

**COB3:** To understand the fundamental concepts of beams curved in plan.

**COB4:** To provide knowledge on the analysis of beams using moving loads and influence lines.

**COB5:** To enable the students to understand the influence lines for indeterminate structures.

**MODULE I SLOPE DEFLECTION METHOD 9**

Continuous beams and rigid frames (with and without sway) – Symmetry and ant symmetry - Simplification for hinged end - Support displacements.

**MODULE II MOMENT DISTRIBUTION METHOD 9**

Stiffness and carry-over factors - Distribution and carryover of moments - Analysis of continuous Beams - Plane rigid frames with and without sway - Naylor's simplification.

**MODULE III BEAMS CURVED IN PLAN 9**

Introduction to curved beams - Analysis of beams curved in plan- Circular arc cantilever – Semi-circular beams fixed at two ends and subjected to central concentrated load - Circular ring beams.

**MODULE IV MOVING LOADS AND INFLUENCE LINES FOR DETERMINATE STRUCTURES 9**

Influence lines for reactions in statically determinate structures – Influence lines for member forces in pin-jointed frames – Influence lines for shear force and bending moment in beam sections – Calculation of critical stress resultants due to concentrated and distributed moving loads.

**MODULE V INFLUENCE LINES FOR INDETERMINATE STRUCTURES 9**

Muller Breslau's principle – Application of Muller Breslau's principle to determinate beams and continuous beams.

**L – 45; Total Hours – 45**

**TEXT BOOKS:**

4. Vaidyanathan, R., and Perumal, P, "Structural Analysis, Volume 2", Laxmi Publications, 2<sup>nd</sup>Edition, New Delhi, 2006.

**COURSE OUTCOMES:**

At the end of the course, the students will be able to

**CO1:** plot the bending moment diagram and shear force diagram of indeterminate structures by using the slope deflection method.

**CO2:** construct the bending moment diagram and shear force diagram of indeterminate structures by using the moment distribution method.

**CO3:** analyse the curved beams subjected to loads in the plane of curvature.

**CO4:** valuate and construct statically determinate structures from the influence lines.

**CO5:** generate the influence line diagram for continuous beam using Muller Breslau's principle.

**Board of Studies (BoS):**

16<sup>th</sup> BoS of CE held on 5.1.2022

SDG – 9 : Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation

SDG - 11 : Make cities and human settlements inclusive, safe, resilient and sustainable

Statement : Analysis of structures is more essential to ensure safe and sustainable building.

<b>CED 2203</b>	<b>STRUCTURAL CONCRETE</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9 &amp; 11</b>	<b>DESIGN</b>	<b>3</b>	<b>0</b>	<b>2</b>	<b>4</b>

**COURSE OBJECTIVES:**

**COB1:** To introduce the fundamental concepts of reinforced concrete materials with an emphasis on the various methods of design and also design the beam under flexure & shear

**COB2:** To impart knowledge to students about the design of concrete one-way & two-way slabs as per Indian Standards.

**COB3:** To design the short and slender columns subjected to axial load as well as combined axial load and bending moment.

**COB4:** To be familiar with various types of footings and design the foundation for RC structures.

**COB5:** To understand the concepts of structural behaviour of staircases and design the staircase for buildings.

**MODULE I                    STRUCTURAL RC DESIGN CONCEPTS & DESIGN                    9**  
**OF BEAMS**

Objectives of structural design – Concept of the elastic method, ultimate load method and limit state method – Advantages of Limit State method over other methods – Limit State Design philosophy as per IS Code recommendations - Fundamental assumption –Linear elastic analysis of composite sections – Flexural and shear behaviour of reinforced concrete – Analysis and Design of singly and doubly reinforced rectangular and flanged sections – Behaviour and design of torsion – Mechanisms of bond resistance – Flexural bond – Anchorage bond.

**MODULE II                    DESIGN OF SLABS                    9**

Behaviour of slabs spanning in one and two directions - Design of one way simply supported and continuous slabs - Design of two-way slabs for various edge conditions.

**MODULE III                    DESIGN OF COLUMNS                    9**

Classification of columns – Behaviour of RC columns - Design of short columns under axial compression, combined axial compression with uniaxial and biaxial bending.

**MODULE IV                    DESIGN OF FOOTINGS                    9**

Types of footings – Pressure distribution under footings - Design of Isolated rectangular footings with concentric column loads – Design of Isolated rectangular footings with eccentric column loads - Design of circular footings with concentric column loads - Design of combined rectangular footings.

## **MODULE V                      DESIGN OF STAIRCASES                      9**

Dimensioning and Types of staircases – Structural behaviour of staircases – Loads on staircases - Design of stair slabs spanning transversely and longitudinally.

### **PRACTICALS**

#### **List of Exercises**

1. Introduction to STAAD.Pro, Model generations, Assigning Loads, Creating Load Combinations, Analysis and Design
2. Analysis and Design of a simply supported beam
3. Analysis and Design of a continuous beam
4. Analysis and Design of plane frames with two bay five-storey (G+4)
5. Analysis and Design of space frames with single-bay two-storey (G+1)
6. Design of foundation for the space frames with single-bay two-storey (G+1)
7. Design of staircase with single-bay two-storey (G+1)

**L – 45; P – 30 ; Total Hours – 75**

4. Wight, J.K., "Reinforced Concrete: Mechanics and Design", Pearson, 7<sup>th</sup> Edition, London, 2016.

#### COURSE OUTCOMES:

At the end of the course, the students will be able to

**CO1:** demonstrate various design philosophies in concrete structures and design the beams under flexure and shear.

**CO2:** apply the codal provisions for the design of slabs.

**CO3:** employ the codal provisions for the design of reinforced concrete columns.

**CO4:** identify the suitable type of footing for RC structures and design as per standards.

**CO5:** design and construct an appropriate staircase for buildings.

Statement: Efficient reinforced concrete design is a prerequisite of safe, resilient and sustainable building construction.

<b>CED 2204</b>	<b>ESTIMATION AND COSTING</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 8</b>	<b>OF INFRASTRUCTURE</b>	<b>2</b>	<b>0</b>	<b>2</b>	<b>3</b>
	<b>PROJECTS</b>				

**COURSE OBJECTIVES:**

**COB1:** To understand the basic concepts of planning and estimation of buildings.

**COB2:** To impart knowledge on various methods of detailed estimation of buildings.

**COB3:** To introduce the concepts of specification writing and rate analysis and tendering process.

**COB4:** To enable knowledge on quoting tenders and contracts.

**COB5:** To provide understanding on valuation engineering and report preparation.

**MODULE I INTRODUCTION 4 + 4**

Estimation- Necessity of Estimation - Duties and requirements of a good Quantity Surveyor- Types of Estimates- Approximate and Detailed Estimates - Taking off Quantities - Units of measurements – Measurement Books – Consideration for Deductions of openings – Painting co-efficients - Task/Out-turn work – Standard Data Book - Schedule of rates - Revision of rates - Market Rates- Lead and Lift - Cost of conveyance and handling charges – Lump sum and Contingencies - Planning and layout of residential building – size of rooms, floor area, height and thickness of walls.

**MODULE II DETAILED ESTIMATE 7 + 8**

Load Bearing and Framed Structures - Calculation of quantities of earthwork, brick work, RCC, PCC, Plastering, white washing, colour washing and painting / varnishing – Long Wall and Short Wall method – Centre line method– Problems – Tutorial in Excel work sheet.

**MODULE III SPECIFICATIONS AND ANALYSIS OF RATES 7 + 6**

Specifications - Detailed and General specifications - Standard specification – Advantages of Standard specifications - Writing standard specifications with reference to Tamilnadu Building Practice / Indian Standards / NBC - Examples - Analysis of rates – Earthwork -Brickwork – P.C.C and R.C.C – Plastering – Painting - Flooring.

**MODULE IV          TENDERS AND CONTRACTS          5 + 6**

Tenders – Tender procedures and drafting - Tamilnadu Tender Transparency Act – e-tendering – Encryption and Decryption – Contracts – Types of contracts – Construction contract documents.

**MODULE V          VALUATION    AND    TECHNICAL          7 + 6  
REPORT WRITING**

Value and Cost- Purpose of valuation – Basic terms in valuation - Factors affecting the value of a property –Mortgage and Lease -Problems on determination of Sinking Fund - Problems on calculation of Depreciation - Methods of valuation of Buildings –Technical report writing – Necessity - Points to be considered – Documents to be enclosed – Report writing for construction of residential building, roadwork’s and water treatment plants.

**L – 30 ; P- 30 ; Total Hours – 60**

**TEXT BOOKS:**

1. Chakraborti.M., “Estimating, Costing, Specification & Valuation in Civil Engineering”, Chakraborti Publishers, 24<sup>th</sup> Edition, 2010.
2. Dutta, B.N., “Estimating and Costing in Civil Engineering”, UBS Publishers & Distributors Pvt Ltd; 28<sup>th</sup> Revised Edition, New Delhi, 2020.

**REFERENCES:**

2. Rangwala, “Estimating, Costing and Valuation”, Rangwala Publishers, 17<sup>th</sup> edition, 2017.

**COURSE OUTCOMES:**

At the end of the course, students will be able to

**CO1:** plan and estimate different items of work for buildings.

**CO2:**estimate the quantities of items of works involved in construction of residential and commercial building in detail

**CO3:**prepare specification report and analyse the rate involved for each item of works to be done.

**CO4:**quote tenders and contract agreements in construction field.

**CO5:**determine the value of a building and also excel in technical report writing

**Board of Studies (BoS) :**16<sup>th</sup> BoS of CIVIL held on 05.01.2022**Academic Council:**18<sup>th</sup> Academic Council held  
on 24.02.2022

SDG 8 : Promote sustained, inclusive and sustainable economic growth.

Statement : The holistic approach of estimating a building with in-depth description of the expenditures needed paves the way to prevent project cost overruns and promotes economic growth of the nation.

<b>CED 2205</b>	<b>WATER RESOURCES</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>	<b>ENGINEERING</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To provide the basic knowledge on crop water requirements and soil moisture irrigation relationship.

**COB2:** To develop idea on various irrigation methods and minimizing water losses.

**COB3:** To expose the students on various canals and tank irrigation systems.

**COB4:** To equip knowledge related to the impounding structures.

**COB5:** To familiarize with the concept of diversion structures and irrigation management

**MODULE I INTRODUCTION 9**

Irrigation - Need, merits and demerits of irrigation – Crop and crop seasons in India - Duty – Duty Delta relationship – Factors affecting duty - Irrigation efficiencies - Consumptive use of water – Soil moisture irrigation relationship – Field capacity -Determination of depth and frequency of irrigation - Irrigation schemes - Planning and Development of irrigation projects.

**MODULE II IRRIGATION METHODS 8**

Types of irrigation – Surface and Sub surface irrigation – Techniques for water distribution - Flooding Methods - Canal irrigation – Lift irrigation – Tank irrigation – Sprinkler irrigation – Drip irrigation – Need for optimization of water use - Minimizing irrigation water losses.

**MODULE III WATER CONVEYANCE AND STORAGE STRUCTURES 9**

Canal - Classification of canals - Alignment of canals – Canal lining – Types of lining - Unlined canal - Kennedy's and Lacey's Regime theory - Canal drops – Types and functions - Tank - Isolated tanks – Tanks in series – Embankments - Tank Outlets/Tank Sluices - Surplus weir.

**MODULE IV IMPOUNDING STRUCTURES 10**

Weirs –Types and functions - Elementary profile of a weir – Weirs on pervious foundations – Seepage analysis -Bligh's and Khosla Theories – Dams – Site selection - Factors affecting location and type of dams -

Gravity dams – Earth dams – Arch dams – Forces on gravity dams -  
Spillways – Types and functions.

## **MODULE V DIVERSION STRUCTURES AND WATER 9 RESOURCE MANAGEMENT**

Cross drainage works –Types and functions – Diversion head works –  
Canal regulators – Cross and Head Regulators – River Training works -  
On farm development works - Percolation Pond - Check dams -  
Participatory irrigation management – Water users associations –  
Changing paradigms in water management – Performance evaluation.

**L – 45; Total Hours – 45**

### **TEXT BOOKS:**

1. Asawa, G.L., “Irrigation and Water Resources Engineering,” New age International publishers, 2005.
2. Raghunath H.M., “Irrigation Engineering”, Wiley India Pvt Ltd Publication, 2012.
3. Santosh Kumar Garg., “Irrigation Engineering and Hydraulic Structures” Khanna Publishers, New Delhi, 2013.

### **REFERENCES:**

3. Novak, P, Moffat, A.I.B, Nalluri, C and Narayanan, R, “Hydraulic Structures”, CRC press, 4<sup>th</sup> Edition, 2006.

### **COURSE OUTCOMES:**

At the end of the course the students will be able to

**CO1:** estimate crop water requirements, irrigation efficiency and the consumptive use of water for irrigation.

**CO2:** assess knowledge on different methods of irrigation and optimum method of irrigation for judicious use of water resources.

**CO3:** develop a wide knowledge on the canal and tank irrigation system

**CO4:** identify the major concept of structures like dams, spillways, weirs and barrage structures.

**CO5:** determine the knowledge about the functions of diversion structures and water management.

**Board of Studies (BoS) :**16<sup>th</sup> BOS of Civil held on 5.1.2022**Academic Council:**18<sup>th</sup> Academic Council  
held on 24.02.2022

SDG 9: Investments in infrastructure are crucial to achieving sustainable development.

The structures like diversion head works, canal regulators etc are constructed for the sustainable use of water.

<b>CED 2206</b>	<b>SURVEY AND SOIL</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 11</b>	<b>INVESTIGATION CAMP</b>	<b>0</b>	<b>0</b>	<b>2</b>	<b>1</b>

**COURSE OBJECTIVES:**

The objectives of the course are to impart knowledge on

**COB1:** the methods of preparing contour maps from the elevation data.

**COB2:** longitudinal sectioning profiles & cross-sectional profiles for a new road, drainage route to compute the volumes of embankment and excavation.

**COB3:** the concept of triangulation surveying using a total station.

**COB4:** the characteristics of a highway curve and also sketch & set out the excavation markings of a residential building.

**COB5:** the execution of real-time soil investigations.

**PRACTICALS**

List of Experiments:

1. Preparation of elevation & contour map.
2. Preparation of longitudinal sectioning profiles & cross-sectional profiles for a new road, drainage route.
3. Computation of reduced level (RL) of points using profile leveling.
4. Determination of area of survey tract using triangulation surveying.
5. Determination of the location of a point using GPS.
6. Determination of the shortest distance between two points and its gradient by tachometric traversing.
7. Setting out of a Curve for a new road or rail alignment.
8. Marking of foundation for a multi-storey building.
9. Soil Investigation - Conduction of Standard Penetration Test.
10. Soil Investigation - Preparation of bore log & soil profile.

**P – 30; Total Hours – 30**

**TEXTBOOKS:**

3. James M. Anderson and Edward M. Mikhail, "Introduction to Surveying", 7<sup>th</sup> Edition, McGraw Hill, 2015.
4. <https://civilengineeringnotes.com/surveying/>

**COURSE OUTCOMES:**

After completion of the course, the students will be able to

**CO1:** plan and execute a survey for topography modeling of terrain and create a contour map.

**CO2:** plan and execute the survey for the formation of a new road alignment by longitudinal sectioning and cross-sectioning profiles and compute the volumes of embankment and excavation.

**CO3:** determine the area of a tract of land using triangulation surveying and determine the location of points using GPS.

**CO4:** compute the characteristics of a highway curve and set out the same by an appropriate method and also sketch out the excavation markings of a residential building and set out the same.

**CO5:** execute a soil investigation programmed, sketch the soil profile and compute the safe bearing capacity of the soil.

SDG 11: Make cities inclusive, safe, resilient and sustainable.

The gained knowledge results in measuring and mapping the city to create a digital simulation that allows for forecast any event and helps in better decision making for resilient structures.

<b>GED 2201</b>	<b>WORKPLACE SKILLS AND</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 8</b>	<b>APTITUDE FOR ENGINEERS</b>	<b>0</b>	<b>0</b>	<b>2</b>	<b>1</b>

**COURSE OBJECTIVES:**

**COB1:**To expose them to reading for specific purposes, especially in

professional contexts

**COB2:**To expose them to the process of different kinds of formal writing

**COB3:**To prepare the students to be successful in their career

**COB4:**To familiarize various problem-solving techniques in aptitude and puzzles.

**MODULE I EXTENSIVE READING & WRITING 07**

Reading for comprehension - inferring and note-making – Process of writing- paragraph development - elements of business writing: Email, memos.

**MODULE II INTENSIVE READING & WRITING 08**

Intensive reading and reviewing - Interpretation of charts, graphs - Résumé - Letter of enquiry, thanksgiving letters.

**MODULE III QUANTITATIVE APTITUDE 08**

Percentage - Ratio and Proportion - Profit and Loss – Averages, Allegations and Mixtures.

**MODULE IV LOGICAL COMPETENCY 07**

Syllogism – Blood Relations- Number, Alpha and Alpha numeric series - Puzzles – Cubes and Dice - Odd One Out-Coding and Decoding

**P – 30; Total Hours- 30**

### COURSE OUTCOMES:

**CO1:** Demonstrate reading skills with reference to business related texts

**CO2:** Draft professional documents by using the three stages of writing

**CO3:** Apply various short cut techniques for solving complicated aptitude problems

**CO4:** To understand various problems and patterns of different ways to solve it

### Board of Studies (BoS) :

13<sup>th</sup>BoS of the Department of English  
held on 17.6.2021

### Academic Council:

17<sup>th</sup> AC held on 15.07.2021

4. Sharma Brij Kishore “Introduction to the Indian Constitution”, 8th Edition, PHI Learning Pvt. Ltd. 2015
5. Latest Publications of NHRC - Indian Institute of Human Rights, New Delhi.

**COURSE OUTCOMES:**

At the end of the course, the students will be able to

**CO1:** describe the emergence and evolution of Indian Constitution.

**CO2:** realize the status and importance of fundamental rights, fundamental duties and directive principles of state policy and relation among them by understanding the articulation of its basic values under the Constitution of India.

**CO3:** compare the various structure of Indian government.

**CO4:** recognize the human rights, cultural, social and political rights and its relationship with Indian constitution. .

SDG 16: Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels

Application of human, legal and political rights leading to empowerment in real-life situations for protection of fundamental freedoms and freedom from violence, abuse, trafficking and exploitation are at the core of human rights.

**SEMESTER V**

<b>MSD 3281</b>	<b>ENTREPRENEURSHIP</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: All 1-17.</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To understand the fit between individual and their entrepreneurial ambitions.

**COB2:** To identify the customers and find a problem worth solving.

**COB3:** To create a business model for solving the problems of customer, forming solution and present the Business Model Canvas

**COB4:** To develop a solution for customers' problem and analyze the problem solution fit & product market fit.

**COB5:** To build and demonstrate a Minimum Viable Product (MVP) for startup

<b>MODULE I</b>	<b>PROBLEM IDENTIFICATION AND OPPORTUNITY DISCOVERY</b>	<b>9</b>
-----------------	---	----------

Entrepreneurial Thinking, Business Opportunities, Problem Identification, Design Thinking, Potential solutions, Presentation of the problem- Case Study

<b>MODULE II</b>	<b>CUSTOMER, SOLUTION AND BUSINESS MODEL</b>	<b>10</b>
------------------	--	-----------

Customers and Markets, Identification of Customer Segment, Niche Segment, Customers Jobs, Pain and Gain, Early Adopters, Value Proposition Canvas-Case Study, Basics of Business Model-Lean Canvas-Case Study.

<b>MODULE III</b>	<b>VALIDATION AND FINANCIALS</b>	<b>10</b>
-------------------	----------------------------------	-----------

Blue Ocean Strategy, Solution Demo, Problem – Solution Fit, Minimum Viable Product- Product Market Fit, Prototype – Case Study. Cost, Revenues, Pricing, Profitability Checks, Bootstrapping, Initial Financing and Pitching.

<b>MODULE IV</b>	<b>GO TO MARKET</b>	<b>8</b>
------------------	---------------------	----------

Positioning and Branding, Golden Circle model: Sinek's theory value proposition, Branding Elements, Market Penetration Strategy, Collaboration Tools and Techniques, Channels – Case Study

**MODULE V                      MANAGING GROWTH AND FUNDING                      8**

Sales Planning, Customer Acquisition Strategy, Selling Skills, Identifying Funding Sources, Mapping Start-Up Cycle to Funding Options, Funding Plan, , Creating business valuation

**L – 45; TOTAL HOURS – 45**

**TEXT BOOKS:**

3. “Anatomy of Business Plan” – Linda Pinson, OMIM publication , Seventh Edition, 2008.
4. Running Lean: Iterate From Plan A To a Plan That Works, Ash Maurya, "O'Reilly Media, Inc.", 28-Feb-2012.

**COURSE OUTCOMES:**

On completion of the course, students will be able to

**CO1:** Build an entrepreneurial mindset and reach out the customer to identify the problem using design thinking process

**CO2:** Craft solution to the problem through value proposition canvas and develop a business model using lean canvas

**CO3:** Provide product solution demo and deliver a minimum viable product

**CO4:** Work as a team and create brand strategy marketing for product/service

**CO5:** Prepare, make an outstanding sale pitch for startup

<b>CED 3101</b>	<b>STRUCTURAL ANALYSIS – II</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9 &amp; 11</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:** The objectives of the course are

**COB1:** To provide in-depth knowledge on the analysis of structures by the flexibility matrix method.

**COB2:** To impart knowledge on the analysis of beams and frames by the matrix stiffness method.

**COB3:** To understand the concepts and analyse the various types of arches.

**COB4:** To provide knowledge on the analysis of cables and suspension bridges.

**COB5:** To provide knowledge on the concepts of plastic theory and to analyse the beams & rigid frames.

**MODULE I FLEXIBILITY MATRIX METHOD 9**

Degree of static indeterminacy - Primary structure - Compatibility conditions – Characteristics of structure – Flexibility and Stiffness – Relation between stiffness and flexibility co-efficient - Analysis of indeterminate beams, pin-jointed frames, rigid jointed frames.

**MODULE II MATRIX STIFFNESS METHOD 9**

Degree of kinematic indeterminacy - Element and global stiffness matrices– Co-ordinate transformations – Rotation matrix- Compatibility matrix – transformations of stiffness matrices, load vectors and displacement vectors – Analysis of Continuous Beams – Analysis of pin-jointed frames and rigid jointed frames.

**MODULE III ARCHES 9**

Arches structural forms – Examples of arch structures – Types of arches – Analysis of three-hinged and two-hinged arches – fixed, parabolic and circular arches – Settlement and temperature effects.

**MODULE IV CABLES & SUSPENSION BRIDGES 9**

Introduction – Equilibrium of cable – Cable subjected to different kinds of loads – Forces on anchor cables & towers - Analysis of suspension bridges with cables with three and two-hinged stiffening girders.

**MODULE V PLASTIC ANALYSIS OF STRUCTURES 9**

Introduction to plastic theory – assumptions in plastic analysis - Plastic moment of resistance – Plastic modulus – Shape factor – Load factor – Plastic hinge and mechanism – Basic theorems – Methods of plastic analysis – Plastic analysis of beams and rigid frames.

**L – 45; TOTAL HOURS – 45**

**TEXT BOOKS:**

1. Praveen Nagarajan , “Matrix Methods of Structural Analysis”, CRC Press, New York, 2018.
2. Singh, P.K, “ Matrix Structural Analysis”, Dorrance Publishing, Pittsburgh, 2020.
3. Bhavikatti, S. S., “Structural Analysis - II, Vikas Publishing House Pvt. Ltd., 4<sup>th</sup> Edition, New Delhi, 2013.

**REFERENCES:**

3. T. S. Thandavamoorthy, T.S., “Structural Analysis”, Oxford University Press, New Delhi, 2011.

**COURSE OUTCOMES:**

At the end of the course, the students will be able to

**CO1:** Determine the statically degree of indeterminacy and analyze the beams & frames by flexibility matrix method.

**CO2:** Compute the degrees of freedom and apply the stiffness matrix method to analyse indeterminate beams & frames.

**CO3:** Categorize and analyse the various structural forms of arches.

**CO4:** Analyse the cables for various types of loads and evaluate the three and two-hinged stiffening girder suspension bridges.

**CO5:** Use appropriate assumptions to establish the plastic hinge on beams & rigid frames.

**Board of Studies (BoS) :**

SDG – 9 : Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

SDG - 11 : Make cities and human settlements inclusive, safe, resilient and sustainable

Statement : Analysis of structures is more essential to ensure safe and sustainable building.

<b>CED 3102</b>	<b>DESIGN OF SUBSTRUCTURES</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 11</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To give exposure on soil exploration and site investigation.

**COB2:** To provide knowledge on determine bearing capacity of soil and introduce concepts

on settlement of foundation under load.

**COB3:** To impart knowledge on contact pressure distribution and design and proportioning of shallow foundation.

**COB4:** To enable the students to analyze and design various types of pile foundation.

**COB5:** To provide an understanding on earth pressure theories of retaining structures.

**MODULE I SITE INVESTIGATION AND SELECTION OF FOUNDATION 8**

Scope and objectives- Methods of exploration-auguring and boring- Wash boring and rotary drilling-Depth of boring-Spacing of bore hole- Sampling- Disturbed and undisturbed sampling - Sampling techniques- Split spoon sampler, Thin tube sampler, Stationary piston sampler-Bore log report - Penetration tests (SPT and SCPT)- Data interpretation (Strength parameters)

**MODULE II BEARING CAPACITY AND SETTLEMENT OF FOUNDATION 8**

Introduction-Location and depth of foundation- Codal provisions - bearing capacity of shallow foundation on homogeneous deposits- Terzaghi's formula and IS formula -problems - Bearing Capacity from in situ tests (SPT, SCPT and plate load) - Allowable bearing pressure - Settlement - Components of settlement - Immediate settlement and Consolidation settlement - Determination of settlement of foundations on granular and clay deposits - Allowable settlements - Codal provision - Methods of minimizing settlement, differential settlement.

**MODULE III SHALLOW FOUNDATION 12**

Types of foundation - Contact pressure distribution below footings – Design of Isolated footing – Rectangular footing - Combined footings – types - proportioning - Mat foundation - types - use - proportioning – Strap footing - Floating foundation principle.

**MODULE IV PILES****9**

Types of piles and their function - Factors influencing the selection of pile-Load carrying capacity of single pile in granular and cohesive soil. Static formula - dynamic formulae (Engineering news and Hiley's) - Capacity from insitu tests (SPT and SCPT) - Negative skin friction- Group capacity by different methods (Feld.s rule, Converse Labarra formula and block failure criterion)- Settlement of pile groups – Pile load test - Interpretation of pile load test results.

**MODULE V RETAINING WALLS****8**

Plastic equilibrium in soils - Active and Passive states. Rankine's theory - cohesion less and cohesive soil – Coulomb's wedge theory - condition for critical failure plane - Earth pressure on retaining walls of simple configurations – Culmann's Graphical methods - pressure on the wall due to line load.

**L – 45 ; TOTAL HOURS – 45****TEXT BOOKS:**

**COURSE OBJECTIVES:**

The objectives of the course are

**COB1:** To expose the concepts of flow measurements

**COB2:** To familiarize the students with the flow through open channels and most economical sections.

**COB3:** To acquire knowledge on the rapidly and gradually varied flows

**COB4:** To study about the working principles and characteristics of various pumps

**COB5:** To impart knowledge on the working principles and characteristics of various turbines

**MODULE I FLOW MEASUREMENTS 10**

Flow through orifices, mouthpieces - Classification - Hydraulic coefficients - problems, Flow over notches and weirs - Classification - Equation for discharge over rectangular, trapezoidal notches, V-notch - Cippoletti notch - Ventilation of weirs - Discharge over broad crested weirs, narrow crested, submerged weirs – Problems – Velocity measurement using floats and current meter.

**MODULE II FLOW IN OPEN CHANNELS 10**

Definition of open channels – Classification - Types of flow -Geometric properties of open channels - Uniform flow- Velocity measurements - Chezy's and Manning's formulae- Most economical sections - Derivation of conditions for rectangular, triangular, trapezoidal and circular sections - Specific energy – Definitions - specific energy curve - Conditions for minimum specific energy and maximum discharge - Critical flow and its computation.

**MODULE III VARIED FLOWS 9**

Dynamic equations of gradually varied flow – Assumptions – Characteristics of flow profiles – Draw down and backwater curves – Profile determination – Graphical integration, Direct step method - Hydraulic jump – Types and problems – Applications -Energy dissipation- Positive and Negative surges.

**MODULE IV PUMPS 8**

Centrifugal pump –Work done and Efficiency- Minimum speed to start the pump – Multistage Pumps – Jet and Submersible pumps - Positive displacement pumps - Reciprocating pump – Work done and Efficiency - Negative slip - Flow separation conditions - Air vessels - Indicator diagram and its variation - Characteristic curves - Introduction to rotary pumps.

## **MODULE V TURBINES**

**8**

Turbines - Classification - Radial flow turbines - Axial flow turbines – Impulse and Reaction turbines – Work done and Efficiency - Draft tube theory - Performance of turbines - Similarity laws.

### **PRACTICALS**

#### **List of Experiments**

##### **1.FLOW MEASUREMENTS:**

- i) Determination of discharge for Orifice and Mouth piece fitted in a tank by constant and variable head method.
- ii) Determination of co-efficient of discharge for venturimeter and orificemeter.
- iii) Determination of coefficient of discharge for notches.

##### **2.MEASUREMENT OF LOSSES IN PIPES:**

- i) Study on friction in pipes
- ii) Study on minor losses in pipes.

##### **3)PERFORMANCE CHARACTERISTICS OF PUMPS AND TURBINES:**

- i) Performance characteristics of Centrifugal Pump
- ii) Performance characteristics of Reciprocating Pump
- iii) Performance characteristics of Submersible Pump
- iv) Performance characteristics of Pelton turbine

**L – 45; P – 30; TOTAL HOURS –75**

### COURSE OUTCOMES:

At the end of the course the students will be able to

**CO1:** describe the concepts of flow measurements and the use of flow measurement devices.

**CO2:** demonstrate various theories dealing with the flow phenomenon of fluid in an open channel.

**CO3:** analyze the various gradually varied flow profiles in an open channel flow and solve problems related to it.

**CO4:** discuss the working principle and compute the work done, efficiency and performance characteristics

**CO5:** classify turbines in various categories, and compute the work done, efficiency and performance characteristics.

### Board of Studies (BoS):

18<sup>th</sup> BoS of CE held on 05.04.2023

### Academic Council:

20<sup>th</sup> Academic council held on 13.4.2023

**Note:** L- Low Correlation    M -Medium Correlation    H -High Correlation

**SDG 12:** Securing a responsible production and consumption

Acquiring knowledge on the hydraulic machineries help the students to utilize it efficiently. This may lead to minimize the energy consumption.

<b>CED 3104</b>	<b>REPAIR AND REHABILITATION</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 11</b>	<b>OF RC ELEMENTS</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

### **COURSE OBJECTIVES:**

The objective of the course is to impart adequate knowledge on

**COB1:** physical and chemical deterioration mechanisms acting on reinforced concrete (RC) structures in the real time conditions.

**COB2:** condition assessment of distressed RC structures using NDT techniques

**COB3:** materials used in RC repair works

**COB4:** techniques used for rehabilitation of RC structures

**COB5:** seismic retrofitting cum rehabilitation of RC structures

### **MODULE I REPAIR, REHABILITATION AND DETERIORATING MECHANISMS 9**

Definition: Repair, rehabilitation and retrofitting – various facets of maintenance - Physical deteriorating mechanisms: shrinkage & creep - abrasion – erosion – cavitation - freeze and thaw. Chemical deteriorating mechanisms: alkali silica reaction – sulphate attack – corrosion of steel rebar in RC (chloride penetration and carbonation) – microbial induced corrosion.

### **MODULE II CONDITION ASSESSMENT OF RC STRUCTURES 9**

Condition assessment: significance and objectives – various stages – preliminary inspection – planning – visual inspection – laboratory and field testing. Non-Destructive testing techniques for condition assessment: overview – Rebound hammer test, ultrasonic pulse velocity test, concrete resistivity, cover meter, concrete core test and half-cell potential test. Condition assessment of distressed building: case study – report preparation.

### **MODULE III MATERIALS FOR REPAIR 9**

Repair materials – Factors influencing selection of repair materials – various stages of concrete repair – importance of surface preparation – bond coat – rust convertors – rust removers - protective coating to steel rebars - superplasticizers – corrosion inhibitor admixed concrete – micro concrete - polymer modified mortar / concrete – grouting agents – FRP sheets - concrete coatings - sacrificial anodes.

**MODULE IV TECHNIQUES FOR REHABILITATION OF RC ELEMENTS 9**

Rehabilitation techniques – overview, significance and selection methods – dry pack method – overlays – pressure grouting – RC jacketing technique – Plate bonding technique – FRP jacketing technique - ferrocement – guniting and shotcrete – techniques for repairing cracks – sacrificial anode cathodic protection.

**MODULE V CASE STUDIES ON REHABILITATION OF RC ELEMENTS 9**

Case study on rehabilitation of : dampness in buildings, leaky sunken slab, distressed roof slab, distressed overhead RC water tank, corrosion damaged RC bridge, fire damaged building, damaged industrial floors etc.

**L – 45 ; TOTAL HOURS – 45**

**COURSE OUTCOMES:**

At the end of the course, students will be able to

**CO1:** understand the physical and chemical mechanisms detrimental to the RC structures, and need for proper maintenance and timely rehabilitation.

**CO2:** perform condition assessment of distressed building using NDT.

**CO3:** suggest materials for different repair works.

**CO4:** identify the suitable repair techniques for rehabilitation of RC elements.

**CO5:** suggest procedure for rehabilitation of distressed RC structures.

**Board of Studies (BoS) :**

18<sup>th</sup> BoS of CE held on 05.04.2023

**Academic Council:**

20<sup>th</sup> Academic council held on  
13.4.2023

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

SDG 11 : Make cities and human settlements inclusive, safe, resilient and sustainable

1. Development of sustainable infrastructure by understanding the physical and chemical deteriorating mechanisms responsible for repair during its life time.
2. Make the existing human settlements safe and resilient by performing condition assessment of RC structures using NDT and, by adopting suitable repair materials and techniques for its rehabilitation.

**PRACTICALS****List of Experiments:**

1. Georeferencing and rectifying maps.
2. Creation of GIS Data/Feature-based digitization.
3. Adding attributes, using joins and relates.
4. GIS Querying.
5. Convert data from one format to other format.
  - a. Raster to Vector
  - b. Vector to Raster
6. Generation of contour from Digital Elevation Model (DEM)
7. Shortest path analysis using road network.
8. Conversion of KML file from Google Earth into shapefile

SDG 9: Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation.

Statement :

The integrated understanding of the GIS concepts enables all the industrial assets and helps in fostering & managing each of them better by saving cost and maximizing productivity.

<b>CED 3106</b>	<b>INTERNSHIP - I</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9 &amp;11</b>		<b>0</b>	<b>0</b>	<b>2</b>	<b>1</b>

**GENERAL GUIDELINES:**

- It is a **one credit course** for 15 days of summer Industrial internship that has to be completed after IV semester and will be evaluated in the V semester
- Students should choose preferably, government agencies/ IIT's/ NIT's /major industries in their specialization to do their internship
- At the end of industrial internship, the student shall submit a certificate and feedback from the organization. Students should also submit a brief report.
- The evaluation will be made based on this report and a Viva-Voce Examination, conducted internally by a Departmental Committee constituted by the Head of the Department.

**Board of Studies (BoS) :**18<sup>th</sup> BoS of CE held on 05.04.2023**Academic Council:**20<sup>th</sup> Academic council held on 13.4.2023

SDG – 9 : Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation

SDG 11 : Make cities and human settlements inclusive, safe, resilient and sustainable

Statement : The industry internship shall impart the students the need for sustainable and resilient infrastructure, in the real time context, with respect to all aspects of civil engineering

<b>CED 3201</b>	<b>DESIGN OF STRUCTURAL</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>	<b>STEEL ELEMENTS</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

### **COURSE OBJECTIVES:**

The **COB1:** To impart knowledge to students on the significance of steel structures, structural steel sections and its connection design.

**COB2:** To enable the students to design the tension members and splices.

**COB3:** To provide knowledge to design the compression members and column bases.

**COB4:** To impart knowledge on the design of simple beams and plate girders.

**COB5:** To enable the students to understand and design the roof trusses.

### **MODULE I CONNECTIONS 9**

Indian standard structural steel sections - Review of IS 800 - 2007: General design requirements - Metal joining methods - types of connections - Bolted connection - failure modes - IS 800 codal provisions - Shear, bearing and tension capacity of bolts - Design of lap joint, butt joint -types of eccentric connection - Design of bracket connection - bolts subjected to combined shear and tension. Welded connection - Design of welded lap joint - bracket connection.

### **MODULE II TENSION MEMBERS 9**

Types of sections - behaviour of tension members - Design strength due to yielding, rupture of critical section and block shear - IS 800 :2007 codal provisions for design - importance of lug angle - concept of shear lag - Design tensile strength of plates and angles - Design of tension members - Design of tension splice.

### **MODULE III COMPRESSION MEMBERS 9**

Types of members and forms - short column, long column and buckling phenomenon - slenderness ratio - effective length – buckling class - IS 800 : 2007 codal provisions for design - Design of simple column - Design of laced and battened columns - Column bases - Design of slab base and gusseted base - connection details.

### **MODULE IV BEAMS 9**

Importance and functions - behaviour of steel beams - web crippling and web buckling - IS 800 codal provisions for design - design of simply supported

beams - design of laterally unsupported beams - built up beams - beams subjected to biaxial bending - Design of plate girder, intermediate and bearing stiffeners .

## **MODULE V ROOF TRUSSES 9**

Types of roof trusses - components - load combinations - IS 875 codal provisions - Design wind speed, wind pressure and wind loads - Wind pressure calculation on buildings in hilly terrain - Design of purlin for load combinations - design load on roof truss.

**L – 45:TOTAL HOURS – 45**

### **TEXTBOOKS:**

1. Bhavikatti,S.S., "Design of Steel Structures", I.K International Publishing House Pvt. Ltd., New Delhi, 2010.
2. Shah, V.L. and Veena Gore, "Limit State Design of Steel Structures", Structures Publications, Pune, 2010.
3. Duggal, S.K., "Design of Steel Structures", Tata McGraw-Hill Publishers, New Delhi, 2009.

### **REFERENCES:**

3. IS 800 - Indian Standard general construction in steel - Code of Practice, Bureau of Indian Standards, New Delhi.

### **COURSE OUTCOMES:**

After completion of the course, the students will be able to

**CO1:** determine the composition, properties and sections used for steel structures and design appropriate connections between structural members as per IS codal provisions.

**CO2:** identify the different failure modes in tension members and select the most suitable section shape and size for the design of tension members.

**CO3:** determine the lateral buckling length of compression members and design the column & column bases with suitable connection details.

**CO4:** analyse and design the beams, built-up sections and plate girders in accordance to the Indian standards.

**CO5:** estimate the wind pressure as per Indian standards, analyze and design the members of a steel roof truss under gravity and wind loads.

**Board of Studies (BoS) :**

18<sup>th</sup> BoS of CE held on 05.04.2023

**Note:** L- Low Correlation    M -Medium Correlation    H -High Correlation

SDG : 9 Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation

Statement : The sustainable design of steel structures results in the development of durable and resilient infrastructure.

<b>CED 3202</b>	<b>CONSTRUCTION MANAGEMENT</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9&amp;11</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

The objective of the course is to impart knowledge on

**COB1:** planning of construction projects.

**COB2:** scheduling of activities using network diagrams.

**COB3:** resource planning for a project.

**COB4:** cost control and cash flow for a project.

**COB5:** quality control and safety during construction.

**MODUE I CONSTRUCTION PLANNING 9**

Basic concepts in the development of construction plans - Choice of technology and construction method- plan development process - Activities - estimating resource requirements for work activities - estimating activity durations - work breakdown structure - Coding systems - defining precedence relationships among activities - Tools for scheduling - Gant chart Development of project network AOA and AON diagrams - Infrastructure projects.

**MODULE II SCHEDULING PROCEDURES AND TECHNIQUES 9**

scheduling techniques- CPM - Earliest and Latest times - different types of floats - significance- calculation of critical path method-PERT - terms and definitions - network and solving problems using PERT - standard deviation and probability calculation in PERT.

**MODULE III RESOURCE PLANNING 9**

Materials: Inventory control - terms and definitions - types of inventory -EOQ – ABC Analysis - reasons for maintain inventory - different tools for inventory. Equipment: Classification of major construction equipment- planning and selecting of equipment- Equipment productivity – Fleet management. Labor: labor schedule - leveling resources - resource leveling strategies- scheduling with resource constraints.

**MODULE IV COST CONTROL MONITORING 9**

Cost – Types of Cost - crashing and time/cost tradeoffs - Control of project - Cost control problem-Project budget- Earned Value Analysis – Terms & Definitions - Schedule and budget updates- Calculating Contract Cash flow – Minimizing Contractor negative cash flow

**MODULE V      QUALITY AND SAFETY MANAGEMENT      9**

Quality – Total quality management – Quality policy – Quality circle manual – standard operating procedures - quality checklists – statistical quality control – codal provisions – IS 456 - Accidents; their causes and effects, costs of accidents, Safety concerns in construction – safety policy – manual –standard – Safety Meetings – Personal Protection Equipment

3. [James P. Lewis](#), "Project Planning, Scheduling, and Control: The Ultimate Hands-On Guide to Bringing Projects in On Time and On Budget", Mc Grew Hill, New York, 2010.

**COURSE OUTCOMES:**

At the end of the course, students will be able to

**CO1:** Create WBS and precedence relationships among activities

**CO2:** perform the CPM and PERT analysis method of scheduling

**CO3:** select the material and equipment resources for optimization

**CO4:** solve the cash flow problem and financial accounting systems on site

**CO5:** apply statistical quality control techniques and list the safety and quality control checklist on site

**Board of Studies (BoS) :**18<sup>th</sup> BoS of CE held on

**Note:** L- Low Correlation    M -Medium Correlation    H -High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

SDG 11: Make cities and human settlements inclusive, safe, resilient and sustainable

The holistic understanding of planning and scheduling of time cost and resources to avoid unnecessary wastage of resources and sustainable development.

**PROFESSIONAL ELECTIVES**

<b>CEDX 04</b>	<b>EARTHQUAKE RESISTANT</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9 &amp; 11</b>	<b>DESIGN OF STRUCTURES</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To provide a basic understanding of the earthquake phenomena and its measurements.

**COB2:** To impart knowledge on the conceptual design due to seismic action.

**COB3:** To provide an in-depth understanding of the seismic method of analysis and seismic performance of structures.

**COB4:** To give exposure to the various codal provisions of the seismic-resistant of structures.

**COB5:** To provide insight knowledge on the seismic retrofitting techniques of structures.

**MODULE I            ELEMENTS OF ENGINEERING SEISMOLOGY            9**

Elements of engineering seismology - characteristics of earthquake-earthquake size- plate tectonics – types of seismic waves – terms associated with earthquakes -Magnitude/Intensity of an earthquake-scales-Energy released - Earthquake measuring instruments- Seismoscope – seismographs, accelerograph - effect of earthquake - earthquake history-seismicity zone of India.

**MODULE II            SEISMIC DESIGN PHILOSOPHY            9**

Earthquake load on simple buildings – Simplicity and Symmetry – Plan configuration – Horizontal and Vertical Members - Pounding effects – Stiffness and Strength – Flexible Building and Rigid Building Systems- Torsion in structural system - Lateral load resisting structural systems.

**MODULE III            EARTHQUAKE            RESISTANT            DESIGN            OF            9**  
**STRUCTURES**

Requirements for Seismic Design – Framed buildings - Masonry Buildings - Structural Walls and Non-Structural Elements - Performance of structures under past earthquakes- lessons learnt from past earthquakes - Basic Load Combinations – Seismic Method of Analysis - Design earthquake loads – equivalent static force procedure as per IS 1893 – 2016.

**MODULE IV DUCTILE DETAILING OF STRUCTURAL MEMBERS 9**

Introduction to Indian Standard Codes -IS:4326 and IS13920- detailing for seismic resistance of beam-column joints, beams, columns and footings.

**MODULE V SEISMIC RETROFITTING OF STRUCTURES 9**

Base isolation – Seismic dampers – GOI guidelines on Seismic Retrofitting of Deficient Buildings and Structures – Case study.

**L – 45; TOTAL HOURS – 45**

**TEXT BOOKS:**

1. Duggal, S.K., “Earthquake Resistant Design of Structures”, Oxford University Press, 2<sup>nd</sup> Edition, New Delhi, 2013.
2. Pankaj Agrawal, Manish Shrikhande, “Earthquake Resistant Design of Structures”, PHI Learning Pvt. Ltd., New Delhi, 2006.
3. Muhammad Hadi and Mehmet Eren Uz, “Earthquake Resistant Design of Buildings”, CRC Press, Florida, 2017.

5. IS13920 “Ductile Detailing Of Reinforced Concrete Structures Subjected to Seismic Forces - Code Of Practice” Bureau of Indian Standards, New Delhi.

**COURSE OUTCOMES:**

At the end of the course, the students will be able to

**CO1:** Explain the types of seismic waves, measure the magnitude of the earthquake and recognize the characteristics of the earthquake.

**CO2:** Describe the effect of building configuration under seismic motion.

**CO3:** Perform the seismic analysis of structures using various methods and describe the performance of structures.

**CO4:** Critically use the various codal provisions for the earthquake resistant design of structures.

**CO5:** Identify the seismic damage evaluation of structures and suggest suitable retrofitting techniques.

3. K.P.Jaya, "Connections in Precast Structures", Anna University, CSIR-CBRI Roorkee, 2016

**COURSE OUTCOMES:**

At the end of the course, the students will be able to

**CO1:** Describe the design principles adopted for the construction of prefabricated structures.

**CO2:** Elucidate the various components utilized for prefabricated structures.

**CO3:** Explicate the manufacturing methods and erection techniques of prefabricated structures.

**CO4:** Apply the design principles involved in the precast construction of the factory and single-storeyed structures.

**CO5:** Elaborate on the concepts of pre-engineered buildings for construction.

SDG – 9 : Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation

SDG - 11 : Make cities and human settlements inclusive, safe, resilient and sustainable

Statement : It is necessary to make the building safer, efficient, affordable and sustainable structures for the future generation.

<b>CEDX 09</b>	<b>INTRODUCTION TO STEEL-</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9 &amp; 11</b>	<b>CONCRETE COMPOSITE</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>
	<b>STRUCTURES</b>				

**COURSE OBJECTIVES:**

**COB1:** To introduce and understand the basic concepts of steel-concrete composite construction.

**COB2:** To understand the fundamentals of various composite members

**COB3:** To familiarise with the various design concepts of connections for constructing the composite structural members.

**COB4:** To understand the basic concepts and behaviour of composite box girder bridges

**COB5:** To give exposure to the various case studies of steel-concrete composite construction in buildings

**MODULE I CONCEPTS OF STEEL-CONCRETE COMPOSITE CONSTRUCTION 9**

Introduction to steel-concrete composite construction - theory of composite structures - introduction to steel-concrete - steel sandwich construction.

**MODULE II COMPOSITE MEMBERS 9**

Behaviour of composite beams - columns - design concepts of composite beams - steel - concrete composite columns - design of composite trusses – Codal recommendations.

**MODULE III CONNECTIONS 9**

Types of connections - design concepts of connections in the composite structures - shear connections - design of connections in composite trusses –Codal recommendations.

**MODULE IV COMPOSITE BOX GIRDER BRIDGES 9**

Introduction - behaviour of box girder bridges – Requirements of various components of boxgirder bridges – Design concepts

**MODULE V CASE STUDIES 9**

Case studies on steel-concrete composite construction in buildings – Failure modes of steel concrete composite members – Seismic behaviour of composite structures.

**L – 45; TOTAL HOURS – 45**

3. Oehlers, D.J., and Bradford, M.A., "Composite Steel and Concrete Structural Members : Fundamental Behaviour", Elsevier, London, 2013.

**COURSE OUTCOMES:**

At the end of the course, the students will be able to

**CO1:** Describe the composite structures using various theories.

**CO2:** Elucidate the behaviour and various design concepts of composite beams and columns.

**CO3:** Identify the suitable design for the connections in composite structures.

**CO4:** Apply the design principles for the construction of composite box girder bridges.

**CO5:** Explicate the steel-concrete composite construction in buildings through case studies.

SDG – 9 : Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

SDG - 11 : Make cities and human settlements inclusive, safe, resilient and sustainable

Statement : Promote sustainable and high-performance design of composite structures for a resilient society.

<b>CEDX 16</b>	<b>ADVANCED CONCRETE</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 11</b>	<b>TECHNOLOGY</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

The objective of the course is to impart adequate knowledge on

**COB1:** usage of mineral and chemical admixtures in concrete

**COB2:** mechanism of corrosion of steel rebar in concrete and protection methods

**COB3:** ready-mix concrete and self-compacting concrete

**COB4:** Non-destructive testing techniques to assess distress in concrete

**MODULE I MINERAL ADMIXTURES IN CONCRETE 9**

Supplementary cementitious materials : source, significance and overview. Flyash (different classes), silica fume, metakaoline, blast furnace slag, rice husk, titanium-di-oxide : properties – influence on fresh concrete, hardened concrete, microstructure and durability properties of concrete.

**MODULE II CHEMICAL ADMIXTURES IN CONCRETE 9**

Chemical admixtures for concrete: overview and significance. Water reducers / plasticizers : types, working mechanism, optimum dosage, influence on workability and application areas. Viscosity modifying agents, retarders, set accelerators, air entraining agents, damp-proofers, water repelling admixtures, shrinkage reducing admixtures and corrosion inhibitors : types, brief working mechanism and application areas.

**MODULE III CORROSION OF STEEL IN CONCRETE 9**

Mechanism of corrosion of steel in concrete – causes and influencing parameters –Carbonation, chloride attack, microbial induced corrosion and acid attack: deteriorating mechanism - consequences of corrosion in reinforced concrete and pre-stressed concrete structures - Corrosion protection methods: overview - Protective coating to steel rebars: fusion bonded epoxy coating, galvanization and cement polymer anticorrosive coating – sacrificial anode cathodic protection.

**MODULE IV READY MIX CONCRETE AND SELF COMPACTING CONCRETE 9**

Ready mix concrete: ingredients, mix proportion, mix design, manufacturing process and good construction practices. Self compacting concrete:

ingredients, mix design as per EFNARC guidelines, workability requirements of SCC : Abrams cone, J-ring, V-funnel, L-box and U-box, good construction practices and application areas.

## **MODULE V NON-DESTRUCTIVE TESTING TECHNIQUES 9**

Non-Destructive techniques for assessing distress in concrete members: overview – Rebound hammer test, ultrasonic pulse velocity test, concrete resistivity, cover-meter, concrete core test, half-cell potential test, tests for carbonation and chloride content.

**L – 45 ; TOTAL HOURS – 45**

### **COURSE OUTCOMES:**

At the end of the course, students will be able to

- CO1:** understand the significance of addition of mineral admixtures in concrete for varied applications.
- CO2:** suggest the chemical admixtures for real time applications
- CO3:** describe the manufacturing of ready-mix concrete
- CO4:** perform mix design of self-compacting concrete as per EFRAC standards

**CO5:** describe mechanism of corrosion in concrete and suggest protection measures

**CO6:** describe NDT techniques to assess distress in concrete structures

**Board of Studies (BoS) :**

16<sup>th</sup> BoS of Civil held on 05.01.2022

**Academic Council:**

SDG 11 : Make cities and human settlements inclusive, safe, resilient and sustainable

Designing of durable and sustainable concrete by using mineral admixtures, chemical admixtures in concrete, adopting corrosion protection methods during construction and monitoring well-being of structures using NDT techniques, make the human settlements safe and resilient and leads to sustainable development.

<b>CEDX 17</b>	<b>WATERPROOFING OF CONCRETE</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 11</b>	<b>AND MASONRY STRUCTURES</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

The objective of the course is to impart adequate knowledge on

**COB1:** principles of waterproofing and designing envelope for concrete structures

**COB2:** below-grade waterproofing, designing and relevant materials

**COB3:** above-grade waterproofing, designing procedures and relevant materials

**COB4:** waterproofing problems in residential buildings and protection systems

**COB5:** remedial waterproofing of distressed concrete structures

**MODULE I PRINCIPLES OF WATERPROOFING 9**

Introduction to waterproofing and envelope design – water sources – designing to prevent leakages in concrete structures. Basic envelope design – most important waterproofing principles – preventing water infiltration – beyond envelope waterproofing.

**MODULE II BELOW-GRADE WATERPROOFING 9**

Introduction – surface water control – ground water control – manufactured drainage systems – waterstops – hydrophilic bentonite / asphalts. Capillary action – positive and negative systems – cementitious system – metallic system – acrylic modified system – chemical additive system. Fluid applied systems – urethane – rubber derivatives – polymer asphalt etc.

**MODULE III ABOVE-GRADE WATERPROOFING 9**

Introduction – difference from below-grade waterproofing systems – vertical applications – horizontal applications – above-grade exposure problems. Materials – clear repellents – film forming sealers – penetrating sealers – choosing appropriate repellents – cementitious coatings – elastomeric coatings – deck coatings. Roof waterproofing – interior waterproofing on masonry elements - applications.

**MODULE IV RESIDENTIAL WATERPROOFING 9**

Introduction – Multiple residents and single family construction. Below-grade waterproofing – substrate – ground water control – positive versus negative waterproofing – basement waterproofing systems. Above-grade waterproofing

– exterior insulate finish systems – terminations and transitions – roof waterproofing systems – masonry waterproofing systems.

### **MODULE V REMEDIAL WATERPROOFING**

**9**

Introduction – remedial applications – visual inspection – non-destructive testing – destructive testing – cause determination and methods of repair. Cleaning surfaces – types. Restoration work – pointing – grouting – epoxy injection – cementitious patching – shotcrete – overlays.

**L – 45 ; TOTAL HOURS – 45**

#### **COURSE OUTCOMES:**

At the end of the course, students will be able to

**CO1:** understand scientific principles involved in design of waterproofing

envelope for concrete and masonry structures.

**CO2:** identify below-grade waterproofing system for different applications

**CO3:** identify above-grade waterproofing system for different applications

**CO4:** design waterproofing system for residential application

**CO5:** conduct condition assessment on concrete and masonry elements distressed with water leakage and suggest remedial methods.

**Board of Studies (BoS) :**

18<sup>th</sup> BoS of CE held on

SDG 11 : Make cities and human settlements inclusive, safe, resilient and sustainable

3. Development of sustainable infrastructure by understanding the principles of waterproofing in buildings.

4. Make the existing human settlements safe and resilient by identifying suitable waterproofing materials, and adopting feasible techniques based on application areas.

<b>CEDX 18</b>	<b>CORROSION PREVENTION AND</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9&amp;11</b>	<b>CONTROL IN RC STRUCTURES</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

The objective of the course is to impart adequate knowledge on

**COB1:** durability of reinforced concrete (RC) and various factors affecting the same.

**COB2:** mechanism of corrosion of steel in concrete, its major causes, influencing parameters and consequences.

**COB3:** techniques and methods for condition assessment, corrosion prevention, and corrosion control in RC structures.

**MODULE I DURABILITY OF RC STRUCTURES 9**

Durability – significance – influence on life cycle cost – factors affecting durability of RC : water-cement ratio, permeability, microstructure formation, resistivity and electrical resistance, concrete cover and exposure conditions.

**MODULE II MECHANISM OF CORROSION OF STEEL IN RC 9**

Corrosion of metals - mechanism of corrosion of steel in concrete – passivation - galvanic corrosion, causes of corrosion : carbonation - chloride attack – microbial induced corrosion – influencing parameters, corrosion damage in RC structures - cost of corrosion - worldwide scenario.

**MODULE III CORROSION PREVENTION IN RC STRUCTURES 9**

Control of carbonation - control of chlorides – corrosion prevention methods : high performance concrete, corrosion inhibitors, protective coating to steel rebars, galvanized rebars, stainless steel rebars, sealers and membranes and cathodic protection.

**MODULE IV CONDITION EVALUATION AND CORROSION RATE MEASUREMENT 9**

Preliminary survey - visual inspection, detailed survey – delamination survey - cover – half-cell potential measurements - carbonation depth measurement - chloride determination - resistivity measurement, corrosion rate measurement : macrocell corrosion test and accelerated corrosion studies.

**MODULE V CORROSION CONTROL IN RC STRUCTURES 9**

Physical and chemical rehabilitation techniques – coatings - sealers and membranes - corrosion inhibitors, electrochemical repair techniques – basic principles –cathodic protection.

SDG – 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

SDG - 11: Make cities and human settlements inclusive, safe, resilient and sustainable

Statement: The knowledge on importance of durability on life cycle cost, corrosion prevention and control methods, and corrosion auditing in RC structures shall lead to construction of safe and resilient infrastructure by giving emphasize to sustainability and innovation.

<b>CEDX 20</b>	<b>INTELLIGENT BUILDING</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>	<b>MANAGEMENT SYSTEM</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

The objective of the course is to impart knowledge on

**COB1:** the concepts of Intelligent buildings

**COB2:** HVAC systems

**COB3:** fire alarm and Surveillance system

**COB4:** access control and intruder alarm system

**COB5:** performance of smart buildings.

**MODULE I BASIC CONCEPTS 9**

Concept and application of Building Management System (BMS) and Automation, requirements and design considerations and its effect on functional efficiency of building automation system, architecture and components of BMS – Cost – Energy savings.

**MODULE II HVAC SYSTEMS 9**

Fundamentals: Introduction to HVAC, HVAC Fundamentals, Basic Processes (Heating ,Cooling etc) Basic Science: Air Properties, Psychometric Chart, Heat Transfer mechanisms, Examples. Human Comfort: Human comfort zones, Effect of Heat, Humidity, Heat loss. Processes: Heating Process & Applications (I.e. Boiler, Heater), Cooling Process & Applications (I.e. Chiller), Ventilation Process & Applications (I.e. Central Fan System, AHU, Exhaust Fans), Unitary Systems (VAV, FCU etc).

**MODULE III FIRE ALARM AND SURVILLANCE SYSTEM 9**

Introduction To Fire Alarm System - Need For Fire Alarm System - Types Of Fire Detectors -Types of Fire Panels - Conventional And Addressable System - Input-Output Modules - Indicators & Annunciators - Fire Cables And Classes Of Wiring - Sprinkler System – Design – Components – Types.

Survillence system - Design. CCTV: Camera: Operation & types, Camera Selection Criteria, Camera Applications, Components of CCTV system like cameras, types of lenses, typical types of cables, controlling system. CCTV Applications: CCTV Applications. Introduction.

**MODULE IV ACCESS CONTROL AND INTRUDER ALARM SYSTEM 9**

Access Control System Topology – Credentials – Pin – Card – Biometric - Card Types - Biometric System – Behavioral – Physical - Reader Types- Locking devices - Exit Switch & Status Detectors-Panel Communication Protocols-Introduction To Intruder Alarm System-Need For Intruder Alarm System-Intrusion Detector Types-Door Magnetic Contact-Vibration Detectors-Motion Detectors-Glass Break Detectors-Panic Switches-Hardware And Software Types Zone-Zone Attributes-Keypad Types-Panel Types-Zone Partitioning

## **MODULE V PERFORMANCE OF BUILDINGS 9**

Intelligent buildings-Building automation- Building services in high rise buildings-Green buildings- Case studies of residence, office buildings and other buildings in each zones. BMS and energy savings Energy management systems – BMS benefits smart home - smart office

**L – 45 ; TOTAL HOURS – 45**

<b>CEDX 21</b>	<b>AUTOMATION IN</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG : 9</b>	<b>CONSTRUCTION AND</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>
	<b>MANAGEMENT</b>				

**COURSE OBJECTIVES:**

The course will impart knowledge on the

**COB 1** : automation and use of robots in construction

**COB 2** : basic concept of automation techniques and sensors in construction.

**COB 3**: existing and prototype equipment for construction.

**COB 4**: data networking and internet protocols.

**COB 5**: concept and impact of construction robots in construction.

**MODULE I BASIC CONCEPTS 9**

Automation in construction - Principles and Strategies of Automation, Basic Elements of an Automated System, Advanced Automation Functions, Levels of Automations. Review and analysis of state-of-art in construction automation – current scenario

**MODULE II EMERGING TECHNIQUES 8**

ICT technologies – power line communication in home building automation systems – virtual reality systems – Programmable Logic Controller - Supervisory Control and Data Acquisition - sensors – type of sensors.

**MODULE III CONSTRUCTION AUTOMATION AND ROBOTICS 10**

Off- site automation in construction Information processing (computer applications), - Existing and prototype equipment for construction – Cranes – Tunnel Boring Machines - final product design session - Off-site automated prefabrication systems- On-site automated and robotic systems.

**MODULE IV NETWORKING IN CONSTRUCTION 9**

Data networking– wireless transmission media – network devices – internet protocols - Gamma building control – energy-efficient building and room automation.

**MODULE V CONSTRUCTION ROBOTS 9**

Selection of construction robots – factors - robotic technologies for customized component - Activated concrete cutting robot, concrete

floor finishing robot- Ceiling panel positioning robot- Exterior wall painting robot-safety and training- case studies - Task construction robots – 3D printing.

**L- 45; Total Hours – 45**

**TEXT BOOKS:**

1. Javad Majrouhi Sardroud, "Automated Management of Construction Projects" LAP Lambert Academic Publishing, 2011.

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The holistic understanding of automation in the construction system will lead to sustainable construction management.

<b>CEDX 23</b>	<b>HOUSING, PLANNING AND</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>	<b>BYELAWS</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

The objective of the course is to impart adequate knowledge on

**COB1:** various types of housing and contemporary housing policies.

**COB2:** the different types of housing programmes and the role of various organizations.

**COB3:** the planning and design of housing projects

**COB4:** the finance for housing projects

**COB5:** building byelaws for housing projects.

**MODULE I BASIC CONCEPTS 9**

Definition of Basic Terms – House, Home, Household, Apartments, Multi storied Buildings, Special Buildings, Objectives and Strategies of National Housing Policies, Principle of sustainable housing.

**MODULE II HOUSING PROGRAMMES 9**

Basic Concepts, Contents and Standards for Housing Programmes - Sites and Services, Neighbourhoods, Open Development Plots, Apartments, Rental Housing, Co-operative Housing, Slum Housing Programmes, Role of Public, Private and Non-Government Organizations. Institutions for Housing at National, State and Local levels.

**MODULE III PLANNING AND DESIGN 9**

Formation of Housing Projects and its principles – Elements of Site Analysis - Layout Design of Housing - Design of Housing Units (Design-Problems).

**MODULE IV HOUSING FINANCE AND PROJECT APPRAISAL 8**

Appraisal of Housing Projects – Housing Finance, Cost Recovery – Cash Flow Analysis, Subsidy and Cross Subsidy, Pricing of Housing Units, Rents, Recovery Pattern (Problems).

**MODULE V HOUSING LAWS AND DEVELOPMENT REGULATIONS 10**

Housing Laws at State level - Working of building bye-laws in planning practice at Urban and Rural level – Development Control Regulations

(DCR)- Requirements for grant of building permissions; Streamlining the development control regulations; Zoning regulations of DCR ; UDPFI Guidelines; National Building Code and its implementation - Documents required for the approval of the building plan.

**L – 45 ; TOTAL HOURS – 45**

**TEXT BOOKS:**

1. Watson, D., Crosbie, M.J., “Time Saver Standards for Architectural Design”, Tata McGraw Hill, 8th Edition, 2011.
2. Hosack, W.M., “Land Development Calculations”, McGraw Hill, USA , 2nd Edition, 2010.

**REFERENCES:**

2. Goody, J., Chandler, R., Clancy, J., Dixon, D., Wooding, G., “Building Type Basics for Housing”, John Wiley and Sons, New Jersey, 2010.

**COURSE OUTCOMES:** At the end of the course, students will be able to

**CO1:** explain the basic concepts about different types of housing, policies and principle of sustainable housing.

**CO2:** impart knowledge on various housing programmes.

**CO3:** describe the basic principles of *planning a house* and designing the life space

**CO4:** analyse the housing cost and select finance for housing projects.

**CO5:** describe the housing bye laws at different administrative levels and its development and control regulations

**Board of Studies (BoS) :**

18<sup>th</sup> BoS of CE held on 05.04.2023

**Note:** L- Low Correlation    M -Medium Correlation    H -High Correlation

SDG 9 : Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The holistic understanding of housing rules, policies and byelaws will lead to sustainable housing.

**MODULE IV                      GEOLOGY FOR CIVIL ENGINEERING                      10**

Geological conditions necessary for the construction of tunnels, dams, reservoirs, Tunnels – types of tunnels, geological investigations, soft ground tunneling, Dams - types of dams, geotechnical considerations, geological characters for investigation, forces acting on a dam, Reservoirs – Geological Investigations, silting of reservoirs, Geophysical investigations – electric method, seismic method, gravitational method, magnetic method.

**MODULE V                      MISCELLANEOUS APPLICATIONS                      8**

Landslides - Causes and effects, Coastal erosion and coastal prevention structures - Remote sensing applications in mineral exploration – case studies.

**L – 45; TOTAL HOURS – 45**

**TEXTBOOKS:**

3. <https://geologyscience.com/methods-of-geology/structural-geology/>

**COURSE OUTCOMES:**

After completion of the course, the students will be able to

**CO1:** identify the geological parameters required for the construction, planning and design of civil engineering structures.

**CO2:** demarcate and differentiate between rock types and minerals to be used as construction materials.

**CO3:** identify the areas of weakness in a zone, consider, and eradicate the weakness during the civil engineering projects.

**CO4:** select the necessary geological conditions of tunnels, dams and reservoirs.

**CO5:** employ remote sensing techniques in exploring the mineral and rock types.

SDG 11: Make cities inclusive, safe, resilient and sustainable.

The integrated knowledge of mineral and rock properties under different geological conditions helps in designing an economical and safe foundation leading to the construction of resilient infrastructure.

<b>CEDX 32</b>	<b>GROUND IMPROVEMENT</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 11</b>	<b>TECHNIQUES</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To familiarize the students with geotechnical problems in soil

**COB2:** To understand the various drainage methods available for dewatering of soil

**COB3:** To impart knowledge about selection, design, and construction aspects of ground improvement techniques in problematic soils

**COB4:** To understand the application of geo-synthetics in soil reinforcement

**COB5:** To provide knowledge on stabilization of soil

**MODULE I BASIC CONCEPTS 7**

Role of ground improvement in foundation engineering - methods of ground improvement - Geotechnical problems in alluvial, laterite and black cotton soils - Selection of suitable ground improvement techniques based on soil condition

**MODULE II DRAINAGE AND DEWATERING 8**

Drainage techniques - Well points - Vacuum and electro osmotic methods - Seepage analysis for two dimensional flow

**MODULE III INSITU TREATMENT OF COHESIONLESS AND COHESIVE SOILS 9**

Insitu densification of cohesion less and consolidation of cohesive soils - Dynamic compaction and consolidation - Vibro floatation - Sand pile compaction - Preloading with sand drains and fabric drains- Stone columns - Lime piles - Installation techniques only - relative merits of various methods and their limitations.

**MODULE IV EARTH REINFORCEMENT 9**

Concept of reinforcement - Types of reinforcement material - Applications of reinforced earth - use of Geotextiles for filtration, drainage and separation in road and other works.

SDG 11 : Make cities and human settlements inclusive, safe, resilient and sustainable

Statement : The understanding of the importance of sub soil investigation and its implementation paves to safe environment and sustainable structure.

**Note:** L- Low Correlation    M -Medium Correlation    H -High Correlation

SDG 11 : Make cities and human settlements inclusive, safe, resilient and sustainable.

The knowledge of various Geosynthetics applications in the field of Civil engineering leads to the development of sustainable environment and resilient structure.

<b>CEDX 56</b>	<b>WATER DISTRIBUTION SYSTEMS</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 6</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

### **COURSE OBJECTIVES:**

**COB1:** To educate the students with basic concepts of water distribution system

**COB2:** To emphasis on the analysis of water distribution network.

**COB3:** To familiarize on the storm water runoff estimation and buried pipes.

**COB4:** To assess the design concepts of water distribution system.

**COB5:** To gain knowledge on the basic concepts of fluid transients

### **MODULE I WATER SUPPLY SYSTEMS 9**

Water requirement – Sources of water – Water demand – Reservoir storage – Nodal hydraulic gradient level values - Water supply consideration, Types of water supply systems- Piping system- Distribution network –Labeling- Network components – Network models – Design – Optimization in practice.

### **MODULE II HYDRAULIC PRINCIPLES AND NETWORK PARAMETERS 10**

Energy and hydraulic gradient lines – Head loss in links – Equivalent pipes – series – Parallel pipes – Path head loss and loop head loss – Analysis of water distribution network- Static node and Dynamic node – Network performance – flow analysis - Layout – in situ lining - Pipes material – Appurtenances – Minimization of water losses – Leak detection.

### **MODULE III STORM WATER DISTRIBUTION AND BURIED PIPES 9**

Planning – Runoff estimation – Rainfall data analysis – Storm water drains design Introduction to Buried pipes – External loads – Gravity flow design, Pressurized flow- Rigid and Flexible pipes – Installation – Trenchless technology.

### **MODULE IV RELIABILITY ASSESSMENT AND DESIGN 8**

Uncertainty and Reliability – Affecting events- Assessment – Reliability parameters –Configurations - Design methodology - Strengthening and Expansion.

### **MODULE V FLUID TRANSIENTS 9**

Basic equations of unsteady flows through closed conduits – methods – characteristics - Transients caused by centrifugal pumps and hydroelectric power plants.

**L – 45; TOTAL HOURS – 45**

**TEXT BOOKS:**

1. Bajwa. G. S, Practical handbook on Public Health Engineering, Deep publishers, Shimla 2003.
2. Bhave P. R, Optimal design of water distribution networks, Narosa publishing House, New Delhi, 2003.
3. Wurbs R.A., and James W.P. Water Resources Engineering. Prentice Hall of India, Eastern Economic Edition. ISBN: 81-203-2151-0, New Delhi, 2007.

**REFERENCES:**

2. Manual on storm water drainage system, CPHEEO, Ministry of Urban Development, GOI, New Delhi, 2019.
3. Manual on water supply and treatment, CPHEEO, Ministry of Urban Development, GOI, New Delhi, 1999.
4. Moser A. P, Buried pipe Design, 3<sup>rd</sup>Edition, American Water Works Association, 2008.

**COURSE OUTCOMES:**

At the end of the course the students will be able to

**CO1:** define the water supply and demand and water distribution network creation for the effective water supply system.

**CO2:** assess the knowledge of hydraulics in the field of pipe line system and analyze the branch and loop network flow

**CO3:** explain storm water drain buried pipeline system. Design the underground storm water drainage system with hydraulic appurtenances

**CO4:** analyze the reliability of the water supply distribution system and prepare the detailed methodology for risk management and strengthening the system.

**CO5:** apply and design the unsteady flow pipe line network in order to withstand the surge/transient developed due to power failure of centrifugal pump and also due to hydroelectric power plant.

**Board of Studies (BoS) :**16<sup>th</sup> BOS of Civil held on 5.1.2022**Academic Council:**18<sup>th</sup> Academic Council held on  
24.02.2022

SDG 6: Clean and accessible water for all which is an essential part of the world we want to live in.

Proper installation of pipelines for water distribution will be useful for the sustainable development of domestic and irrigation purposes.

<b>CEDX 62</b>	<b>URBAN PLANNING AND DESIGN</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 11</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** understand the scope and nature of urban design as a discipline.

**COB2:** gain knowledge on various planning process

**COB3:** familiarize the urban planning and its environment

**COB4:** enable the student to analyze the implementation of management information system in urban planning

**COB5:** impart knowledge on management information system

**MODULE I BASIC CONCEPTS 9**

Definition of terms –trend of urbanization at international, national, state and district levels national and regional development policies and strategies – urbanization, housing and sustainable urban development-definition and principles.

**MODULE II PLANNING PROCESS 10**

Types of urban and regional plans, stages in the planning process – delineation of planning areas, goals and objectives of plans, surveys and analysis, formulation of plans, evaluation of alternative plans, plan implementation, legal, financial and institutional constraints in the planning process social orientation in the planning process.

**MODULE III URBAN PLANNING AND ENVIRONMENT 9**

Environment and Resources, Sustainability Assessment, Future Scenarios, Form of Urban Region, Managing the change, Integrated Planning, Sustainable Development Urban Form, Land Use, Compact Development, Guidelines for Environmentally sound urban design.

**MODULE IV DEVELOPMENT MANAGEMENT SYSTEMS 9**

Development control rules – zoning regulations, sub divisional regulations, building bye-laws, co-ordination between urban local bodies and other functional agencies such as water supply & sewerage boards, housing boards including slum boards and planning authorities

**MODULE V MANAGEMENT INFORMATION AND DECISION SUPPORT 8**

Database, management information system, decision support system for land suitability, urban renewal and network analysis.

**L-45; TOTAL HOURS –45**

**TEXT BOOKS:**

1. Donald Natson, "Time Saver Standards for Urban Design", McGraw Hill, 2003
2. Jonathan Barnett, ' Redesigning Cities: Principles, Practice, and Implementation', Planners 2019
3. .Randall Crane and Rachel Weber, 'The Oxford Handbook of Urban Planning', Oxford 2014

2. Malcolm Moor, "Urban Design Futures", Routledge, 2006
3. Bivand, R. S., E. J. Pebesma, and V. Gomez-Rubio', Applied Spatial Data Analysis .2018

**COURSE OUTCOMES:**

At the end of the course, students will be able to

**CO1:** Explain the role of Urban design as blocks, density, neighborhood, Streets and their interdependencies

**CO2:** Ascertain the types of Urban and Regional Plans.

**CO3:** Illustrate the stages of planning process

**CO4:** understand the development control rules and zoning regulations and building bye-laws

**CO5:** Recognize the management information system through which an urban setting could be perceived

**Board of Studies (BoS) :**

SDG 11 : Make cities and human settlements inclusive, safe, resilient and sustainable.

Urban planning and design will enhance inclusive and sustainable urbanization and capacity for participatory, integrated and sustainable human settlement planning and management in all countries

<b>CEDX 64</b>	<b>PAVEMENT DESIGN</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 11</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To impart sufficient knowledge on pavement design

**COB2:** To familiarize knowledge on various IRC guidelines for designing flexible pavement

**COB3:** To study various IRC guidelines for designing rigid pavement

**COB4:** To give an exposure to desirable pavement evaluation.

**COB5:** To impart knowledge on concept of pavement strengthening

**MODULE I PRINCIPLES 9**

Components of a road and their function – Factors affecting pavement stability – Equivalent Single wheel load – Vehicle and traffic factors, moisture, Climate and soil factors – Stress distribution in different conditions –Modulus of elasticity of various layers.

**MODULE II FLEXIBLE PAVEMENT 9**

Empirical method using soil classification tests-Estimation of CBR values-method of designing pavement-plate bearing test method-asphalt institute method – AASHTO Method-bur mister design method –principles of bituminous mix design-IRC Methods.

**MODULE III RIGID PAVEMENT 9**

General design consideration – Stresses in concrete pavement- Design procedure as per IRC method — Design of different joints in concrete pavement and their maintenance.

**MODULE IV PAVEMENT EVALUATION 9**

Method of pavement evaluation–Distress in flexible pavements–Distress in rigid pavements–Structural evaluation of flexible and rigid pavements–Evaluation by deflection measurements.

**MODULE V PAVEMENT STRENGTHENING AND MAINTENANCE 9**

Strengthening of pavement-Methods –Flexible overlays and types-Rigid overlays - Case studies – Maintenance of Bituminous surface, concrete roads and low cost roads – maintenance of shoulders and drainage system.

**L – 45 ; TOTAL HOURS – 45****TEXT BOOKS:**

4. Yoder, R.J. and Witchak M.W. “Principles of Pavement Design”, John Wiley 2000.

**COURSE OUTCOMES:**

At the end of the course, students will be able to

**CO1:** Explain the basic principles and factors to be considered for pavement design.

**CO2:** Analyze and design flexible pavement by various methods.

**CO3:** Analyze and design rigid pavement as per IRC method.

**CO4:** Describe the structural and functional evaluation for pavement performance.

**CO5:** Assess the overlay construction methods and method of maintaining different roads for longer durability and serviceability.

**Board of Studies (BoS) :**

SDG 11: Make cities and human settlements inclusive, safe, resilient and sustainable

Statement:

The good pavement road Make cities and human accessible and sustainable transport systems for all, improving road safety, A well-designed transportation system that supports walking, cycling and public.

<b>CEDX 65</b>	<b>RAILWAY ENGINEERING</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 7</b>		<b>2</b>	<b>0</b>	<b>0</b>	<b>2</b>

**COURSE OBJECTIVES:**

**COB1:** To give an exposure on the role of railways for the development of nation

**COB2:** To study the geometric design of railways tracks.

**COB3:** To impart the knowledge on the construction, maintenance and operation of railway track

**COB4:** To introduce the different modern techniques used in railway Engineering

**MODULE I BASIC ELEMENTS 7**

Railways: Role of Railway Transportation, Advantages and Disadvantages of Railway Transportation, Elements of permanent track way: Rails, Rail Gauges, Sleepers, Ballast, Rail Joints, Fittings, Principal of Traction: Tractive Effort, Train resistances.

**MODULE II GEOMETRIC DESIGN OF RAILWAYS 8**

Elements of Geometric Design: Gradients and Grade compensation on Curves, Cant, Transition Curve, Vertical curve, Sub grade and Embankments: Cutting, Level, Function, Formation of sub grade, Materials used, Slope and Stability of Embankment, Points and Crossings: Turnouts, Diamond crossings, Crossovers, Stations and Yards.

**MODULE III RAILWAY SIGNALS & MAINTENANCE 8**

Signals: Signaling and interlocking, Necessity, Mechanical Devices, Detectors, Stretcher bar, Point lock, Slotting of signals, Connecting Devices, Temperature compensation, Track Drainage, Safety in Railways, Modernization of Track for High Speeds, Modern Methods for Track Maintenance, Railway Expenses, Rates and Fares.

**MODULE IV MODERN RAILWAYS 7**

Different types of modern railway Engineering – Advantages and disadvantages of modern railways- Metro rail – Mono Rail- Mass Rapid Transit system (MRTS) – High speed rails – Bullet trains – Hyperloop rail transport –Light rail transport (LRT) – case studies.

**L – 30; TOTAL HOURS –30****TEXT BOOKS:**

SDG 7 : Ensure access to affordable, reliable, sustainable and modern energy for all

The railway transport for public is affordable and to ensure health and well-being for all, at every stage of life.

<b>CEDX 66</b>	<b>AIRPORT PLANNING</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 8</b>	<b>AND ENGINEERING</b>	<b>2</b>	<b>0</b>	<b>0</b>	<b>2</b>

**COURSE OBJECTIVES:** The Objectives of the course are

**COB1:** To provide an understanding on the concepts of airport planning

**COB2:** To familiarize the geometric design of airway engineering

**COB3:** To give an exposure on the various airport markings and lighting

**COB4:** To impart knowledge on airport maintenance

#### **MODULE I PLANNING 7**

Introduction: Advantages and limitations of air transportation - Airport planning - Selection of sites - survey and drawings to be prepared for airport planning - Airport layout - Characteristics of good layout - Airport configuration, Components of airport- Airport obstruction - location of terminal buildings, aprons and hangers.

#### **MODULE II GEOMETRIC DESIGN 8**

Runways and taxiways: Runway orientation, basic runway length, corrections for elevation, temperature and gradient as per ICAO and FAA recommendation - Airport classification by ICAO- geometric standards – taxiway layout. Zoning requirements regarding permissible heights of constructions and landing within the airport boundary, wind rose diagram.

#### **MODULE III MARKING AND LIGHTING 8**

Airport Design consideration – exit taxiways, aprons, holding aprons, fillets, blast pads- air traffic control – control aids – airport markings and lighting - aircraft parking systems, planning and development of terminal building.

#### **MODULE IV MAINTENANCE 7**

Airport maintenance –types of maintenance- daily maintenance – runway – Taxiway maintenance – Airport drainage maintenance system – terminal building maintenance

**L – 30 ; TOTAL HOURS –30**

#### **TEXT BOOKS:**

1. Khanna. S.K., Arora. M.G and Jain. S.S., Airport Planning and Design, Nemchand and Brothers, Roorkee, 2002.
2. Saxena S.C , Airport Engineering Planning And Design CBS , Publisher 2020

3. Subramanian K.P., Highways, Railways, Airport and Harbour Engineering, V Scitech Publications (India), Chennai, 2014

SDG 8 : Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all

The water transport system Promote sustained, inclusive and sustainable economic growth.

<b>CEDX 71</b>	<b>GPS AND DRONE SURVEYING</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 11</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

The objectives of the course are to impart knowledge on

**COB1:** the determination of the precision of the GPS measurements and the working of GPS.

**COB2:** applying the measuring principle of GPS and Drones in civil engineering projects.

**COB3:** classifying the differences between relative and autonomous GPS positioning, code phase, carrier phase, DGPS and RTK.

**COB4:** the components of drones in surveying and mapping.

**COB5:** the various applications of GPS and Drone Surveying.

**MODULE I GLOBAL POSITIONING SYSTEM 8**

History of GPS, GPS design objectives and details of segments space, control and user, blocks of GPS- Block I, II/IIA, IIR Satellites and IIF. GPS Signal Structure - Carriers, GPS codes: C/A, P, navigational message and GPS receiver: Types and Structure of receivers, Principles of GPS position fixing: Pseudo ranging, Determination of GPS satellite coordinates, Types of ephemerides, GPS errors.

**MODULE II GPS SURVEY METHODS AND APPLICATIONS 10**

Single Point or Point Vs Relative, Static Vs Kinematic, Real-time Vs Post mission, Practical GPS survey field procedures: Code and Carrier-based positioning, Accuracy and recording time, GPS Applications - Geodetic control surveys, Cadastral surveys, Engineering and monitoring, Military applications, Vehicle tracking and car navigation.

**MODULE III DIFFERENTIAL GLOBAL NAVIGATION SATELLITE SYSTEM (DGNSS) 9**

Introduction to GLONASS, Real-Time Kinematic (RTK) - Satellite Based Augmentation System (SBAS) - GNSS Errors - GNSS Correction Methods - Global Navigation Satellite Systems (GNSS) Applications - Current trends and future.

**MODULE IV DRONE SURVEYING 9**

Introduction to drone surveying – Components of drone – Autonomous UAVs –Architecture of an Autonomous system – Path planning – Innovative technological UAVs/Drones – UAV Communication Systems – UAV Data Collection – Data Processing Approaches – Regulatory systems for UAVs – SWOT Analysis of UAV Technology.

## **MODULE V            APPLICATIONS OF GPS AND DRONE            9** **SURVEYING**

Applications in Civil Engineering- mining process- Public infrastructure – resources management - disaster & rescue service - oil & gas monitoring, Forestry, Agriculture - goods delivery- crowd management, traffic regulation - urban planning - infrastructure monitoring, 3D mapping, surveillance, search & rescue - businesses.

**L – 45; TOTAL HOURS – 45**

### **TEXTBOOKS:**

### **COURSE OUTCOMES:**

After completion of the course, the students will be able to

**CO1:** determine the position of the points with GPS measurements.

**CO2:** use different GPS survey methods to improve the positional accuracy

**CO3:** categorize the differences between relative and autonomous GPS positioning, code phase, carrier phase, DGPS and RTK.

**CO4:** apply the important concepts and components of drones in surveying and mapping.

**CO5:** explore the various applications of GPS and Drone Surveying.

**Board of Studies (BoS) :**

16<sup>th</sup> BoS of CIVIL held on  
05.01.2022

SDG 11: Make cities inclusive, safe, resilient and sustainable.

Statement:

The gained knowledge leads to map the cities to enable better planning and to provide living space to all creating inclusive growth and better utilization of resources to enhance sustainability.

<b>CEDX 72</b>	<b>REMOTE SENSING</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

The objectives of the course are

**COB1:** To impart knowledge on the principles of remote sensing data acquisition and analysis of satellite data.

**COB2:** To explore the spectral signatures of various earth features and electromagnetic interactions.

**COB3:** To apply image enhancement techniques to improve the interpretability of satellite images.

**COB4:** To identify the characteristic features of microwave remote sensing.

**COB5:** To explore the usage of aerial photos for measurement of height determination and the use of remote sensing for different applications.

**MODULE I FUNDAMENTALS 8**

Remote sensing: definition – components of remote sensing - energy sensor, interacting body – Active and Passive remote sensing – platforms – aerial and space platforms – balloons, helicopters, aircraft and satellites – synoptivity and repeativity – electromagnetic radiation (EMR) – EMR spectrum – visible, infrared (IR) near IR, middle IR, thermal IR and microwave – black body radiation – Wien's Displacement Law – Stefan Boltzman law.

**MODULE II EMR INTERACTION WITH EARTH SURFACE FEATURES 9**

Atmospheric characteristics – the scattering of EMR – Rayleigh, Mie, Non-selective and Raman scattering – EMR interaction with water vapour and ozone – atmospheric windows – the significance of atmospheric windows – EMR interaction with earth surface material, radiance, irradiance, incident, reflected, absorbed and transmitted energy – reflectance – specular and diffused reflection surfaces – spectral signature – spectral signature curves – EMR interaction with water, soil and earth surface.

**MODULE III DIGITAL IMAGE PROCESSING 10**

Digital processing of satellite images: Geometric rectification, spatial and radiometric enhancement, spectral-domain enhancement, Filtering - edge detection, Image Transformation - band ratio, Supervised and unsupervised classification for thematic map generation.

**MODULE IV MICROWAVE REMOTE SENSING 9**

Microwave Remote Sensing: Basic principles – Advantages of Microwave Remote Sensing – Types of Microwave Remote Sensing – working principle of RADAR – components of RADAR imaging – Factors affecting the radar backscattered energy, System and terrain parameters – spatial resolution of SAR system, geometric characteristics – Applications of Microwave Remote Sensing.

**MODULE V MISCELLANEOUS REMOTE SENSING TECHNIQUES 9**

Aerial photography/photogrammetry: Introduction – Types of photogrammetry – Basic Terminologies – Types of an aerial photograph – Derivation of the scale of a vertical photograph, Orthophotos, Mosaics – Procedure for an aerial survey – Flight planning – Digital Stereo Model (DSM) – Advantages – Applications – Airborne Laser Scanning (ALS) – Introduction, Components of LIDAR – Working principle of ALS – Applications of ALS, Case Studies.

**L – 45; TOTAL HOURS – 45**

**TEXTBOOKS:**

1. Anji Reddy, "Remote sensing and Geographical systems", 4<sup>th</sup> Edition, B.S Publications, Hyderabad, 2014.
2. Basudeb Bhatta, "Remote Sensing and GIS", 3<sup>rd</sup> Edition, Oxford Higher Education / Oxford University Press, 2020.

3. <https://www.gislounge.com/gis-essentials>
4. <https://www.geospatialworld.net/article/technology-trends-in-remote-sensing-and-data-analysis>

**COURSE OUTCOMES:**

After completion of the course, the students will be able

**CO1:** To describe the basic principles of remote sensing data, types of remote sensing and laws related to remote sensing.

**CO2:** To explore the interactions of EMR with earth features based on their spectral signatures.

**CO3:** To evaluate the processing techniques for interpretation of the satellite images.

**CO4:** To analyze the characteristic features of microwave remote sensing.

**CO5:** To explore the use of aerial photos for measurement of height determination and the use of remote sensing for different applications.

**Board of Studies (BoS) :**

18<sup>th</sup> BoS of CE held on 05.04.2023

SDG 9: Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation.

Statement :

The integrated understanding of remote sensing helps one to build sustainable industrialization through optimization of resource utilization in a better innovative way.

<b>CEDX 73</b>	<b>SPATIAL DATA MODELLING</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>	<b>AND ANALYSIS</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To impart knowledge on the fundamental representation of geospatial data and analysis of geospatial phenomena.

**COB2:** To visualize the 3D spatial data such as continuous and discrete data.

**COB3:** To explore the various methods and algorithms used in GIS analysis.

**COB4:** To analyze terrain modeling, geomorphometry, watershed analysis.

**COB5:** To perform GIS-based modeling of landscape processes (water, sediment) in 3D.

**MODULE I GEOSPATIAL DATA 9**

Mapping natural phenomena – Concept of continuous fields and discrete sampling – Units, projections, coordinate transformation – Georeferencing, geospatial formats, conversions, geospatial data abstraction library – Raster and vector representation, raster and vector conversions and resampling.

**MODULE II DATA DISPLAY AND VISUALIZATION 9**

Display of continuous and discrete data, use of color, shading, symbols, to extract the spatial pattern and relationships – 3D visualization: multiple surfaces and volumes, 3D vector objects – visualization for data analysis (lighting, scaling, transparency, cutting planes, animations) – view/create maps/post your data on-line (Google Earth/Maps, GPS visualizer).

**MODULE III GEOSPATIAL ANALYSIS 9**

Foundations for analysis of continuous and discrete phenomena – neighborhood operations and buffers – analysis and modeling with map algebra – cost surfaces and least-cost path – spatial interpolation and approximation (gridding).

**MODULE IV TERRAIN MODELING AND ANALYSIS 9**

Terrain and bathymetry mapping – mathematical and digital representations (point clouds, contour, raster, TIN) – DEM and DSM, working with multiple

return lidar data – spatial interpolation of elevation data and topographic analysis, line of sight, viewshed analysis – solar irradiation, photovoltaic energy potential, time series of elevation data, analysis of coastal change.

**MODULE V                      MODELING OF GEOSPATIAL                      9**  
**PROCESSES**

Model formulation, input data processing – introduction to GIS-based hydrologic, erosion and environmental modeling – Geocomputational methods, including agent-based modeling, artificial neural networks and evolutionary computing.

**L – 45; TOTAL HOURS – 45**

**TEXTBOOKS:**

4. <https://www.geospatialworld.net/article/technology-trends-in-remote-sensing-and-data-analysis>

**COURSE OUTCOMES:**

After completion of the course, the students will be able

**CO1:** To apply the basic concepts of conceptualizing models as representations of real-life systems with inputs, outputs, and processes.

**CO2:** To identify the various data types to extract the spatial pattern for 3D spatial data visualization.

**CO3:** To integrate and develop models with geospatial data through GIS.

**CO4:** To evaluate models in terms of accuracy, sensitivity, and uncertainty.

**CO5:** To execute the hydrological, erosion and environmental modeling through GIS.

**Board of Studies (BoS) :**18<sup>th</sup> BoS of CE held on 05.04.2023**Academic Council:**20<sup>th</sup> Academic council held on

2. Peter von Meiss -Elements of architecture - from form to place, Spon Press2012.
3. Yogeswari. K, Principles of Architecture, Ramalinga Publishers 2005

**COURSE OUTCOMES:**

At the end of the course, students will be able to

**CO1:** describe elements of design in nature

**CO2:** apply the principles of architecture and applications of the same in buildings and spaces

**CO3:** explain the character and style of buildings with examples using design communications and graphics

**CO4:** describe the role of various architect in the contemporary architecture

**CO5:** ascertain the role of landscape design in the shaping of outdoor environments.

**Board of Studies (BoS) :**

SDG 4 : Quality Education

Statement : The Principles and elements of architecture will enhance the quality of knowledge in construction of aesthetical buildings.

<b>CEDX 75</b>	<b>ISLAMIC ARCHITECTURE</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 11</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To study about the Islam

**COB2:** To impart knowledge on the specific cultural context

**COB3:** To expose the character of Islamic architecture

**COB4:** To describe the style and character of Mughal architecture in the Indian context

**COB5:** To study about the expertise of the Mughal rulers in city building

**MODULE I BASIC CONCEPTS 8**

History of Islam- birth, spread and principles Islamic architecture as rising from Islam as a socio-cultural and political phenomenon. Advent of Islam into the Indian subcontinent and its impact including the change in the architectural scene- overview of development based on political history and the corresponding classification of architecture - Islamic architecture in India: sources and influences.

**MODULE II BUILDING TYPES AND FORM 10**

Evolution of building types in terms of forms and functions: mosque, tomb, minaret, madarasa, palace, caravanserai, market. Establishment of the Delhi Sultanate- evolution of architecture under the Slave, Khalji, Tughlaq, Sayyid and Lodhi Dynasties – tombs in Punjab- important examples for each period.

**MODULE III DESIGN ELEMENTS 10**

character of Islamic architecture: principles, structure, materials, and methods of constructions, elements of decoration colour, geometry and light. Shift of power to the provinces and evolution of regional architecture with their own unique influences: geographic, cultural, political, etc., - Bengal, Gujarat, Jaunpur, Malwa, Kashmir, Deccan (Gulbarga, Bidar, Golconda and Bijapur) - important examples for each region.

**MODULE IV MUGHAL ARCHITECTURE 9**

Mughals in India- various style of Mughals architecture and evolution of architecture and outline of Mughal cities and gardens under the Mughal rulers.- important case studies - evolution of architecture and outline of Mughal cities and gardens under the Mughal rulers: Babur, Humayun,

Akbar, Jahangir, Shahjahan, Aurangzeb- important examples- decline of the Mughal empire.

**MODULE V CROSS- CULTURAL INFLUENCES 8**

Cross cultural influences across India and secular architecture- important case studies. Cross cultural influences across India and secular architecture of the princely states: Oudh, Rajput, Sikh, Vijayanagara, Mysore, Madurai- important examples

**L-45; TOTAL HOURS – 45**

**TEXT BOOKS:**

1. George Michell and Helen Philon ., “Islamic Architecture of Deccan India”, ACC Art Books Publisher 2018
2. Moya Carey, Caroline Chapman , “An Illustrated History of Islamic Architecture.” Southwater Publisher ., 2012

3. Richard Ettinghausen, Oleg Grabar, ” Islamic Art and Architecture 650-1250” Yale University Press,2003

**COURSE OUTCOMES:**

At the end of the course, students will be able to

**CO1:** Explore the fundamental concepts of Islamic Architecture

**CO2:** Describe the component of Islamic Architecture

**CO3:** Illustrate the design and implementation of Islamic art

**CO4:** Elucidate the design of Mughal architecture

**CO5:** Explain the importance of different linkages of Islam in Indian culture

**Board of Studies (BoS) :**

SDG 11 : Make cities and human settlements inclusive, safe, resilient and sustainable

Statement : The holistic understanding of Islamic Architecture leads to Sustainable cities and communities.

<b>CEDX 76</b>	<b>VASTHU SASTRA AND</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 11</b>	<b>ARCHITECTURAL DESIGN</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To introduce the principles of vastu

**COB2:** To gain knowledge on astrology and muhurta in vastu

**COB3:** To understand the relationship between site and vastu

**COB4:** To gain knowledge on vastu rules for rooms

**COB5:** To understand the vastu dosha and its remedies

**MODULE I INTRODUCTION TO VASTU 9**

Overview of mythological and scientific background of Vastu - Understanding Life force Energy - Importance of Five Elements - Use of Magnetic Compass - Importance of Cardinal Directions & extensions – energy patterns in vastu.

**MODULE II ASTROLOGY AND MUHURTA IN VASTU 9**

Astrological combinations for Vastu – Planetary combination for learning vastu – Bhumi shayan – Ghriarambha Muhurta – Important Rituals at different levels of constructions.

**MODULE III ORIENTATION OF HOME 9**

Selection of land - Open Space planning and Building Design - Floor level Height factors – Verandas- Balconies -Porch Basements- Water flow - Mezzanine floors - Plants and Greenery.

**MODULE IV VASTU RULES FOR ROOMS 9**

Master Bed Room - Kids room - Living Room- Kitchen- Dining Room – Bathroom - Drawing room - Study Room - Puja Room – Doors - Windows and ventilators - Main Entrance - Staircase – Guest room.

**MODULE V IDENTIFYING VASTU DOSHA AND REMEDIES 9**

Use of compass – Points to be checked for the identification of vastu dosha-reading of map – use of Google map – vastu dosha and remedy related to extensions and curtailments – door planning – brahma and marmasthan – distribution of rooms and sitting – sleeping postures.

**L - 45; Total Hours – 45**

**TEXT BOOKS:**

**SDG 11 : Sustainable Cities and Communities**

Statement : Vastu Sastra explains the concept of sustainable development based on ancient Indian traditional knowledge, through its culture, heritage and orientation towards forest sustainability, as a way to address elements within sustainable development.

**HUMANITIES ELECTIVE – (SEMESTER III)**

<b>SSDX 01</b>	<b>ENGINEERING ECONOMICS</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 4, 8, 9,12</b>	<b>AND MANAGEMENT</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To present the major concepts and techniques of engineering economic analysis that is needed in the decision making process by providing insights to the basic microeconomic concepts of demand, supply and equilibrium.

**COB2:** To generate theoretical knowledge and understanding of macroeconomic aggregates such as national income and inflation and the major challenges associated with the measurement of these aggregates.

**COB3:** To develop analytical and critical thinking skills on money, banking and public finance and use them to judge the appropriateness of economic development and policy options.

**COB 4:** To introduce the basic concepts of management and planning and highlight the contribution of planning to the attainment of organization's objectives.

**COB 5:** To apprise the students about important management concepts and create awareness about the corporate social responsibilities and ethical aspects.

**MODULE I DEMAND AND SUPPLY ANALYSIS 9**

Introduction to Engineering Economics – Engineering efficiency – Economic efficiency - Scope of Engineering Economics, Engineers' contributions to economic growth- Problem solving and decision making - Laws of Demand and Supply - Difference between Microeconomics and Macroeconomics - Equilibrium between Demand and Supply, Elasticity of Demand - Pricing strategies.

**MODULE II NATIONAL INCOME AND INFLATION 8**

Concepts of National Income and measurement – GDP Growth Rate - Importance and difficulties of estimating National Income in India - Aggregate demand and aggregate supply, Macroeconomic equilibrium – Meaning of Inflation, its types causes and preventive measures.

**MODULE III MONEY, BANKING AND PUBLIC FINANCE 10**

Money – Meaning, types, functions, importance - Commercial Banks - Central Bank - Monetary Policy – meaning, objectives, Methods of Credit Control By RBI, Government Budget – Government revenue and expenditures – Fiscal policy - Its objectives, instruments and limitations - Deficit Financing - The Fiscal Responsibility and Budget Management Act, 2003 (FRBMA) – Economic Reforms in India – LPG Policy.

#### **MODULE IV                      PRINCIPLES OF MANAGEMENT AND                      8 PLANNING**

Nature of management and its process - Importance of Management- Functions and Principles of Management - Nature, Purpose and Kinds of Planning.

#### **MODULE V                      ENGINEERING MANAGEMENT                      10**

Strategic Management-Manager and Environment - Globalization and Technology Intermediation, Corporate Social Responsibility of business - meaning, importance, arguments for and against Corporate Social Responsibility - Business Ethics- Role of Ethics in Engineering Practice-meaning, importance - State intervention in business - Pros and Cons of intervention.

**L – 45 ; TOTAL HOURS – 45**

### COURSE OUTCOMES:

On successful completion of this course, students will be able to

**CO1:**interpret the forces driving demand and supply and their impact on market conditions.

**CO2:**demonstrate various dimensions of macroeconomic variables like national income, money supply, employment, etc. in analyzing the effects on business.

**CO3:**explicate the different aspect of Governmental activities and their rationality and describe how they can be pursued through fiscal and monetary policy.

**CO4:**develop skills to plan, organize, direct and control the resources of the organization for obtaining common objectives or goals.

**CO5:** augment managerial skills and adopt ethical practices in various functional areas and engineering practices.

### Board of Studies (BOS) :

5<sup>th</sup>BoS of SSSH held on 29.12.2021

### Academic Council:

**SDG 4:** Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all.

**SDG 8:** Promote sustained, inclusive and sustainable economic growth, full and productive employment, and decent work for all.

**SDG 9:** Build resilient infrastructure, promote sustainable industrialization and foster innovation.

**SDG 12:** Ensure sustainable consumption and production patterns.

Inclusive and equitable quality education can make a critical difference to production patterns, consumer understanding of more sustainably produced goods, promote inclusive and sustainable economic growth along with productive employment and decent work for all.

<b>SSDX 02</b>	<b>SOCIOLOGY OF SCIENCE AND</b>	<b>L T</b>	<b>P C</b>
<b>SDG: 17</b>	<b>TECHNOLOGY</b>	<b>3 0</b>	<b>0 3</b>

**COURSE OBJECTIVES:**

**COB1:** To recognize and define the basic concepts of society and the ways in which sociologists use these concepts in constructing explanations for individual and group problems.

**COB2:** To illustrate the convergence and divergence of sociology with engineering subjects in terms of the subject matter, nature and scope of the discipline and its approach.

**COB3:** To demonstrate the relationship between science, technology and society.

**COB4:** To understand the issues relating to science, technology and change in India both in the historical and globalization contexts.

**COB5:** To appraise the impact of science and technology on different socio-cultural institutions and processes.

**MODULE I INTRODUCTION 8**

Sociology - Definition, scope and importance, relationship with other social sciences - Major theoretical perspectives: Functionalism, Conflict Theorizing and Interactionism - Elements of social formation - Society, Community, Groups and Association - Institutions, family and kinship, religion, education, politics - Social process - Associative Social Process - Co-operation, Accommodation and Assimilation - Dissociative Social Process - Competition and Conflict.

**MODULE II INDIVIDUAL AND SOCIETY 9**

Culture - characteristics, functions, types, cultural lag and civilization - Socialization – process, stages, agencies and anticipatory socialization - Social Control - characteristics, importance, types and agencies - Social stratification. - Meaning, forms - caste and class.

**MODULE III SCIENCE, TECHNOLOGY AND SOCIETY 9**

Relationship between society and science and vice-versa - Science as a social system - Norms of science - Relationship between science and technology - History of modern science in India – colonial–independence and post-independence science - Science education in contemporary India – primary level to research level - Performance of

universities in the development of technology - Interrelationship between industry and universities.

**MODULE IV SCIENCE, TECHNOLOGY AND SOCIAL ISSUES 10**

Technology, media, identity and global society - Conformity and deviance and role of science and technology - Technology and development issue - S&T and sustainable development - Role of science and technology in the creation of environmental crisis - Social inequality, social exclusion and digital divide - Science, technology and ethical issues - Gender and technology.

**MODULE V GLOBALIZATION, SCIENCE, TECHNOLOGY AND CHANGE 9**

Social Change - nature, direction, forms - Technology and rate of social change – Globalization - characteristics, historical and social context- Social consequences of science and technology on civil society - Globalization - Liberalization - Their impact on Indian science and technology - WTO and issues related to intellectual property rights - MNCs and Indian industry.

**L – 45; Total Hours – 45**

SDG 17: Strengthen the means of implementation and revitalize the global partnership for sustainable development.

<b>SSDX 03</b>	<b>INDUSTRIAL ECONOMICS AND</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 8 and 9</b>	<b>MANAGEMENT</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

### **COURSE OBJECTIVES:**

**COB1:** To provide a wholesome idea about the concept of industrial economics and identify the classifications of firms based on ownership and control.

**COB2:** To impart theoretical and analytical knowledge on the different market structures, pricing practices and government policies.

**COB3:** To equip the students with the framework that will be useful for applying economic models in business strategy, competition policy and regulations.

**COB4:** To understand the importance of Industrial Policy in the development of Industries in India.

**COB5:** To elucidate industrial growth in India by examining its performance and problems in industrial sector.

### **MODULE I INTRODUCTION TO INDUSTRIAL ECONOMICS 9**

Definition and scope of industrial economics - Concept and importance of industry; Concept and organization of a firm - Classification of firms based on ownership - sector (industries, formal vs. Informal) - size and use - based classification - Separation of ownership and control - Localization of industries

### **MODULE II MARKET STRUCTURE 9**

Perfect Competition – Imperfect Competition: Monopoly – Monopolistic – Oligopolistic Strategy, Cartels, Cournot Kinked Demand and Price Leadership – Measurement of economic concentration – Policy against monopoly and restrictive trade practices – Competition Law – Pricing Practices: Objectives – Determinants – Pricing Methods – Government Policies and Pricing.

### **MODULE III PRODUCTION ECONOMICS AND THEORY OF FIRM 9**

Production and Production function – Types, Factor Inputs – Input-Output Analysis, Undifferentiated Products - Cournot, Stackelberg, Dominant firm model, Bertrand-Heterogeneous products - Chamberlin's small and large number case - Kinked demand curve theory - Bain's limit pricing – Production Possibility Frontier.

### **MODULE IV INDUSTRIAL POLICY**

Industrial Policy: Industrial Policy in India -1948, 1956, 1977, 1980, 1990, 1991 - Industrial Performance after Independence.

**MODULE V INDUSTRIAL GROWTH IN INDIA 9**

Trends and prospects - Public enterprises; efficiency - Productivity and performance constrain - Small scale industries: definition, role - Policy issues and performance - Capacity utilization - Industrial sickness and Exit - Technology transfer - Privatization.

**L – 45 ; TOTAL HOURS – 45**

**TEXT BOOKS:**

1. Barthwal R R “Industrial Economics: An Introductory Textbook”, New Age International Pvt. Ltd Publishers, 2017

**SDG 8** - Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all.

**SDG 9:** Build resilient infrastructure, promote sustainable industrialization and foster innovation.

A comprehensive and holistic approach towards the way for sustainable development and economic growth through the inclusive economic strategy and thereby to reduce the poverty, hunger among people by familiarizing them industry and its importance as survival strategy for earning decent standard of living.

<b>SSDX 04</b>	<b>DYNAMICS OF INDIAN SOCIAL</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 10, 16</b>	<b>STRUCTURE</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To provide knowledge on the components of the Indian social structure.

**COB2:** To learn the nature and contemporary structure of Indian social institutions.

**COB3:** To sensitize students about social stratification in Indian Society.

**COB4:** To create awareness about the social problems occurring in contemporary India.

**COB5:** To explicate the changing institutions, the processes, the agents and the interventions that brings about change in the Indian society.

**MODULE I INDIAN SOCIAL STRUCTURE 9**

Demographic composition - Racial, religious, ethnic and linguistic -Types of communities - rural, urban, agrarian and tribal - Social backwardness - OBC, SC, ST and EWS - Indian minorities- religious, ethnic, linguistic and LGBT.

**MODULE II INDIAN SOCIAL INSTITUTIONS 9**

Family - types, characteristics, functions of family - Joint Family- definition features, functions of joint family, dysfunctions of joint family, disintegration of joint family – Marriage - definition, characteristics, marriage as sacrament or contract.

**MODULE III SOCIAL STRATIFICATION IN INDIA 9**

Social stratification - Concept of hierarchy - inequality, meaning and characteristics - Social Stratification and Social Mobility - Functions of Social Stratification - Caste, definition, principles, contemporary changes, dominant caste - Caste - class interface - Religious minorities.

**MODULE IV SOCIAL PATHOLOGY 9**

Social Problem - nature, social disorganization - Population explosion- causes, effects, relationship with development - Child Labour- causes, magnitude and consequences – Unemployment - nature, types, causes and effects - Gender issues - social status of women, violence against women and women in work place - Contemporary issues - communalism, terrorism and corruption.

**MODULE V SOCIAL CHANGE IN INDIA 9**

Socio-cultural change - Sanskritization – Westernization - Secularization, Modernization - Processes of Social change - Industrialization – Urbanization – Globalization - Social movement - concept, characteristics, functions - New social movement-Women and Environment movement.

SDG 10: Reduce inequality within and among countries.

SDG16: Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels.

To sensitize and impart pertinent knowledge to youths to combat the contemporary issues and challenges facing Indian society in order to remedy its social pathos and injustices in the path of achieving sustainable development in India.

<b>SSDX 11</b>	<b>ECONOMICS OF SUSTAINABLE</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 1-17</b>	<b>DEVELOPMENT</b>	<b>2</b>	<b>0</b>	<b>0</b>	<b>2</b>

**COURSE OBJECTIVES:**

**COB1:** To inculcate the knowledge base on sustainable development with a view to balance our economic, environmental and social needs, allowing prosperity for now and future generations.

**COB2:** To develop a capacity to undertake a theoretically grounded analysis of environment issues and identify and describe what the United Nations and other governing bodies are doing to assist in a more sustainable world.

**COB3:** To have an insight of the emerging debate about reconciling ecological sustainability with poverty alleviation in the context of globalization and development.

**COB4:** To establish a clear understanding of the policy instruments of sustainable development.

**MODULE I CONCEPT OF SUSTAINABLE DEVELOPMENT 8**

Evolution of the Concept – Rio Summit and sustainable development - various definitions of sustainable development - Components of sustainable development: Social, environmental and economic components – Sustainable Development Goals – Quality education, Gender equality, innovation and infrastructure, peace and justice - Sustainable engineering practices.

**MODULE II NEED FOR SUSTAINABLE DEVELOPMENT 6**

Need for sustainability – Global environmental challenges: population growth, resource depletion, pollution, energy use, climate change, pollution, growing water scarcity, other urban problems, loss of biodiversity, hazardous wastes disposal.

International responses to environmental challenges - Global policy such as Kyoto Protocol, Paris Agreement, Montreal Protocol, Basel Convention.

Community Participation in Sustainable Development, Common Property Resource Management, Innovation, Industry and Sustainable Development.

**MODULE III GLOBALIZATION AND ENVIRONMENT 7 SUSTAINABILITY**

Impact of Globalization on sustainable development, Co - existence of globalization and Environment sustainability - Globalization and Global Governance.

Green economy - Renewable energy, sustainable transport, sustainable construction, land and water management, waste management.

**MODULE IV POLICIES FOR ACHIEVING SUSTAINABLE DEVELOPMENT 9**

Principles of environmental policy for achieving sustainable development: precautionary principle and polluter pays principle – Business Charter for Sustainable Development.

Policy instruments for sustainable development: direct regulation – market based pollution control instruments such as pollution tax, subsidy, pollution permits.

**L –30 ; TOTAL HOURS – 30**

SDG 1: End poverty in all forms and everywhere.

SDG 2: End hunger, achieve food security and improved nutrition, and promote sustainable agriculture.

SDG 3: Ensure healthy lives and promote well-being for all at all ages

SDG 4: Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all

SDG 5: Achieve gender equality and empower all women and girls

SDG 6: Ensure availability and sustainable management of water and sanitation for all.

SDG 7: Ensure access to affordable, reliable, sustainable and modern energy for all.

SDG 8: Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all

SDG 9: Build resilient infrastructure, promote inclusive and sustainable industrialization, and foster innovation

SDG 10: Reduce income inequality within and among countries

SDG 11: Make cities and human settlements inclusive, safe, resilient, and sustainable.

SDG 12: Ensure sustainable consumption and production patterns

SDG 13: Take urgent action to combat climate change and its impacts by regulating emissions and promoting developments in renewable energy.

SDG 14: Conserve and sustainably use the oceans, seas and marine resources for sustainable development.

SDG 15: Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification, and halt and reverse land degradation and halt biodiversity loss.

SDG 16: Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels.

SDG 17: Strengthen the means of implementation and revitalize the global partnership for sustainable development.

The holistic understanding of all the 17 SDGs aims to end poverty, ensure prosperity, and protect the planet.

<b>SSDX 12</b>	<b>SOCIOLOGY OF INDUSTRIAL</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 8, 9</b>	<b>RELATION</b>	<b>2</b>	<b>0</b>	<b>0</b>	<b>2</b>

**COURSE OBJECTIVES:**

**COB1:**To familiarize sociological approaches and perspectives to understand the social relationship in manufacturing industries and corporate sector.

**COB2:**To highlight the structure and functions of industrial organizations

**COB3:**To explicate the dynamics of organizational behavior, leadership and communication.

**COB4:**To provide an overview in labour legislation and labour welfare

**MODULE I INTRODUCTION 7**

Sociology of Industrial relation - definition, scope and importance - Theoretical approaches- scientific management, human relations approach, theory of bureaucracy- Fordism and post-fordism - Production system- concept and characteristics of factory system - automation and rationalization -The Industrial Employment (Standing Orders) Act, 1946 Industrial conflict- strike, lockout and trade unions- Emerging role of trade unions in India.

**MODULE II INDUSTRIAL ORGANIZATION 7**

Formal organization- definition, features, utility - Informal organization- definition, characteristics, types and relevance - Structure of industrial organization- features and functions of line organization, characteristics and roles of staff organization, distinction- Industrial hierarchy-white collar, blue collar, supervisors and managers.

**MODULE III DYNAMICS OF INDUSTRIAL RELATIONS 7**

Group dynamics- Definition, Group behaviour model - Group decision making process, group cohesiveness - Leadership- definitions, style and effective supervision- Communication- concepts, types, model barriers - Job satisfaction- nature, employee compensation and job satisfaction. Grievance Handling and Disciplinary Action, Code of Conduct, Industrial Relations in changing scenario, Employers' organisations.

**MODULE IV LABOUR LEGISLATION AND LABOUR WELFARE 9**

**Labour Legislation**-Objectives, Principles, Classification and Evolution. International Labour Organisation. Social Justice and Labour Legislation, Indian Constitution and Labour Laws- The Factories Act, 1948, The Interstate Migrant Workmen Act, 1979, The Contract Labour (Regulation and Abolition) Act, 1970, The Child Labour (Prohibition and Regulation) Act, 1986. Labour welfare-Concept, Scope, Types, and Principles, Industrial Health and Hygiene, Industrial Accidents and safety, Occupational Diseases. Social Security-Concept and Scope, Social Assistance and Social assurance.

SDG 8: Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all

SDG 9 : Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation

Statement: The holistic understanding of industrial relations leads to equal access to opportunity, and equal pay for work of equal value for male and female contributions is necessary for gender equality as well as for inclusive economic growth. Explore work opportunities, understand career processes and appreciate the meaning and purpose of work in people's lives which leads to decent work and safe working practices.

<b>SSDX 13</b>	<b>PROFESSIONAL ETHICS AND</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 8</b>	<b>HUMAN VALUES</b>	<b>2</b>	<b>0</b>	<b>0</b>	<b>2</b>

**COURSE OBJECTIVES:**

**COB1:** To render basic insights and inputs to the students to inculcate human values to grow as responsible human beings with a proper personality.

**COB2:** To create awareness on senses of engineering ethics.

**COB3:** To inculcate knowledge and exposure on safety and risk, risks benefit analysis and professional rights.

**COB4:** To instill social values and loyalty and to appreciate the rights of others

**MODULE I HUMAN VALUES 7**

Morals, values and Ethics – Integrity – Work ethic – Service learning – Civic virtue – Respect for others – Living peacefully – Caring – Sharing – Honesty – Courage – Valuing time – Cooperation – Commitment – Empathy – Self-confidence – Character – Spirituality – Introduction to Yoga and meditation for professional excellence and stress management.

**MODULE II ENGINEERING ETHICS 7**

Senses of 'Engineering Ethics' - variety of moral issued - types of inquiry - moral dilemmas - moral autonomy - Kohlberg's theory - Gilligan's theory - consensus and controversy – Models of Professional Roles - Theories about right action - Self-interest - Customs and Religion - Uses of ethical theories - Valuing Time – Co-operation – Commitment.

**MODULE III SAFETY, RESPONSIBILITIES AND RIGHTS 8**

Safety and Risk – Assessment of Safety and Risk – Risk Benefit Analysis and Reducing Risk - Respect for Authority – Collective Bargaining – Confidentiality – Conflicts of Interest – Occupational Crime – Professional Rights – Employee Rights – Intellectual Property Rights (IPR) – Discrimination.

**MODULE IV CONTEMPORARY ISSUES 8**

Globalisation-Multinational Corporations – Environmental Ethics – Computer Ethics – Weapons Development – Engineers as Managers – Consulting Engineers – Engineers as Expert Witnesses and Advisors – Moral Leadership –Code of Ethics-Ethics and codes of business conduct in MNC.

7. Subramanian. R,"Professional Ethics - Includes Human Values", Oxford HED Publishers, 2017.\

**COURSE OUTCOMES:**

At the end of the course, the students will be able to

**CO1:** Apply moral and ethical values scrupulously that ought to guide the engineering profession.

**CO2:** Understand the ethical issues related to engineering aspects.

**CO3:** Assess safety and risk and execute risk benefit analysis.

**CO4:** Become responsible engineers, experimenters, researchers or businessmen

**Board of Studies (BoS) :**

4<sup>th</sup>BoS of SSSH held on 28.06.2021

**Academic Council:**

17<sup>th</sup> AC held on 15.07.2021

**Note:**L- Low Correlation    M - Medium Correlation    H -High Correlation

SDG 8 :Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all

Statement: Holistic understanding of professional ethics explores work opportunities, understand career processes and appreciate the meaning and purpose of work in people's lives leading to a decent work and safe working practices and environments.

<b>SSDX 14</b>	<b>GENDER, TECHNOLOGY AND</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 8</b>	<b>DEVELOPMENT</b>	<b>2</b>	<b>0</b>	<b>0</b>	<b>2</b>

**COURSE OBJECTIVES:**

**COB1:** To conceptualize what is gender and sex and draw a line of distinction between the two.

**COB2:** To develop students' sensibility to the difference in gender roles, responsibilities, rights and injustice.

**COB3:** To reflect critically on the ways in which new technologies have sharpened and/or blurred gender difference.

**COB4:** To develop an insight to the gender and development with the paradigm shift from time to time.

**MODULE I UNDERSTANDING GENDER 7**

Basic Concepts: Sex/Gender, Gender roles, Gender socialization, - Construction of Gender- Making Women, Making Men Gender stereotyping, Femininity and Masculinity, Patriarchy, Heteronormativity, LGBTIQ - Theoretical Background to gender and feminist thinking: Liberal, Radical, Marxist, Socialist, Post-modern Feminism.

**MODULE II GENDER ROLES AND GENDER INJUSTICE 7**

Gender Roles and Relations-Types of Gender Roles Gender Roles and Relationships Matrix. Health conditions, Sex Ratio, Education: Literacy & Gender Bias - Work Related Issues: Existing Prejudices, gender Related Violence, Gender Discrimination - Political participation: Lack of women's representation - Economic Conditions- Social Conditions: divorce, rape, domestic violence.

**MODULE III GENDER, TECHNOLOGY AND CHANGE 8**

A historical perspective – Technology as masculine culture – Household technology – medical technology: New Reproductive technologies – Impact of Technological Change on Women. The Digital Divide: Unequal Access, Unequal Effects – Outcome and impact of ICT's Policies and projects for women. How gender influences technologies and the social organization of scientific and technical workspaces.

**MODULE IV GENDER AND DEVELOPMENT 8**

Gender, Governance and Sustainable Development - Women's role in Development - Women in Development (WID), Women and

Development (WAD) - Gender and Development (GAD); Gender Mainstreaming and Gender Budgeting - Gender and Human Rights

**L – 30; TOTAL HOURS –30**

**TEXT BOOKS:**

4. Jain S.C., Women and Technology, Rawat Publication, Jaipur Begh, 1985.

**COURSE OUTCOMES:**

At the end of the course, the students will be able to

**CO1:** Distinguish important concepts related to gender in contemporary society.

**CO2:** Interpret the gender discrimination works in our society and how to counter it.

**CO3:** Illustrate how the intersection of gender and technology involves gender shaping technology and technology shaping gender.

**CO4:** Apply gender sensitive perspective on development and human rights.

**Board of Studies (BoS) :**4<sup>th</sup>BoS of SSSH held on 28.06.2021**Academic Council:**17<sup>th</sup> AC held on 15.07.2021

SDG 5: Achieve gender equality and empower all women and girls

Statement: To imbibe gender concern and gender perspective in the invention, and application of technology, planning and designing production and innovating strategies for engendering gender equality.

**PHYSICS ELECTIVE**

<b>PHDX 01</b>	<b>NON DESTRUCTIVE TESTING OF</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 4</b>	<b>MATERIALS</b>	<b>2</b>	<b>0</b>	<b>0</b>	<b>2</b>

**COURSE OBJECTIVES:**

**COB1:** To understand the importance, principle, concept and inspection methods of various surface NDT methods and develop the skills of interpretation of results effectively.

**COB2:** To study the working and instrumentation of thermography and eddy current testing methods and apply to interpret the results and investigate the possible defects.

**COB3:** To get full exposure about principle, instrumentation and standards of various radiographic NDT methods and improve the skill to identify the defects suitably.

**COB4:** To get deep insight into the principle, types of waves, instrumentation, standards, calibration methods of ultrasonic NDT methods.

**COB5:** To understand the importance, principle, concept and inspection methods of various surface NDT methods and develop the skills of interpretation of results effectively.

**MODULE I SURFACE NDT METHODS 7**

Liquid Penetrant Inspection – Principles, Types of dye and methods of application, developers, advantages and limitations of various methods, Interpretation of results. Magnetic Particle Inspection- Magnetic particle testing, Basic theory of magnetism, Magnetization methods, Interpretation of field indicators, Particle application, Inspection, Residual magnetism Principles and methods of demagnetization.

**MODULE II THERMOGRAPHY AND EDDY CURRENT TESTING 7**

Thermography- Principles, Contact and non contact inspection methods, Advantages and limitation – infrared radiation and infrared detectors, Instrumentations and methods, applications. Eddy Current Testing-Generation of eddy currents, Properties of eddy currents, Eddy current sensing elements, Probes, Instrumentation, Applications, advantages, Limitations, Interpretation/Evaluation.

**MODULE III RADIOGRAPHY 8**

Principle, interaction of X-Ray with matter, imaging, film and film less techniques, types and use of filters and screens, geometric factors, Inverse square law, characteristics of films -graininess, density, speed, contrast, characteristic curves. Penetrameters, Exposure charts, Radiographic equivalence. Fluoroscopy- Xero-Radiography, Digital Radiography.

#### **MODULE IV ULTRASONIC TESTING**

**8**

Ultrasonic Testing: Basic principles of sound propagation, types of sound waves, Principle of UT, methods of UT, their advantages and limitations, Piezoelectric Material, Various types of transducers/probe, Calibration methods, use of standard blocks, technique for normal beam inspection.

**L – 30; TOTAL HOURS – 30**

#### **TEXT BOOKS:**

1. ASM Metals Handbook, Non-Destructive Evaluation and Quality Control, American Society of Metals, Metals Park, Ohio, USA, 200, 2018.
2. Baldev Raj, T.Jayakumar, M.Thavasimuthu Practical Non-Destructive Testing, Narosa Publishing House, 2014.

#### **REFERENCES:**

1. Ravi Prakash, Non-Destructive Testing Techniques, 1st revised edition, New Age International Publishers, 2010.
2. Paul E Mix, Introduction to Non-destructive testing: a training guide, Wiley, 2nd Edition New Jersey, 2005.
3. Charles, J. Hellier, Handbook of Nondestructive evaluation, McGraw Hill, New York 2001.
4. B.P.C. Rao, Practical Eddy Current Testing, Alpha Science International Limited (2006).

#### **COURSE OUTCOMES:**

- CO1:** Demonstrate the importance, principle, concept and inspection methods of various surface NDT methods and apply the same to interpret the results effectively.
- CO2:** Comprehend the ideas behind working of thermography and eddy current testing methods and apply them to interpret the results of testing and analyse the defects and problem.
- CO3:** Grasp the fundamental principles, and standards of various radiographic NDT methods and utilise them to identify the defects and defect location suitably.

**CO4:** Assimilate the ideas concerning the principle, types of waves, instrumentation, standards, calibration methods of ultrasonic NDT methods and identify the areas for their application.

**Board of Studies (BoS) :**

SDG 4: [Ensuring inclusive and equitable quality education for all persons and promote lifelong learning opportunities.](#)

Statement: The modules and topics mentioned in this course are designed to ensure all inclusive and thorough education with equity to all persons and promote learning opportunities at all times.

<b>PHDX 02</b>	<b>MATERIALS SCIENCE FOR</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 4</b>	<b>ENGINEERING</b>	<b>2</b>	<b>0</b>	<b>0</b>	<b>2</b>

### COURSE OBJECTIVES:

**COB1:** To impart knowledge on the fundamentals of materials science and engineering.

**COB2:** To provide a basis for understanding properties and applications of dielectric materials.

**COB3:** To expose the students to different classes of materials, their properties, structures and imperfections

**COB4:** To aid the teaching learning process through relevant illustrations, animations, web content and practical examples

### MODULE I CLASSIFICATION OF MATERIALS 6

Concept of amorphous, single crystals and polycrystalline materials, crystallinity and its effect on physical properties, metal, ceramic, polymers, classification of polymers, structure and properties, additives for polymer products, effect of environment on materials, composites

### MODULE II PROPERTIES OF MATERIALS 10

Mechanical Properties: Stress-strain response of metallic, ceramic and polymer materials, yield strength, tensile strength and modulus of elasticity, toughness, plastic deformation, fatigue, creep and fracture- Electronic Properties: Free electron theory, Fermi energy, density of states, band theory of solids, semiconductors, Hall effect, dielectric behaviour, piezo, ferro, pyroelectric materials - Magnetic Properties: Origin of magnetism in metallic and ceramic materials, para-magnetism, diamagnetism, ferro and ferrimagnetism- Thermal Properties: Specific heat, thermal conductivity and thermal expansion, thermoelectricity- Optical Properties: Refractive index, absorption and transmission of electromagnetic radiation in solids, electro-optic and magneto-optic materials.

### MODULE III CRYSTALLOGRAPHIC STRUCTURES AND 7 IMPERFECTIONS

Crystal symmetry, point groups, space groups, indices of planes, close packing in solids, bonding in materials, coordination and radius ratio concepts, point defects, dislocations, grain boundaries, surface energy and equilibrium shapes of crystals.

**MODULE IV THERMODYNAMICS AND KINETICS 7**

Phase rule, phase diagrams, solid solutions, invariant reactions, lever rule, basic heat treatment of metals, solidification and phase transformations, Fick's laws of diffusion, mechanisms of diffusion, temperature dependence of diffusivity.

**L – 30; TOTAL HOURS –30**

**TEXT BOOKS:**

1. Nanotechnology: An introduction to nanostructuring techniques by Michael Köhler and Wolfgang Fritzsche, Wiley-VCH; 2Rev Ed edition, 2007.

5. "Encyclopedia of Polymer Science and Technology" 3<sup>rd</sup> Edition, Vol.1-12, Wiley Interscience , 2003

**COURSE OUTCOMES**

At the end of the course, students will be able to

**CO1:** select suitable material for specific application.

**CO2:** analyse crystallographic structure of metals and their imperfections.

**CO3:** develop metal alloys with varying properties by selecting suitable heat treatment

**CO4:** correlate the various properties of material with their structure.

**Board of Studies (BoS) :**

BOS of Physics was held on 21.6.21

**PHDX 03****BIOMATERIALS****L T P C****SDG: 4****2 0 0 2****COURSE OBJECTIVES:**

**COB1:** To gain basic knowledge in classification of biomaterials and their properties.

**COB2:** To provide a basis for understanding properties of metallic implant materials.

**COB3:** To enable the students to correlate theoretical principles with practical applications.

**COB4:** To help students understand biocompatibility & toxicological screening of biomaterials

**MODULE I INTRODUCTION TO BIOMATERIALS 8**

Introduction: Definition of biomaterials, requirements & classification of biomaterials, Comparison of properties of some common biomaterials. Effects of physiological fluid on the properties of biomaterials. Surface properties of materials, physical properties of materials, mechanical properties-Materials for biophotonic applications.

**MODULE II IMPLANT MATERIALS 10**

Metallic implants: Stainless steels, co-based alloys, Ti-based alloys, shape memory alloy, nanostructured metallic implants, degradation and corrosion-ceramic implants : bio inert, biodegradable or bioresorbable, bioactive ceramics, nanostructured bio ceramics-Polymer implants: Polymerization, factors influencing the properties of polymers, polymers as biomaterials, biodegradable polymers, Bio polymers: Collagen, Elastin and chitin.

**MODULE III BIOCOMPATIBILITY AND TOXICOLOGICAL SCREENING OF BIOMATERIALS 6**

Definition of biocompatibility, blood compatibility and tissue compatibility. Toxicity tests: acute and chronic toxicity studies (in situ-implantation, tissue culture, haemolysis, thrombogenic potential test, systemic toxicity, intracutaneous irritation test), sensitization, carcinogenicity, mutagenicity and special tests.

**MODULE IV PRACTICAL ASPECTS OF BIOMATERIALS 6**

**Preparation of biomaterials - Microscopic study & analysis of different biomaterials- alginate – material preparation and characterization -**

**Testing of various biomaterials- case studies on industrial and clinical applications of biomaterials.**

**L – 30; TOTAL HOURS – 30**

**TEXT BOOKS:**

1. Myer Kutz, Standard Handbook of Biomedical Engineering and Design, McGraw Hill, 2003
2. Monika Saini, Yashpal Singh, Pooja Arora, Vipin Arora, and KratiJain. Implant biomaterials: A comprehensive review, World Journal of Clinical Cases, 2015.

**REFERENCES:**

4. D F Williams, Materials Science and Technology: Volume 14, Medical and Dental Materials: A comprehensive Treatment Volume, VCH Publishers 1992.

**COURSE OUTCOMES:**

At the end of the course, students will be able to

**CO1:** differentiate common use of biomaterials as metals, ceramics, polymers and apply them to classify its chemical structure, properties and morphology.

**CO2:** comprehend ideas involving general properties of implant materials and apply the same to identify the benefits of implant materials.

**CO3:** attain knowledge about the biocompatibility & toxicological screening of biomaterials and realize its usage in real life.

**CO4:** reflect upon the practical ideas of using biomaterials

<b>PHDX 04</b>	<b>OPTICAL FIBRE COMMUNICATION</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 4</b>		<b>2</b>	<b>0</b>	<b>0</b>	<b>2</b>

**COURSE OBJECTIVES:**

**COB1:** To facilitate the knowledge about optical fibres and its transmission characteristics.

**COB2:** To make the students to learn about LED and laser diodes.

**COB3:** To make the students understand the various types of optical Receivers and sensors.

**COB4:** To enrich the knowledge on optical amplifiers and networks.

**MODULE I INTRODUCTION TO OPTICAL FIBRES 7**

Optical fibre – Principle and propagation of light in optical fibre – Numerical aperture and acceptance angle – Types of optical fibres – Attenuation – Absorption, Scattering losses, Bending losses and Dispersion in Optical fibres – Fiber Connectors and Couplers.

**MODULE II FIBER OPTICAL SOURCES 7**

Light Emitting Diodes (LED) – power and efficiency - double hetero LED – LED structure - LED characteristics – Semiconductor Lasers diode, Homojunction and Heterojunction laser diodes - Optical processes in semiconductor lasers - applications.

**MODULE III FIBER OPTICAL RECEIVERS AND SENSORS 8**

Photo detectors - photodiodes - phototransistors - noise characteristics - PIN diode Avalanche Photodiode (APD) characteristics - APD design of detector arrays – Charged Couple Device - Solar cells - Materials and design considerations, Thin film solar cells, amorphous silicon solar cells - Fiber optic sensors: Intrinsic and Extrinsic sensors, amplitude, phase, wavelength and polarization modulation.

**MODULE IV OPTICAL AMPLIFIERS AND NETWORKS 8**

Optical amplifiers, Semiconductor optical amplifiers, Erbium-doped fiber amplifiers - Optical Networks: Basic networks, SONET/SDH, WDM Networks, Nonlinear effects on network performance, Performance of WDM + EDFA systems, Solitons, Optical CDMA, Ultrahigh capacity networks.

**L – 30; TOTAL HOURS – 30**

**TEXT BOOKS:**

1. Gerd Keiser, Optical Fiber Communication, 3rd Edition, McGraw-Hill International, Singapore, 2013.

<b>PHDX 05</b>	<b>SEMICONDUCTOR PHYSICS FOR</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 4</b>	<b>INFORMATION TECHNOLOGY</b>	<b>2</b>	<b>0</b>	<b>0</b>	<b>2</b>

**COURSE OBJECTIVES:**

**COB1:** To understand the physics of semiconductor devices

**COB2:** To gain knowledge on various methods involved in nanofabrication of semiconductor devices

**COB2:** To study the working principle of optoelectronic devices and various display devices

**COB4:** To get insight to different types of data storage technologies

**MODULE I INTRODUCTION TO SEMICONDUCTOR DEVICES 6**

Semiconductors: N and P type, PN junction diode under forward and reverse bias — Zener diode, Schottky diode – Tunnel diode –bipolar junction transistor (BJT) - metal–oxide–semiconductor field-effect transistor (MOSFET), CMOS-concepts and fabrication.

**MODULE II FABRICATION OF SEMICONDUCTOR DEVICES 6**

Deposition of Semiconductor thin films – molecular beam epitaxy (MBE), chemical vapour deposition (CVD), pulsed laser deposition (PLD),magnetron sputtering,Types of lithography:Photo/ultraviolet /Electron-beam/Focused ion beam, Dip pen nanolithography, Etching process :Dry and Wet etching

**MODULE III OPTOELECTRONIC DEVICES 10**

Light Emitting Diodes (LED) - double hetero LED structure - LED characteristics - White LED – Applications, Semiconductor Lasers, Homojunction and Heterojunction laser diodes - Optical detection – PIN and avalanche photodiodes, Applications: Optical mouse, traffic lights, Luminescence, Cathode Luminescence, Electro Luminescence, Transparent Conductors, Liquid crystal displays – Dynamic scattering and Twisted nematic display, Display Glasses, Organic LEDs display, Charge-coupled devices (CCD), Inorganic Semiconductor TFT Technology, Organic TFT Technology; Flexible Displays, Touch Screen Technology.

**MODULE IV MEMORY STORAGE DEVICES 8**

Introduction to memory storage, Resistive Random Access Memory (ReRAM), Phase Change Memory (PCM); Magnetoresistive Random Access Memory (MRAM)- Gaint Magnetoresistance (GMR), Tunnel Magnetoresistance (TMR),

Ferroelectric Random Access Memory (FeRAM); Comparison and future directions, Hardware circuits, working analysis.

**COURSE OUTCOMES:**

At the end of the course, students will be able to

- CO1:** understand the physics of semiconductor devices and identify its significance towards information technology (IT).
- CO1:** gain insight into various fabrication techniques towards the realization of nano-dimensional semiconductor devices.
- CO2:** attain knowledge on working principles of optoelectronic devices and display technologies and can recognize their importance in commercial applications.
- CO4:** learn the principle of data storage and its application towards futuristic memory technology.

<b>PHDX 06</b>	<b>SENSORS AND ACTUATORS</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 4</b>		<b>2</b>	<b>0</b>	<b>0</b>	<b>2</b>

**COURSE OBJECTIVES:**

**COB1:** To understand the basic concept of sensors towards detection of pressure, position, velocity and temperature.

**COB2:** To avail knowledge on sensor which are sensitive to light, magnetic field, and acoustic waves

**COB3:** To study the different types of fabrication techniques towards realization of various sensors.

**COB4:** To get introduced towards MEMS technology and various actuators.

**MODULE I INTRODUCTION TO SENSORS: PRESSURE, POSITION, VELOCITY AND TEMPERATURE 8**

Introduction to sensors – working principles– classification – static and dynamic characteristics, Error Analysis, Pressure sensors – strain gauge, piezoelectric force sensor, vacuum sensors, Position sensor -Proximity sensor, Capacitive, Inductive and displacement sensor, velocity and acceleration sensors, Temperature sensor-thermocouples- thermistors-Thermo-EMF Sensors, metal Junction and metal Semiconductor junction types.

**MODULE II SENSORS : LIGHT, MAGNETIC FIELD AND ACOUSTIC 8**

Photoconductors- Optical Detectors - Photodiodes, Phototransistors, Optical encoder-Charge Coupled Device (CCD), Fabry Perot sensor, Hall effect, magneto resistive, magneto strictive sensors, Acoustic sensors- microphones-resistive, capacitive, piezoelectric, fiber optic, solid state -electret microphone.

**MODULE III SENSORS FABRICATION TECHNIQUES 7**

Fabrication techniques – molecular beam epitaxy (MBE), chemical vapour deposition (CVD), pulsed laser deposition (PLD), magnetron sputtering, Types of lithography: Photo/ultraviolet /Electron-beam/Focused ion beam, Dip pen nanolithography, Etching process :Dry and Wet etching

**MODULE IV MICROSYSTEMS AND ACTUATORS 7**

Microelectro-mechanical systems (MEMS) - RF- MEMS, Micro fabrication and Applications, Classification of transducers: electrostatic, piezoelectric, thermal, Microsystem design and fabrication.working principles of Actuators.

Piezoelectric and Piezoresistive actuators, micropumps and micro actuators with practical applications Solid-state switches, relays Solenoids, D.C. Motors, A.C. Motors, Stepper motors. Shape memory alloy actuators.

**L – 30; TOTAL HOURS – 30**

**COURSE OUTCOMES:**

At the end of the course, students will be able to

**CO1:** get exposed to various types of sensors and apply the ideas to distinguish between pressure, position, velocity and temperature based sensors

**CO2:** familiarize towards light, magnetic field, and acoustic based sensors and recognize their importance in commercial applications.

**CO3:** gain insight into various fabrication techniques towards the realization of sensors

**CO4:** apply the ideas to conceptualize MEMS technology and different actuators in engineering field

**Board of Studies (BoS) :**

BOS of Physics was held on 21.6.21

**Academic Council:**17<sup>th</sup> AC held on 15.07.2021

SDG 4 : [Ensuring inclusive and equitable quality education for all persons and promote lifelong learning opportunities.](#)

Statement : The modules and topics mentioned in this course are designed to ensure all inclusive and thorough education with equity to all persons and promote learning opportunities at all times.

<b>PHDX 07</b>	<b>FUNDAMENTALS OF</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 4</b>	<b>NANOTECHNOLOGY AND ITS</b>	<b>2</b>	<b>0</b>	<b>0</b>	<b>2</b>
	<b>APPLICATIONS</b>				

**COURSE OBJECTIVES:**

**COB1:**To introduce the basic concepts of Nanoscience through quantum mechanical theories and solid state physics.

**COB2:**To provide knowledge about the various synthesis methods applicable to different nano materials

**COB3:**To enrich the knowledge of students in various characterisation techniques.

**COB4:**To provide knowledge on applications of polymer based nano materials in various fields.

**MODULE I BASICS OF NANO SCIENCE 7**

Introduction to Nanoscience & Nanotechnology : Review of classical mechanics – overview Quantum Mechanics. Background to nanoscience and nanotechnology - scientific revolutions - nanosized effects – surface to volume ratio – atomic structure – molecular and atomic size - quantum effects - formation of nano sized particles – energy at the nanoscale.

**MODULE II SYNTHESIS OF NANOMATERIALS 8**

Nanomaterial Fabrication: Bottom-up vs. top-down - Preparations of Nanomaterials by mechanical and physical methods : – High energy ball milling – melt quenching and annealing – vapour deposition – Pulsed laser deposition – Magnetron sputtering - Microwave plasma evaporation. Chemical Methods of Preparation : Sol-gel method –Electrodeposition – Electrospinning. Arc method for carbon nanotubes – nanofibres and rods – synthesis of Graphene- Handling of nano particles - Health hazards – Precautions.

**MODULE III CHARACTERIZATION OF NANOMATERIALS 8**

Characterisation of Nanomaterials: XRD – particle size determination - SEM - FESEM - TEM – AFM – Nanoindentor – UV-VIS spectroscopy – FTIR, FT-Raman, Photoluminescence, NMR, ESR - Dielectric characterization – Magnetic characterization

**MODULE IV APPLICATION OF NANO MATERIALS 7**

Applications of Carbon based nanomaterials (CNT, CNF, Graphene) - Biosensor (principle, component, types, applications) - agriculture (nano-fertilizers, herbicides, nano-seed science, nano-pesticides) and food Systems

(encapsulation of functional foods, nano-packaging) – Nano - electronics, Nano-optics.

**L – 30; TOTAL HOURS – 30**

**TEXT BOOKS:**

1. Nanotechnology: An introduction to nanostructuring techniques by Michael Köhler and Wolfgang Fritzsche, Wiley-VCH; 2Rev Ed edition, 2007.

**REFERENCES:**

- 4 Nanotechnology Applications in Agriculture – C.R. Chinnamuthu, B.Chandrasekaran and C. Ramasamy – 2008.

**COURSE OUTCOMES:**

At the end of the course, students will be able to

**CO1:** understand basic principles of nanomaterials and apply them to differentiate the significance

of nanomaterials compared to bulk materials.

**CO2:** familiarize the various synthesis methods of nanomaterials and compare them with the preparation of materials in bulk form.

**CO3:** get useful ideas about characterization techniques and differentiate different techniques.

**CO4:** understand the various applications of nanomaterials and realize the role of nanomaterials in various fields

**Board of Studies (BoS) :**

**CHEMISTRY ELECTIVE**

<b>CHDX01</b>	<b>CHEMISTRY OF CONSTRUCTION</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>	<b>MATERIALS</b>	<b>2</b>	<b>0</b>	<b>0</b>	<b>2</b>

**COURSE OBJECTIVES:**

To impart knowledge on

**COB1:** the chemistry of cement and concrete

**COB2:** the properties of steel and mechanism of corrosion

**COB3:** the quality of water and its impact on concrete

**COB4:** the analytical techniques for concrete research

**MODULE I CHEMISTRY OF CEMENT AND CONCRETE 8**

Cement - chemical composition - Bogue's compounds - hydration of cement - hydrated products - influence of hydrated products on properties of cement - types of cement - microstructure of aggregate phase and hydrated cement paste - Interfacial transition zone in concrete : significance and microstructure

**MODULE II CHEMISTRY OF STEEL AND CORROSION 8**

Steel for construction - chemical composition - types of steels - influence of chemical composition on properties. Corrosion of steel - mechanism of corrosion of steel in water and concrete medium - types of corrosion of steel associated to civil engineering. Corrosion prevention and control : coatings & inhibitors - working mechanism. Cathodic protection to steel : Concept - working mechanism - sacrificial anodes

**MODULE III WATER CHEMISTRY FOR CONCRETE 7**

Water quality parameters – pH, solids, hardness, alkalinity, chloride and sulphates in water and their determination- Water quality for building construction – Effect of water impurities on concrete strength and durability- Carbonate and Sulphate attack- Chloride attack –Alkali-Silica reactions in concrete-Case studies

**MODULE IV ANALYTICAL TECHNIQUES FOR CONCRETE RESEARCH 7**

Analytical techniques for cement concrete research - FITR spectroscopy - SEM - XRD - Cyclic voltammetry (CV) - Thermo-gravimetric analysis (TGA) and Differential thermal analysis (DTA) - Advanced chloride and water analysis techniques.

**L – 30; Total Hours –30**

**TEXT BOOKS:**

SDG 9: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

<b>CHDX 03</b>	<b>CHEMISTRY AND</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>	<b>INSTRUMENTATION FOR</b>	<b>2</b>	<b>0</b>	<b>0</b>	<b>2</b>
	<b>ELECTRICAL AND ELECTRONIC</b>				
	<b>APPLICATIONS</b>				

**COURSE OBJECTIVES:**

**COB1:** Synthesis, properties and applications of electrical and electronic devices.

**COB2:** Classification and types of fuel cells.

**COB3:** Types of sensors and their applications.

**COB4:** Principle, instrumentation and applications of analytical techniques.

**MODULE I ELECTRICAL AND ELECTRONIC DEVICES 7**

Solar Cell- Si solar cell, quantum dot solar cell, LCD : components, liquid crystals and their composition, electrodes – OLEDs: components, synthesis and modification of small molecules, polymers, phosphors - FRP-synthesis, properties and electrical applications - Solders : composition and uses – Capacitors : synthesis and modification of capacitor materials, fabrication.

**MODULE II FUEL CELLS 7**

Difference between batteries and fuel cells - classification of fuel cell (based on temperature and electrolyte) – principle, characteristic features, advantages, disadvantages and applications of polymer electrolyte membrane or proton exchange membrane fuel cell (PEMFC), direct methanol fuel cell (DMFC), alkaline fuel cell (AFC), phosphoric acid fuel cell (PAFC), molten carbonate fuel cell (MCFC), and solid oxide fuel cells (SOFC) microbial fuel cell, - hydrogen storage materials, challenges in using hydrogen as a fuel.

**MODULE III SENSORS 7**

Definition, receptor, transducer, classification of chemical sensors based on operating principle of transducer, Ion-selective electrodes, Conductometric gas sensors (chemoresistors), Electrochemical sensors, Potentiometric MOSFET gas sensor, Touch sensors (oximeter, glucometer), Chemocapacitors, Biochips and microarray.

**MODULE IV ANALYTICAL TECHNIQUES 9**

Voltammetry: cyclic voltammetry, electrogravimetry - principle, instrumentation and applications of: UV-Vis spectrophotometry, Atomic emission spectroscopy- Photoluminescence spectrophotometry, atomic absorption spectrophotometry – FT-IR spectroscopy, Raman spectroscopy, TGA-DTA analyzer, TEM.

**L – 30 ; Total Hours –30**

**TEXT BOOKS:**

<b>CHDX 04</b>	<b>FUNCTIONAL MATERIALS AND APPLICATIONS</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
		<b>2</b>	<b>0</b>	<b>0</b>	<b>2</b>
<b>SDG: 11, 12</b>	<b>(CSE – cyber security, AI, IOT, IT)</b>				

**COURSE OBJECTIVES:**

To make the students conversant with

**COB1:** specific materials for hardware components fabrication, data storage and their related properties

**COB2:** selection of advanced materials for various current applications

**COB3:** materials for the fabrication of sensors

**COB4:** essential characterization techniques and software tools with chemistry background

**MODULE I MATERIALS FOR HARDWARE AND DATA STORAGE 7**

Specific materials for electrical and electronic gadgets-computers, instruments (Semiconductors-N, S doped Silicon, CdX QDs, metal nano and other applications). Networking of networks and connecting devices - materials used in robotic construction (metal alloys, kevlor, biodegradable smart materials). Data storage and magnetic hard disk and devices- pendrive (flash memory-ferro magnetic and super paramagnetic materials, optical discs). Nanomaterials to enhance the lifetime and storage of CD, DVD and BD (Nano incorporated Polycarbonate, Al and lacquer) - Nanomaterials and small molecules for data storage.

**MODULE II ADVANCED MATERIALS AND APPLICATIONS 8**

Materials for 3D printing (Nylon, ABS, PLA, Ti, Au and Ag). Solar panels function monitoring-IOT enabled (crystalline Si, organometallics) – Displays and LCD, LEDs and its types-OLEDs (Group III-V materials). RGB analysis -sensing and TV/system screen (QDs and anthocyanins). Semiconductor chemistry for VLSI processing technology (metalloid staircase, Si, Ge, GaAs)-materials for inkjet printable circuit board (nanocarbon based) - Right material for signal speed and right thermal coefficient of expansion - Remote sensing (photodectors and radiometers). Solder:-Lead based solder - issues and alternative for lead free solder (Conductive inks).

**MODULE III MATERIALS FOR FABRICATION OF SENSORS 8**

Wireless Sensors – Introduction to sensors (chemo/bio/gas sensors)-Wearable/touch sensors-Components - selection of materials - Device

fabrication and function monitoring - wireless, Smartphone based and IOT enabled-Properties of materials, anti-corrosive, water proof, insulation and lamination. Robotics in surgery, gene coding and molecular modelling. Biochips and DNA microarray chips(fluorescent dyes, glass/nylon).

#### **MODULE IV ANALYTICAL TECHNIQUES AND SOFTWARE SOLUTIONS 7**

Characterization tools – UV-Visible (DRS), FT-IR, SEM, TEM, AFM, TG-DTA and XRD (Principle and applications only). Introduction to softwares- ChemOffice, Image J, Origin - Molecular modelling, comparison of old drug structures with new, drug designing-drug for COVID-19 and drug delivery. Molecular docking (drug interaction in a human body).

**L – 30; Total Hours –30**

**Note:** L- Low Correlation    M - Medium Correlation    H -High Correlation

SDG : 11 & 12

Statement: Identification of suitable materials towards the manufacturing of electronic gadgets and data storage systems without much affecting the natural resources and application of the fabricated devices to the sustainable cities and communities.

<b>CHDX 05</b>	<b>CHEMISTRY OF FUELS,</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>	<b>COMBUSTION AND LUBRICANTS</b>	<b>2</b>	<b>0</b>	<b>0</b>	<b>2</b>

**COURSE OBJECTIVES:**

The students will be conversant with

**COB1:**types, composition and process of manufacture of solid, liquid and gaseous fuels.

**COB2:**determination of calorific value and calculation of GCV and NCV.

**COB3:**types, concepts of corrosion and different methods for control of corrosion.

**COB4:**types, functions of lubricants and mechanism of lubrication.

**MODULE I FUELS 8**

Introduction – classification of fuels – calorific value – characteristics of a good fuel – comparison of solid, liquid and gaseous fuel – solid fuels – coal – ranking of coal – proximate analysis of coal – pulverised coal – metallurgical coke – manufacture of coke (Otto Hoffman) – Liquid fuel – petroleum – refining of petroleum – cracking – fixed bed catalytic cracking - synthetic petrol – Fischer-Tropsch process – biodiesel - Gaseous fuel – CNG – LPG – Biogas – producer gas – water gas

**MODULE II COMBUSTION 8**

Introduction – calorific value - Calorific value: Gross and net calorific value - Bomb Calorimeter - Gas calorimeter - Definition of combustion – theoretical calculation of calorific values (Dulong's formula) - Gross and net calorific values (problems) - air-fuel ratio - minimum requirement of air for complete combustion of fuels (problems) — Analysis of flue gas - Orsat's gas analysis method

**MODULE III CHEMISTRY OF CORROSION 7**

Types of corrosion - chemical corrosion – electrochemical corrosion – galvanic corrosion – differential aeration corrosion - factors influencing rate of corrosion.

Corrosion control – selection of materials - cathodic protection: sacrificial anode - corrosion inhibitors – paints: constituents & functions – treatment of metal surface for inorganic coatings - metallic coatings: hot dipping: galvanizing and tinning – electroplating — electroless plating.

**MODULE IV LUBRICANTS****7**

Introduction – functions of lubricant- mechanism of lubrication - classification of lubricant – selection of lubricants - lubricating oils- properties of lubricant: viscosity index - flash point and fire point - cloud point and pour point – oiliness - aniline point - carbon residue - semisolid: grease (sodium, calcium, lithium, aluminium) - solid lubricant: graphite, graphene, molybdenum disulphide – lubricating emulsions - cutting fluids – synthetic and semi-synthetic lubricants.

**L – 30; Total Hours – 30****TEXT BOOKS:**

#### SDG 9: Industry, Innovation & Infrastructure

The holistic understanding of the materials used as fuels and lubricants and devices towards sustainable solutions for the advances in mechanical systems.

<b>CHDX 06</b>	<b>INSTRUMENTAL METHODS OF POLYMER ANALYSIS</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG4</b>		<b>2</b>	<b>0</b>	<b>0</b>	<b>2</b>

**COURSE OBJECTIVES:**

To impart knowledge on

**COB1:** to impart knowledge on spectroscopic analysis of polymers.

**COB2:** to equip with the knowledge of optical methods and X-ray diffraction methods for understanding the morphology and orientation of molecules

**COB3:** to develop an understanding on separation of various mixtures by different chromatographic techniques.

**COB4:** to understand the chemical elemental structure of polymers by NMR and mass spectroscopic technique.

**MODULE I      ULTRAVIOLET, VISIBLE AND IR SPECTROSCOPY      9**

Principle- Instrumentation-Double beam spectrophotometers – single beam spectrophotometers -sources of radiation – Detectors – I operational procedure – qualitative and quantitative analysis – applications in polymer analysis.

Fourier Transform Infrared Spectroscopy -principle- instrumentation – optical materials – sources- detectors – typical spectrophotometers — calibration and standardization – sample preparation - analysis – interpretation of FTIR spectra-principle of identification and characterization of polymers using IR

**MODULE II      NMR SPECTROSCOPY      7**

Fundamental concepts – chemical shift – spin –spin- coupling. Instrumentation - data acquisition and spectral interpretation. Solid state NMR (magic angle), Applications of NMR and FT NMR in the characterization of polymers

**MODULE III      CHROMATOGRAPHY AND THERMAL ANALYSIS      7**

Thermal analysis: DSC, TG/DTA, TMA, DMA, DETA with examples. gel permeation chromatography (GPC) – High pressure liquid chromatography (HPLC) – Thin layer chromatography (TLC - Gas chromatography (GC) – sample preparation. Chromatographic process and instrumentation – compositional separation and detectors – various types – Analyses. The uses and applications of various chromatographic techniques – pyrolysis gas chromatography.

**MODULE IV      X-RAY DIFFRACTION & NEWTON SCATTERING      7**

Principle & basic concept of absorption of X-rays- monochromatic X-ray sources – X-ray detectors - Instrumentation – Experimental technique -Analysis by X-ray absorption. Absorption apparatus – X-ray diffraction – Diffraction apparatus. Application to polymer analysis.

**L - 30; Total Hours – 30****TEXT BOOKS**

**Note:** L- Low Correlation    M - Medium Correlation    H - High Correlation

SDG 4: Aims at ensuring inclusive and equitable quality education and promote lifelong learning opportunities for all.

This course will provide deep knowledge on analysis of polymers using different instrumental methods.

<b>CHDX 07</b>	<b>MEDICINAL CHEMISTRY</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>		<b>2</b>	<b>0</b>	<b>0</b>	<b>2</b>

**COURSE OBJECTIVES:**

To impart knowledge on

**COB1:**The basic factors governing drug design.

**COB2:**The software tools for molecular docking.

**COB3:**The synthetic pathway of antineoplastic, cardiovascular and steroidal drugs.

**COB4:**The mode of action and side effects of synthetic drugs.

**MODULE I INTRODUCTION TO DRUG DESIGN 7**

Development of new drugs: Procedure followed in drug design – Literature survey - Search for Active Pharmaceutical Ingredient(s) - Molecular modification – Types of pharmaceutical form / mode of administration, Chemical Characterization of Medicinal Drugs - Molecular docking.

**MODULE II ANTIINFECTIVE DRUGS 8**

Synthesis, mode of action and side effect of Dapsone and Clofazimine (antileprotic) – Isoniazid, Rifampicin, Pyrazinamide and Ethambutol (antitubercular) – Fluconazole and griseofulvin (antifungal) – Chloroquine and Primaquine (antimalarial) - Semisynthetic penicillin, Streptomycin, Ciprofloxacin (Antibiotics) - Nevirapine and Zidovudine (Antiviral)

**MODULE III ANTINEOPLASTIC AND CARDIOVASCULAR DRUGS 8**

Synthesis, mode of action and side effect of Mechlorethamine, Cyclophosphamide, Melphalan, Fluorouracil, 6-Mercaptopurine (Antineoplastic) – Sorbitrate, methylprednisolone, Methyldopa, quinidine (Cardiovascular).

**MODULE IV STEROIDS AND RELATED DRUGS 7**

Synthesis, uses and mode of action - (A) Androgens -testosterone (B) Estrogens and progestational agents – progesterone, (C) Adrenocorticoids – prednisolone, dexamethasone, Remdesivir (D) Glucocorticoids – Cortisol (E) Anabolic steroids - nandrolone, oxandrolone (F) Neurosteroids – allopregnanolone.

**L – 30; Total Hours –30**

**REFERENCES:**

- Strategies for Organic Drug Synthesis and Design, D. Lednicer, John Wiley, 2<sup>nd</sup> Edition 2008.

**COURSE OUTCOMES:**

**CO1:** Carry out searches to retrieve information relevant to the development of a new drug.

**CO2:** Describe and justify the role and importance of the various disciplines involved in the different phases of drug discovery and development.

**CO3:** Explain how synthetic methods are used to make early decisions in the drug discovery and development.

**CO4:** Elaborate the mode of action and side effect of the drugs.

SDG 9 : Industry, Innovation & Infrastructure

Understanding of drugs preparation and usage in sustainable method reduces unwanted side effects and help to environments.
